**Privatization in Turkey** Ahmet Zaifer,2022-06-27 In Privatization in Turkey: Power Bloc, Capital Accumulation and State, Ahmet Zaifer offers a rare look on privatization in Turkey that involves all three historical periods of Turkish privatization process -1980s and 1990s, 2000s, and 2010s- and

covers different forms of privatization from divestiture to public-private partnership. Benefiting from theoretically informed qualitative research spanning nearly a decade that has involved several interviews with key informant groups, extensive review of newspaper articles and detailed analysis of annual reports of businesses, Ahmet Zafer convincingly proves that the acceleration of privatization in Turkey has not only provided advantages to so-called favourable capital groups and the government elites, but also consolidated the position of Capital in General at the expense of labouring-popular classes and the natural environment of the entire country.

The Wiley Handbook of Collaborative Online Learning and Global Engagement Deirdre

Johnston,Irene López,2022-07-13 Presents best practices for faculty and administrators developing globally-connected courses, including learning objectives, collaborative assignments, and logistical planning As political instability, pandemic risks, rising costs, new requirements for experiential learning, and other factors make it increasingly difficult for students to study abroad, there is growing interest in globalizing and internationalizing the curricula of colleges and universities worldwide. The Wiley

Handbook of Collaborative Online Learning and Global Engagement is designed to help educators develop and conduct high-impact, globally-connected courses across the humanities, the fine arts, and the social and natural sciences. This comprehensive guide covers collaborative practices, course design variables, student learning approaches, logistical planning, and more. An international team of contributors from diverse geographic, cultural, and academic backgrounds offer insight into enhancing pedagogical practice, coordinating study abroad experiences, and promoting both students' and faculty's global competencies. Throughout the text, numerous real-world case studies, interactive and experiential assignments, sample syllabi, course bibliographies, and links to web and media resources reinforce best practices for course design, learning objectives, and pedagogy development. Based on a detailed assessment of 500 students in collaborative courses across 14 countries, this innovative guide: Covers co-development of learning objectives across different courses, disciplines and cultural contexts, co-coordination of course content, technology, and resources, and intercultural learning assessment Explores new and innovative ways to engage students in distant locations in collaborative

learning Provides advice for overcoming logistical challenges, managing group dynamics, controlling costs, and implementing connected courses with limited resources Discusses the impact globally-connected courses have on cultural curiosity, knowledge, strategy, and behavior Offers approaches for addressing cultural transgressions and miscommunication, and for collaborating with other faculty members across cultures and educational systems Featuring multiple cultural perspectives and international contexts, The Wiley Handbook of Collaborative Online Learning and Global Engagement is a valuable guide and reference for faculty and administrators involved in teaching, planning, implementing, or assessing courses with global learning outcomes.

The Evolution of Opera Theatre in the Middle East and North Africa Paolo Petrocelli, 2019-09-12

This book is the first structured and complete research work undertaken on opera theatres across the entire Middle East and North Africa. Until now, no single study has looked at every theatrical and musical institute in these countries. Many of the opera theatres that are examined here have had very little written about them at all. This work fills this void in order to provide scholars and practitioners in the sector with the first reference work on the subject that will help our understanding of the evolutionary process that has led—and continues to lead—all the countries in the MENA region to equip themselves with an opera theatre.

*Places of Encounter, Volume 2* Aran MacKinnon, Elaine McClarnand MacKinnon, 2018-03-09 First

Published in 2018. Using a place-based approach by focusing on specific locations at critical historical

moments of historical transformation, *Places of Encounter* provides a unique alternative to world history anthologies or survey texts. Students will experience the narrative of historic individuals as well as modern scholars looking back over documentation to offer their own views of the past, providing students with the perfect opportunity to see how scholars form their own views about history. This text can be purchased as two volumes, providing a breadth of information for survey courses in world history.

**Building Air Bases in the Negev** Frank N. Schubert, 1992 *Building Air Bases in the Negev* is a remarkable story of the U.S. Army Corps of Engineers' role supporting national diplomatic initiatives overseas while managing a major construction project in Israel. Frank N. Schubert has written a superbly organized account, tracing from the spring of 1979 to the summer of 1982 the development and completion of two ultramodern air bases at a cost that only exceeded original estimates by less than 3 percent. As Schubert suggests, the air base program helped bring peace between two long-term antagonists--Israel and Egypt. Schubert's work serves as an important case study for analyzing

not only engineering project management and construction practices but also demanding sociopolitical, cultural, and business conditions in sovereign foreign lands.

Leadership Strategies for Global Supply Chain Management in Emerging Markets Dwivedi, Ashish, Alshamrani, Mohammed Saad, 2020-05-22 In recent decades, the rapid expansion of trade and investment among developing countries has resulted in a scenario wherein firms from developing countries account for an increasing share of capital, goods, and wealth in the global economy. Industry leaders from developing countries have observed that firms in developing countries need to identify and develop key supply chain capabilities in order to succeed in emerging markets. It is argued that customers in emerging markets are likely to have different needs and supply chain expectations as compared to customers in developed economies. Reaching into these emerging markets, understanding the customer diversity, and translating it into effective segmentation schemes are critical for the efficient design of supply chain operations. Leadership Strategies for Global Supply Chain Management in Emerging Markets is a pivotal reference source that provides vital research on creating

efficient supply chain operations in emerging markets. While highlighting topics such as consumer behavior, global operations, and information transparency, this publication investigates the needs of consumers in emerging markets as well as the methods of designing effective operations. This book is ideally designed for supply chain managers, logistics managers, operations and warehousing professionals, industry practitioners, academicians, students, and researchers.

*The Design-Build Studio* Tolya Stonorov, 2017-09-20 The Design-Build Studio examines sixteen international community driven design-build case studies through process and product, with preceding chapters on community involvement, digital and handcraft methodologies and a graphic Time Map. Together these projects serve as a field guide to the current trends in academic design-build studios, a window into the different processes and methodologies being taught and realized today. Design-build supports the idea that building, making and designing are intrinsic to each other: knowledge of one strengthens and informs the expression of the other. Hands-on learning through the act of building what you design translates theories and ideas into real world experience. The work chronicled in this

book reveals how this type of applied knowledge grounds us in the physicality of the world in which we live.
