**Community and Clinical Pharmacy Services: A step by step approach.** Ashley W. Ells, Justin Sherman, 2013-05-22 A STEP-BY-STEP GUIDE TO IMPLEMENTING ADVANCED PHARMACY SERVICES IN COMMUNITY AND CLINIC SETTINGS Community and Clinical Pharmacy Services teaches pharmacy students and practicing pharmacists how to provide advanced levels of pharmacy services in community and clinic settings designed to help patients achieve specific health goals and treat common disease states. This unique text provides practical--rather than merely ideological--ways for pharmacists to utilize their extensive clinical knowledge and fill a major gap in American health care. It discusses barriers, necessary skills, required knowledge, and issues related to preparation, interventions, patient outcomes, economic aspects, and marketing considerations for therapeutic areas commonly addressed in the outpatient setting. The beginning of the book delves into the general management skills necessary to provide and implement advanced patient care services, including documentation, patient interviewing, and medication therapy management. Important chapters discuss disease states that would most likely be amenable to development of pharmacy services, including: Asthma Smoking Cessation Diabetes Hypertension Osteoporosis Obesity Also covered are immunizations, anticoagulation, and cardiometabolic services. The disease state chapters include learning aids such as summary points, first-hand accounts from experienced pharmacists who have implemented pharmacy services for that particular condition, a simulated patient case, and multiple-choice questions.

**Embedded Pharmacists in Primary Care** George E. MacKinnon III,Nathan Lamberton,2021-06-08 As healthcare delivery moves from a provider-centric approach to a more patient-centric approach, systems and payers need to reimagine how care and team-based care is delivered to patients and reimbursed. Thus, the goal should be to see the right patient, by the right provider, in the right place, for the right price, and where appropriate, with the use of the right pharmaceutical(s) - "5 P's". There continues to be a reduction in physicians that are pursuing primary care roles in the United States, thus exacerbating the ability to meet patient demand. Most patient encounters begin with or end with the prescribing of medication. Thus, a future where pharmacists are embedded in primary care settings allows these pharmacists to collaborate at the point-of-prescribing (i.e., in-clinic) and provides tremendous benefits to providers and patients. The pharmacist workforce is educated at the doctoral level, yet vastly underutilized and can assist in a collaborative approach in primary care. The collection of articles in the Special Issue "Embedded Pharmacists in Primary Care" highlight examples of models that have included pharmacists in the ambulatory setting providing services in chronic disease management, comprehensive medication management, and care of specific conditions such as diabetes.
