Researching Interactive Communication Behavior C. Arthur VanLear, Daniel J. Canary, 2015-12-17 Researching Interactive Communication Behavior by C. Arthur VanLear and Daniel J. Canary provides students and experienced researchers with tools for studying communication behaviors through direct observation. The sourcebook provides sound coverage of both cutting-edge and well-established systems, measurements, and procedures, as well as detailed information on measurement selection, coding, reliability assessment, and analysis. In addition to offering theoretical discussions, each chapter also focuses on how to apply systems and principles in conducting actual original research and uses examples and exemplars to help readers understand and apply the methods.

Business Writing in the Digital Age Natalie Canavor, 2012 Business Writing in the Digital Age fills an urgent need to equip business and MBA students to write more effectively in a style that works for today's business world. Using a readable, highly accessible approach and numerous concrete examples, this book frames writing as a strategic tool to accomplish goals. Readers learn a step-by-step system that tells them what to say, and how to say it in every circumstance. At the same time they learn how to improve their technical skills by applying practical techniques rather than grammatical rules. In today's business world, success depends on writing. Those who write well are better able to win opportunities, establish their reputation, persuade others to their viewpoint and build relationships. They collaborate, manage and lead more effectively. Writing well also equips businesspeople to function in a global marketplace and reach increasingly diverse audiences. This book builds readers' confidence and capabilities. No matter what their starting point, they absorb a solid foundation that applies to all writing. They also learn the specifics of crafting messages and documents that range from the traditional, like letters and proposals, to media such as email, blogs, web sites, PowerPoint and social networking. This broad coverage makes the material relevant and compelling. Students also develop tools to keep improving on their own, and to handle new communication channels as they emerge. Business Writing in the Digital Age helps teachers stay current with a changing media landscape. They can use it as a complete guide to writing development, drawing on the practice opportunities and group projects supplied, or assign students to work with some--or all the material--on their own.

Remake, Remodel Brooke Erin Duffy, 2013-10-30 What is a magazine? For decades, women's magazines were regularly published, print-bound guidebooks aimed at neatly defined segments of the female audience. Crisp pages, a well-composed visual aesthetic, an intimate tone, and a distinctive editorial voice were among the hallmarks of women's glossies up through the turn of this century. Yet amidst an era of convergent media technologies, participatory culture, and new demands from advertisers, questions about the identity of women's magazines have been cast up for reflection. Remake, Remodel: Women's Magazines in the Digital Age offers a unique glimpse inside the industry and reveals how executives and content creators are remaking their roles, their audiences, and their products at this critical historic juncture. Through in-depth interviews with women's magazine producers, an examination of hundreds of trade press reports, and in-person observations at industry summits, Brooke Erin Duffy chronicles a fascinating shift in print culture and technology from the magazine as object to the magazine as brand. She draws on these findings to contribute to timely debates about media producers' labor conditions, workplace hierarchies, and creative processes in light of transformed technologies and media economies.

Van Tassel, Lisa Poe-Howfield, 2010 The book explains the new vocabulary of media moguls, such as bandwidth, digital rights management, customer relations management, distributed work groups, centralized broadcast operations, automated playlists, server-based playout, repurposing, mobisodes, TV-to-DVD, and content management.

Digital Strategies for Powerful Corporate Communications Paul A. Argenti, Courtney M. Barnes, 2009-04-19 The explosion of blogs, social networking sites, wikis, video sharing sites, and other powerful digital communications platforms may be the biggest game-changer to impact business since mechanized manufacturing. In today's Web 2.0 world, company stakeholders—including employees, customers, and investors—are empowered in ways unimaginable just a few years ago, and traditional corporate hierarchies are yesterday's news. Rather than attempt to turn back the clock and reassert strict, top-down control over stakeholder relationships, the smartest companies worldwide are responding with bold new digital communications strategies based on transparency, authenticity, and inclusion, instead of secrecy, artificiality, and exclusion. International corporate communications guru Paul A. Argenti provides a lively, up-to-the-minute review of the Web 2.0 landscape and analyzes the increasingly central role corporate communications plays in virtually every organizational function. Argenti and coauthor Courtney Barnes advise corporate leaders on how to deploy proven strategies for using new and emerging digital platforms to Manage brand identity and company reputation Build a culture of engagement and transparency Turn stakeholders into “company evangelists” Manage internal communications across time zones and language barriers Recruit and retain the best talent Develop compelling messages based on customer and investor needs and desires Argenti and Barnes provide case studies illustrating digital communications best practices at HP, Southwest Airlines, Sony, Dell, IBM, Starbucks, HBO, FedEx, GE, and other major players. This groundbreaking book will teach you how to gain real, manageable control over your organization's communications in today's virtual world.

Media for Interactive Communication Rudy Bretz, Michael Schmidbauer, Bretz presents a review of the new communication systems which allow people to respond and interact with each other, or the machine, as if in face-to-face conversation. Video conferencing, video telephones, and teletext -- a range of such communication media are already in use or on the drawing boards. The author describes a number of such systems and their uses. He also discusses quasi-interactive systems, which seek responses from an audience before they can proceed. He considers the problems involved in designing such systems and suggests future possibilities.
