**Compliance With Treatment In Schizophrenia** Alec Buchanan,2013-06-20 There is a myth that people with mental disorders comply poorly with treatment. In fact, psychiatric patients are no more likely than patients in other medical specialities to go against the advice of their doctor. That said, it is easy to find instances where psychotropic medication is refused by the supposed beneficiary. The value of neuroleptic treatment in schizophrenia is now widely accepted. Failure to take such treatment is associated with relapse and relapse may endanger the patient and other people. Despite this, people with schizophrenia frequently fail to take their treatment. This study shows that one third can be expected to be non-compliant within two years of leaving a general adult psychiatry ward. It also looks at the reasons for this: the influence of drug side-effects is examined, as well as the impact of each patient's attitude to treatment and whether or not they have stopped taking prescribed medication in the past.

**Environmental Compliance and Sustainability** Daniel T. Rogers,2019-11-04 This book provides a critical understanding of the challenges that exist in protecting the local and global environment through compliance efforts using existing environmental regulations. The best compliance measures with the most useful regulations from over 50 countries are surveyed and are combined with science-based quantitative analysis of geology, hydrogeology, and the chemistry of contaminants from anthropogenic sources. The results are presented as a model that establishes a means by which protection of the environment can be greatly improved. This is accomplished through a deeper understanding of our natural world and how anthropogenic activities and their management affect our planet. Features The first book that examines the successes of environmental regulation worldwide and highlights the areas that need improvement Presents a tested and verified scientific model for enhanced environmental protection with scalability from local parcels to global levels Describes and integrates the importance of understanding the geologic and hydrogeologic environment of urban and developed areas Explains the importance of understanding the different types of pollution and their behavior in the environment Identifies the need for consistency in banning chemicals that are harmful in not just one country but throughout the world

**Conflict and Compliance** Sonia Cardenas,2007 International human rights pressure has been applied to numerous states with varying results.

In *Conflict and Compliance*, Sonia Cardenas examines responses to such pressure and challenges conventional views of the reasons states do--or do not--comply with international law. Data from disparate bodies of research suggest that more pressure to comply with human rights standards is not necessarily more effective and that international policies are more efficient when they target the root causes of state oppression. Cardenas surveys a broad array of evidence to support these conclusions, including Latin American cases that incorporate recent important declassified materials, a statistical analysis of all the countries in the world, and a set of secondary cases from Eastern Europe, South Africa, China, and Cuba. The views of human rights skeptics and optimists are surveyed to illustrate how state rhetoric and behavior can be interpreted differently depending on one's perspective. Theoretically and methodologically sophisticated, *Conflict and Compliance* paints a new picture of the complex dynamics at work when states face competing pressures to comply with and violate international human rights norms.
