Ubiquitous Computing and Ambient Intelligence Jose

Bravo,Diego López-de-Ipina,Francisco Moya,2012-11-28 This book constitutes the refereed proceedings of the 6th International Conference on Ubiquitous Computing and Ambient Intelligence,

UCAmI 2012, held in Vitoria-Gasteiz, Spain, in December 2012. The 70 research papers were carefully reviewed and selected from various submissions. The main focus of this book has been to explore how Ambient Intelligence can contribute towards smarter but still more sustainable environments. Beyond sustainable computing the proceedings also include research work describing progress on other key research topics for Aml such as human environment mobile-mediated (through NFC or AR) interaction, artificial intelligence techniques to foster user- and context-aware environment adaptation, future internet trends such as social networks analysis, linked data or crowd-sourcing applied to Aml, internet-connected object ecosystems collaborating to give place to smarter environments.

Work Smarter: Live Better Cyril Peupion, 2018-09-01 Most people have never been taught how to work. We are committed to our job and want to be good at what we do. We are neither lazy nor unwilling. But we do not always work effectively - we work hard but not always smart. To increase performance many people believe they need to do more. We spend less time with our loved ones, neglect our health and put our passions and hobbies on the back burner. And we end up frustrated, out of control and stressed. *Work Smarter: Live Better* will transform your life - learn simple and practical tools to be in control at work, learn how to gain an extra two hours per day, and learn how to make room for what is important to you! This journey will challenge your way of thinking about work. You will learn how to work smarter and more importantly, live better.

Geographic Information Systems: Concepts, Methodologies, Tools, and Applications Management

Association, Information Resources,2012-09-30 Developments in technologies have evolved in a much wider use of technology throughout science, government, and business; resulting in the expansion of geographic information systems. GIS is the academic study and practice of presenting geographical data through a system designed to capture, store, analyze, and manage geographic information. Geographic Information Systems: Concepts, Methodologies, Tools, and Applications is a collection of knowledge on the latest advancements and research of geographic information systems. This book aims to be useful for academics and practitioners involved in geographical data.

Intelligent Human Systems Integration Waldemar Karwowski,Tareq Ahram,2017-12-30 This book reports on research on innovative human systems integration and human-machine interaction, with an emphasis on artificial intelligence and automation, as well as computational modeling and simulation. It covers a wide range of applications in the area of design, construction and operation of products, systems and services, including lifecycle development and human-technology interaction. The book describes advanced methodologies and tools for evaluating and improving interface usability, new models, as well as case studies and best practices in virtual, augmented and mixed reality systems, with a special focus on dynamic environments. It also discusses different factors concerning the human, hardware, and artificial intelligence software. Based on the proceedings of the 1st International Conference on Intelligent Human Systems Integration (IHSI 2018), held on January 7-9, 2018, in Dubai, United Arab Emirates, the book also examines the forces that are currently shaping the nature of computing and cognitive systems, such as the need for decreasing hardware costs; the importance of infusing intelligence and automation, and the related trend toward hardware miniaturization and power reduction; the necessity for a better assimilation of computation in the environment; and the social concerns regarding access to

computers and systems for people with special needs. It offers a timely survey and a practice-oriented reference guide to policy- and decision-makers, human factors engineers, systems developers and users alike.

BIG Contacts Bob Walton, 2011-09-21 WITHOUT CUSTOMERS, YOUR BUSINESS HAS NOTHING - regardless of how good your product or service may be. For your small business to thrive over the long-term, you need to pay close attention to your biggest asset - your customers. The sobering reality is that the typical business will lose half of its customer base every five years. Bob Walton, founder of BigContacts [a web based CRM (Customer Relationship Management) software company], gives you the tools and techniques that will help you easily identify and evaluate how you manage each phase of the customer lifecycle. He then shares how to maximize your results in each phase; finding the right prospects, converting more of them to customers, and keeping them for life. CRM software is the single best tool for strengthening your customer relationships and can transform your business. Inside, you will find all you need to know to confidently research, review, and choose the CRM software that is right for your business. You'll learn to identify the features you need, the questions to ask, and the steps to take for success. Harness the power of technology and get on the right track for consistent and meaningful growth. The future of your business depends on it.
