Challenges and Opportunities of Healthgrids Vicente Hernández,Ignacio Blanquer,2006 The contributions of this publication follow mainly five main topics: Medical Imaging on the Grid; Ethical, Legal and Privacy Issues on HealthGrids; Bioinformatics on the Grid; Knowledge Discovery on HealthGrids; and Medical Assessment and HealthGrid Applications. The maturity of the discipline of HealthGrids is clearly reflected on these subjects. There are more contributions related to two main application areas (Medical Imaging and Bioinformatics), confirming the analysis of the HealthGrid White Paper published last year, which outlined them as the two more promising areas for HealthGrids. Along with these two areas, the assessment on the results of HealthGrid applications, also focused by several contributions, denotes also the maturity of HealthGrids. Finally the other two areas (Knowledge Discovery and Ethical, Legal and Privacy Issues) focus on basic technologies which are very relevant for HealthGrids.

Immersion Education in the Early Years Tina Hickey,Anne-Marie de Mejía,2017-10-02 Worldwide, more parents are opting for immersion pre-schooling for their children in order to benefit from its linguistic, educational, and cultural benefits. This immersion can be either bilingual or monolingual, aimed at early second language learning, or at language maintenance – offering minority language children mother-tongue support and enrichment. This book examines some of the key issues and policy concerns relating to immersion education in the early years. The term itself can be difficult in some political contexts, as can the differing outcomes noted by studies comparing monolingual programmes, and bilingual programmes for minority language children. The importance of training in immersion methodology for educators is discussed, as is the need to adapt preschool pedagogical practices to the immersion context, in order to provide optimal input for young language learners. One of the most pressing discussions surrounds differentiated provision – ensuring that the varying needs of children with language impairment, typical second language learners, and mother-tongue speakers with significant socioeconomic or linguistic disadvantages are all met. Overall, the book explores the challenges currently facing the sector, particularly with regard to training and professional development for practitioners, and the provision of appropriate materials in less widely used languages. Given the documented benefit of high quality immersion pre-schooling, this book fulfils an urgent need to increase the recognition of the sector. This book was published as a special issue of International Journal of Bilingual Education and Bilingualism.
