Gravel Roads Ken Skorseth, 2000 The purpose of this manual is to provide clear and helpful information for maintaining gravel roads. Very little technical help is available to small agencies that are responsible for managing these roads. Gravel road maintenance has traditionally been more of an art than a science and very few formal standards exist. This manual contains guidelines to help answer the questions that arise concerning gravel road maintenance such as: What is enough surface crown? What is too much? What causes corrugation? The information is as nontechnical as possible without sacrificing clear guidelines and instructions on how to do the job right.

Wang, 2016-06-24 The Utilization of Slag in Civil Infrastructure Construction strives to integrate the theory, research, and practice of slag utilization, including the production and processing of slags. Paving the Way for Better Governance in Urban Transport Kala Seetharam

Sridhar,Ranjit Gadgil,Chhavi Dhingra,2019-10-21 This book presents an innovative democratic framework that ensures public participation, based on applying principles of good governance to facilitate urban transport decision-making in an integrated and structured manner. While – given the need for mobility in cities – transport is crucial for urban development, problems such as the fragmentation of institutions, decision-making, and unequal knowledge concentrations represent major hurdles to effective governance outcomes (especially those that go beyond technical and regulatory aspects). Substantial investments continue to be pumped into the urban transportation sector, with cities lacking the necessary capacities or governance mechanisms to ensure optimal returns on these investments. The book introduces the transport governance framework, which is intended to provide an integrated and structured approach to facilitate decision-making processes in the urban transport sector, focusing on how decisions are made rather than what decisions are made. It also discusses the initial testing of the framework in several cities across India. In addition, it examines the application of the TAPC (transparency, accountability, participation, and capacity building) principles of good governance to key aspects of urban transport – policy, planning, standards, budgets, execution, and regulation.
