Reconsidering Constitutional Formation II Decisive Constitutional Normativity Ulrike

Müßig, 2020-10-08 This second volume of ReConFort, published open access, addresses the decisive role of constitutional normativity, and focuses on discourses concerning the legal role of constitutional norms. Taken together with ReConFort I (National Sovereignty), it calls for an innovative reassessment of constitutional history drawing on key categories to convey the legal nature of the constitution itself (national sovereignty, precedence, justiciability of power, judiciary as constituted power). In the late 18th and early 19th centuries, constitutional normativity began to complete the legal fixation of the entire political order. This juridification in one constitutional text resulted in a conceptual differentiation from ordinary law, which extends to alterability and justiciability. The early expressions of this 'new order of the ages' suggest an unprecedented and irremediable break with European legal tradition, be it with British colonial governance or the French ancien régime. In fact, while the shift to constitutions as a hierarchically 'higher' form of positive law was a revolutionary change, it also drew upon old liberties. The American constitutional discourse, which was itself heavily influenced by British common law, in turn served as an inspiration for a variety of constitutional experiments - from the French Revolution to Napoleon's downfall, in the halls of the Frankfurt Assembly, on the road to a unified Italy, and in the later theoretical discourse of twentieth-century Austria. If the constitution states the legal rules for the law-making process, then its Kelsian primacy is mandatory. Also included in this volume are the French originals and English translations of two vital documents. The first - Emmanuel Joseph Sieyès' *Du Jury Constitutionnaire* (1795) - highlights an early attempt to reconcile the democratic values of the French Revolution with the pragmatic need to legally protect the Revolution. The second - the 1812 draft of the Constitution of the Kingdom of Poland - presents the 'constitutional propaganda' of the Russian Tsar Alexander I to bargain for the support of the Lithuanian and Polish nobility. These documents open new avenues of research into Europe's constitutional history: one replete with diverse contexts and national experiences, but above all an overarching motif of constitutional decisiveness that served

to complete the juridification of sovereignty. (www.reconfort.eu) This work was published by Saint Philip Street Press pursuant to a Creative Commons license permitting commercial use. All rights not granted by the work's license are retained by the author or authors.

Sovereignty, Civic Participation, and Constitutional Law Brecht Deseure, Raf Geenens, Stefan Sottiaux, 2021-04-13 This book brings recent insights about sovereignty and citizen participation in the Belgian Constitution to scholars in the fields of law, philosophy, history, and politics. Throughout the Western world, there are increasing calls for greater citizen participation. Referendums, citizen councils, and other forms of direct democracy are considered necessary antidotes to a growing hostility towards traditional party politics. This book focuses on the Belgian debate, where the introduction of participatory politics has stalled because of an ambiguity in the Constitution. Scholars and judges generally claim that the Belgian Constitution gives ultimate power to the nation, which can only speak through representation in parliament. In light of this, direct democracy would be an unconstitutional power grab by the current generation of citizens. This book critically investigates this received interpretation of the Constitution and, by reaching back to the debates among Belgium's 1831 founding fathers, concludes that it is untenable. The spirit, if not the text, of the Belgian Constitution allows for more popular participation than present-day jurisprudence admits. This book is the first to make recent debates in this field accessible to international scholars. It provides a rare source of information on Belgium's 1831 Constitution, which was in its time seen as modern constitutionalism's greatest triumph and which became a model for countless other constitutions. Yet the questions it asks reverberate far beyond Belgium. Combining new insights from law, philosophy, history, and politics, this book is a showcase for continental constitutional theory. It will be a valuable resource for academics and researchers in constitutional law, political and legal philosophy, and legal history.

The Intellectual Origins of the Belgian Revolution Stefaan Marteel, 2018-09-05 This book explores the political ideas of the Belgian Revolution of 1830, which led to the break-up of the Restoration state of the 'united' Kingdom of the Netherlands. It uncovers the origins of liberalism and political Catholicism in the Southern Netherlands in the wake of the French Revolution, and traces the development of political language in the context of the tensions between the Northern and Southern part of the united Netherlands. It shows how differences in 'Dutch' and 'Belgian' political and intellectual history resulted in different understandings of essential political concepts such as 'sovereignty' and 'balance of powers', as well as of the nature of the constitutional order of 1815. Finally, it traces the emergence of Belgian nationalism within the discourse of opposition against the

government. Stefaan Marteel therefore provides a fresh perspective on the intellectual background of the rise of the nation-state in the nineteenth century.

National Constitutions in European and Global Governance: Democracy, Rights, the Rule of Law

Anneli Albi, Samo Bardutzky, 2019-05-29 This two-volume book, published open access, brings together leading scholars of constitutional law from twenty-nine European countries to revisit the role of national constitutions at a time when decision-making has increasingly shifted to the European and transnational level. It offers important insights into three areas. First, it explores how constitutions reflect the transfer of powers from domestic to European and global institutions. Secondly, it revisits substantive constitutional values, such as the protection of constitutional rights, the rule of law, democratic participation and constitutional review, along with constitutional court judgments that tackle the protection of these rights and values in the transnational context, e.g. with regard to the Data Retention Directive, the European Arrest Warrant, the ESM Treaty, and EU and IMF austerity measures. The responsiveness of the ECJ regarding the above rights and values, along with the standard of protection, is also assessed. Thirdly, challenges in the context of global governance in relation to judicial review, democratic control and accountability are examined. On a broader level, the contributors were also invited to reflect on what has increasingly been described as the erosion or 'twilight' of constitutionalism, or a shift to a thin version of the rule of law, democracy and judicial review in the context of Europeanisation and globalisation processes. The national reports are complemented by a separately published comparative study, which identifies a number of broader trends and challenges that are shared across several Member States and warrant wider discussion. The research for this publication and the comparative study were carried out within the framework of the ERC-funded project 'The Role and Future of National Constitutions in European and Global Governance'. The book is aimed at scholars, researchers, judges and legal advisors working on the interface between national constitutional law and EU and transnational law. The extradition cases are also of interest to scholars and practitioners in the field of criminal law. Anneli Albi is Professor of European Law at the University of Kent, United Kingdom. Samo Bardutzky is Assistant Professor of Constitutional Law at the University of Ljubljana, Slovenia.

