*Assessment of Vulnerability to Natural Hazards* Jörn Birkmann, Stefan Kienberger, David Alexander, 2014-06-12 *Assessment of Vulnerability to Natural Hazards* covers the vulnerability of human and environmental systems to climate change and eight natural hazards: earthquakes, floods, landslides, avalanches, forest fires, drought, coastal erosion, and heat waves. This book is an important contribution to the field, clarifying terms and investigating the nature of vulnerability to hazards in general and in various specific European contexts. In addition, this book helps improve understanding of vulnerability and gives thorough methodologies for investigating situations in which people and their environments are vulnerable to hazards. With case studies taken from across Europe, the underlying theoretical frame is transferrable to other geographical contexts, making the content relevant worldwide. Provides a framework of theory and methodology designed to help researchers and practitioners understand the phenomenon of vulnerability to natural hazards and disasters and to climate change Contains case studies that illustrate how to apply the methodology in different ways to diverse hazards in varied settings (rural, urban, coastal, mountain, and more) Describes how to validate the results of methodology application in different situations and how to respond to the needs of diverse groups of stakeholders represented by the public and private sectors, civil society, researchers, and academics

*Commercial and Economic Law in India* K.B. Agrawal, Neha Dixit, 2018-11-07 Derived from the renowned multi-volume International Encyclopaedia of Laws, this practical analysis of the law covering merchants' status and obligations – including the laws governing state intervention in economic activities – in India provides quick and easy guidance on such commercial and economic matters as business assets, negotiable instruments, commercial securities, and regulation of the conditions of commercial transactions. Lawyers who handle transnational business will appreciate the explanation of local variations in terminology and the distinctive concepts that determine practice and procedure. Starting with a general description of the specifically applicable concepts and sources of commercial law, the book goes on to discuss such factors as obligations of economic operators and institutions, goodwill, broker/client relations, commercial property rights, and bankruptcy. Discussion of economic law covers the laws governing establishment, supervision of economic activities, competition law, and government taxation incentives. These details are presented in such a way that readers who are unfamiliar with specific terms and concepts in varying contexts will fully grasp their meaning and significance. Thorough yet practical, this convenient volume is a valuable tool for business executives and their legal counsel with international interests. Lawyers representing parties with interests in India will welcome this very useful guide, and academics and researchers will appreciate its value in the study of comparative commercial and economic law.

**Communities in Action** National Academies of Sciences, Engineering, and Medicine, Health and Medicine Division, Board on Population Health and Public Health Practice, Committee on Community-Based Solutions to Promote Health Equity in the United States, 2017-04-27 In the United States, some populations suffer from far greater disparities in health than others. Those disparities

are caused not only by fundamental differences in health status across segments of the population, but also because of inequities in factors that impact health status, so-called determinants of health. Only part of an individual's health status depends on his or her behavior and choice; community-wide problems like poverty, unemployment, poor education, inadequate housing, poor public transportation, interpersonal violence, and decaying neighborhoods also contribute to health inequities, as well as the historic and ongoing interplay of structures, policies, and norms that shape lives. When these factors are not optimal in a community, it does not mean they are intractable: such inequities can be mitigated by social policies that can shape health in powerful ways. *Communities in Action: Pathways to Health Equity* seeks to delineate the causes of and the solutions to health inequities in the United States. This report focuses on what communities can do to promote health equity, what actions are needed by the many and varied stakeholders that are part of communities or support them, as well as the root causes and structural barriers that need to be overcome.

*Replacement of Renal Function by Dialysis* C. Jacobs,Carl Kjellstrand,Karl-Martin Koch,1996-06-30 Completely revised edition of a global resource first published in 1978 and previously revised in 1989. Sixty-three contributions are arranged in sections on the pathophysiology of the uremic syndrome--principles and biophysics of dialysis; technology of dialysis and associated methods; quantification and prescription; complications; pharmacological considerations; special clinical situations; organ system and metabolic complications; and organization and results of chronic dialysis. The aim is to give understanding of the complexities of modern dialysis apparatus so that practitioners can make the best use of the technology--and so that fledgling nephrologists can avoid the temptation to by-pass the theory and the nuances. *The Biosecurity Individual* Frederike Offizier,2023-12-31 Discoveries in biomedicine and biotechnology, especially in diagnostics, have made prevention and (self)surveillance increasingly important in the context of health practices. Frederike Offizier offers a cultural critique of the intersection between health, security and identity, and explores how the focus on risk and security changes our understanding of health and transforms our relationship to our bodies. Analyzing a wide variety of texts, from life writing to fiction, she offers a critical intervention on how this shift in the medical gaze produces new paradigms of difference and new biomedically

facilitated identities: biosecurity individuals.

Along with sweeping change came sweeping criticisms and issues. This book explores the pros and cons of the Affordable Care Act, and explains who benefits from the ACA. **Health Technology Assessment and Health Policy-making in Europe** Marcial Velasco Garrido, 2008 New technologies with the potential to improve the health of populations are continuously being introduced. But not every technological development results in clear health gains. Health technology assessment provides evidence-based information on the coverage and usage of health technologies, enabling them to be evaluated properly and applied to health care efficaciously, promoting the most effective ones while also taking into account organizational, societal and ethical issues. This book reviews the relationship between health technology assessment and policy-making, and examines how to increase the contribution such research makes to policy- and decision-making processes. By communicating the value and potential of health technology assessment to a wider audience, both within and beyond decision-making and health care management, it aims ultimately to contribute to improve the health status of the population through the delivery of optimum health services.
