Handbook of Research on Acquiring 21st Century Literacy Skills Through Game-Based Learning Lane, Carol-Ann, 2022-01-07 Emerging technologies are becoming more prevalent in global classrooms. Traditional literacy pedagogies are shifting toward game-based pedagogy, addressing 21st century learners. Therefore, within this context there remains a need to study strategies to engage learners in meaning-making with some element of virtual design. Technology supports the universal design learning framework because it can increase the access to meaningful engagement in learning and reduce barriers. The Handbook of Research on Acquiring 21st Century Literacy Skills Through Game-Based Learning provides theoretical frameworks and empirical research findings in digital technology and multimodal ways of acquiring literacy skills in the 21st century. This book gains a better understanding of how technology can support learner frameworks and highlights research on discovering new pedagogical boundaries by focusing on ways that the youth learn from digital sources such as video games. Covering topics such as elementary literacy learning, indigenous games, and student-worker training, this book is an essential resource for educators in K-12 and higher education, school administrators, academicians, pre-service teachers, game developers, researchers, and libraries.

CALL and complexity – short papers from EUROCALL 2019 Fanny Meunier, Julie Van de Vyver, Linda Bradley, Sylvie Thouësny, 2019-12-09 The theme selected for the 2019 EuroCALL conference held in Louvain-la-Neuve was ‘CALL and complexity’. As languages are known to be intrinsically and linguistically complex, as are the many determinants of learning (additional) languages, complexity is viewed as a challenge to be embraced collectively. The 2019 conference allowed us to pay tribute to providers of CALL solutions and to recognize the complexity of their task. We hope you will enjoy reading this volume as it offers a rich glimpse into the numerous debates that took place during EuroCALL 2019. We look forward to continuing those debates and discussions with you at the next EuroCALL conferences!

The Routledge Companion to Copyright and Creativity in the 21st Century Michelle Bogre, Nancy Wolff, 2020-11-25 These collected chapters and interviews explore the current issues and debates about how copyright will or should adapt to meet the practices of 21st-century creators and internet users. The book begins with an overview of copyright law basics. It is organized by parts that correspond to creative genres: Literary Works, Visual Arts, Fine Art, Music, Video Games and Virtual Worlds, Fashion, and Technology. The chapters and interviews address issues such as copyright ownership in work created by Artificial Intelligence (AI), the musical remix market, whether appropriation is ever a fair use of a copyrighted work or if it is always theft, and whether internet-based platforms should do more to deter piracy of creators' works. Each part ends with an essay explaining the significance of one or two landmark or trendsetting cases to help the reader understand the practical implications of the law. Written to be accessible to both lay and legal audiences, this unique collection addresses contemporary legal issues that all creators need to understand and will be essential reading for artists, designers, and musicians as well as the lawyers who represent them.

The Social Life of Avatars Ralph Schroeder, 2012-12-06 Virtual reality (VR) technology has been developed commercially since the early 1990s [1]. Yet it is only with the growth of the Internet and other high-bandwidth links that VR systems have increasingly become networked to allow users to share the same virtual environment (VE). Shared YEs raise a number of interesting questions: what is the difference between face-to-face interaction and interaction between persons inside YEs? How does the appearance of the avatar - as the graphical representation of the user has become known - change the nature of interaction? And what governs the formation of virtual communities? This volume brings together contributions from social scientists and computer scientists who have conducted research on social interaction in various types of YEs. Two previous volumes in this CSCW book series [2, 3] have examined related aspects of research on YEs - social navigation and collaboration - although they do not always deal with VRIVEs in the sense that it is used here (see the definition in Chapter 1). The aim of this volume is to explore how people interact with each other in computer-generated virtual worlds.

Responding to Call of Duty Nate Garrelts, Matthew Wilhelm Kapell, 2017-10-12 Call of Duty is one of the most culturally significant video game franchises of the 21st century. Since the first game was released for PC in 2003, the first-person shooter has sold over 250 million copies across a range of platforms, along with merchandise ranging from toys and comic books to a special edition Jeep Wrangler. Top players can compete for millions in prize money in tournaments sanctioned by the Call of Duty World League. While the gaming community has reported on and debated each development, Call of Duty has received little scholarly attention. This collection of new essays examines the ideologically charged campaign mode of major franchise releases, with a special focus on militarism, realism and gender.
