Razvan Stoian, Jörn Bonse

The ideology of the extreme right Cas Mudde, 2013-07-19 This electronic version has been made available under a Creative Commons (BY-NC-ND) open access license. This book provides a comprehensive and detailed analysis of the five main parties of the extreme right in the Netherlands (Centrumdemocraten, Centropartij), Belgium (Vlaams Blok), and Germany (Die Republikaner, Deutsche Volksunion). Using primary research — including internal party documents — it concludes that rather than right-wing and extremist, the core ideology of these parties is xenophobic nationalist, including also a mix of law and order and welfare chauvinism. The author's research and conclusions have broader implications for the study of the extreme-right phenomenon and party ideology in general.

Old and Alone Jeremy Tunstall, 2024-05-10 What is it like to be an isolated old widow, living alone on the bare old-age pension? In the 1960s, the question had become a standard refrain. Originally published in 1966, this was the first full-length study by a sociologist of isolation in old age. Although the majority of old people were in no sense a problem group at the time, a substantial minority of the elderly were 'alone' in one or more ways. About 1.3 million people aged sixty-five and over in Britain lived alone; a large number admitted to feeling lonely, at least sometime. About a million were actually socially isolated in terms of low level and frequency of social contact. Mr Tunstall also uses a fourth category of aloneness – namely anomie (as developed by Durkheim, Merton, and Srole). This report uses careful and statistical analysis of the four types of aloneness and of specially affected groups such as the single, the recently widowed, and the housebound. But it also includes details of interviews with ten highly individual old people from suburban Harrow, booming Northampton, industrial revolution Oldham, and rural South Norfolk. The book contains a discussion of the problem of personality in isolation, and a commentary on the inadequacies of social theory about old age. Finally, the concluding chapter suggests a wide variety of policy measures which might help to alleviate social isolation in old age.

Ultrafast Laser Nanostructuring Razvan Stoian, Jörn Bonse, 2023-04-06 Bringing together contributions from leading experts in the field, this book reviews laser processing concepts that allow the structuring of material beyond optical limits, and methods that facilitate direct observation of the underlying mechanisms by exploring direct structuring and self-organization phenomena. The capacity to nanostructure material using ultrafast lasers lays the groundwork for the next generation of flexible and precise material processing tools. Rapid access to scales of 100 nm and below in two and three dimensions becomes a factor of paramount importance to engineer materials and to design innovative functions. To reflect the dynamic nature of the field at all levels from basic science to applications, the book is divided into three parts, Fundamental Processes, Concepts of Extreme Nanostructuring, and Applications, each of which is comprehensively covered. This book will be a useful resource for graduate students and researchers in laser processing, materials engineering, and nanoscience.