Belgium, a Country Study Stephen B. Wickman, 1986

The Constitution of Belgium and the Belgian Civil Code John Crabb, 1983

The Role of Monarchy in Modern Democracy Robert Hazell, Bob Morris, 2020-09-17 How much power does a monarch really have? How much autonomy do they enjoy? Who regulates the size of

the royal family, their finances, the rules of succession? These are some of the questions considered in this edited collection on the monarchies of Europe. The book is written by experts from Belgium, Denmark, Luxembourg, the Netherlands, Norway, Spain, Sweden and the UK. It considers the constitutional and political role of monarchy, its powers and functions, how it is defined and regulated, the laws of succession and royal finances, relations with the media, the popularity of the monarchy and why it endures. No new political theory on this topic has been developed since Bagehot wrote about the monarchy in *The English Constitution* (1867). The same is true of the other European monarchies. 150 years on, with their formal powers greatly reduced, how has this ancient, hereditary institution managed to survive and what is a modern monarch's role? What theory can be derived about the role of monarchy in advanced democracies, and what lessons can the different European monarchies learn from each other? The public look to the monarchy to represent continuity, stability and tradition, but also want it to be modern, to reflect modern values and be a focus for national identity. The whole institution is shot through with contradictions, myths and misunderstandings. This book should lead to a more realistic debate about our expectations of the monarchy, its role and its future. The contributors are leading experts from all over Europe: Rudy Andeweg, Ian Bradley, Paul Bovend'Eert, Axel Calissendorff, Frank Cranmer, Robert Hazell, Olivia Hepsworth, Luc Heuschling, Helle Krunke, Bob Morris, Roger Mortimore, Lennart Nilsson, Philip Murphy, Quentin Pironnet, Bart van Poelgeest, Frank Prochaska, Charles Powell, Jean Seaton, Eivind Smith.

Belgic Confession ,

An Introduction to the Study of the Law of the Constitution A.V. Dicey, 1985-09-30 A starting point for the study of the English Constitution and comparative constitutional law, *The Law of the Constitution* elucidates the guiding principles of the modern constitution of England: the legislative sovereignty of Parliament, the rule of law, and the binding force of unwritten conventions.

Engineering Constitutional Change Xenophon I. Kontiadis, 2013 This book offers a comprehensive comparative guide to constitutional amendment in Europe and North America. The contributions to the book are written by experts in comparative constitutional law and looks at a particular country providing a critical analysis of its constitutional revision principles, procedure, practice and developments. The volume includes a final chapter with a comparative analysis on constitutional amendment elaborating on and attempting to develop an explanatory theory regarding the points of convergence as well as the detected differentiations. Thus allowing the comparative elements interesting at an international level to emerge and be assessed.

The Constitution of Risk Adrian Vermeule, 2014 The Constitution of Risk is the first book to combine constitutional theory with the theory of risk regulation. The book argues that constitutional rulemaking is best understood as a means of managing political risks. Constitutional law structures and regulates the risks that arise in and from political life, such as an executive coup or military putsch, political abuse of ideological or ethnic minorities, or corrupt self-dealing by officials. The book claims that the best way to manage political risks is an approach it calls optimizing constitutionalism - in contrast to the worst-case thinking that underpins precautionary constitutionalism, a mainstay of liberal constitutional theory. Drawing on a broad range of disciplines such as decision theory, game theory, welfare economics, political science, and psychology, this book advocates constitutional rulemaking undertaken in a spirit of welfare maximization, and offers a corrective to the pervasive and frequently irrational attitude of distrust of official power that is so prominent in American constitutional history and discourse.

Salikov (Russia), Cheryl Saunders (Australia), Anthony M. Sayers (Canada), Nicolas Schmitt (Switzerland), Celina Sousa (Brazil), Nico Steytler (South Africa), and G. Alan Tarr (USA).

Constitutional Identity in a Europe of Multilevel Constitutionalism Christian Calliess, Gerhard van der Schyff, 2019-10-24 Presents a critical outline and comparison of selected EU Member State constitutional identities in the context of EU multilevel constitutionalism.

Principles of Enterprise Law Ewan McGaughey, 2022-09-01 Major enterprises shape our lives in countless ways: big tech and 'surveillance media' that affect democratic debate, algorithms that influence online shopping, transport to work and home, energy and agriculture corporations that drive climate damage, and public services that provide our education, health, water, and housing. The twentieth century experienced swings between private and public ownership, between capitalism and socialism, without any settled, principled outcome, and without settling major questions of how enterprises should be financed, governed and the rights we have in them. This book's main question is 'are there principles of enterprise law', and, if they are missing, 'what principles of enterprise law should there be'? Principles of Enterprise Law gives a functional account of the 'general' enterprise

laws of companies, investment, labour, competition and insolvency, before moving into specific enterprises, from universities to the military. It is an original guide to our economic constitution and human rights.
