International Human Rights Law Olivier De Schutter,2014-08-07 The leading textbook on international human rights law is now better than ever. The content has been fully updated and now provides more detailed coverage of substantive human rights, along with new sections on the war on terror and on the progressive realization of economic and social rights, making this the most comprehensive book in the field. It has a new, more student-friendly text design and has retained the features which made the first edition so engaging and accessible, including the concise and critical style, and questions and case studies within each chapter, as well as suggestions for further reading. Written by De Schutter, whose extensive experience working in the field and teaching the subject in both the US and EU gives him a unique perspective and valuable insight into the requirements of lecturers and students. This is an essential tool for all students of international human rights law.

Exercises, Quick Checks, and Toolbox features reinforce coding rules and concepts, and emphasize key information. Four coding question variations develop your coding ability and critical thinking skills. Coder's Index makes it easy to quickly locate specific codes. Updated content includes the latest coding information available, promoting accurate coding and success on the job. New appendix with sample Electronic Health Record (EHR) screenshots provides examples similar to the EHRs you will encounter in the workplace.
