A detailed report of contacts with human type aliens on the Adriatic coast, which answers many of our questions, this book is a milestone for ufologists wh study Contact. They were here and many look like us! It's time for disclosure. Paola Leopizzi Harris-Researcher and Author: Connecting the Dots; Making Sense of UFO Phenomena; Exopolitics: How Does One Speak to a Ball of Light? This book is a true milestone in the spreading of the reality of contacts between our humanity and extraterrestrials, both in the past and now; it gives rise to vital importants, hints in order to understand the epoch-making events that are waiting for us, and inteat with them in the best way. Tom Bosco-NEXUS Magazine-Edizione Italiana Eng. Stefani Breccia and I are friends, and have been responsible keepers of truths that not always were sharable with other people. Both of us have dedicated a significant part of our lives to UFO's, myself trying to spread this reality in the best way. Stefano trying to understand its roots, both being aware of how important the phenomenon is. And so I have acted as a midwife to the important result of Stefano's work, being convinced that reading this book is at the same time necessary and useful. Roberto Pinotti-Director, Centro Ufologico Nazionale (CUN), Italy This book, based upon memories of experiences covering a period of many years, is charming above all for it concerns the contact, first, and then the coexistence of humans and aliens, working toward a single goal. Paolo Di Girolama-Professor and writer.

Electric Contacts Ragnar Holm,2013-06-29 This book is a completely revised and rewritten edition of Electric Contacts Handbook published in 1958. A large number of new investigations are considered, and many of the basic theories are revised in detail and even in general. The body of information had to be limited as it was not advisable to increase the volume of the book. In particular, no attempt was made to cover all of the practical applications. They appear as examples following concentrated explanations of basic phenomena. As in several branches of technology, the solutions of problems arising in the field of electric contacts involve insight into various disciplines of physics. It is felt that reviews of some of those topics, especially adapted to electric contact phenomena, are welcome to many readers. For example, chapters have been devoted to the structure of carbon, the band theory of electric conduction in solids, certain problems in statistics, and the theory of the electric arc. As regards arc problems, new ideas have been introduced. In order to make the main text less cumbersome, such reviews are presented as appendices. Throughout this edition, the mksa-unit system is used in accord with the latest recommendation for standardization of units in scientific and technical writings. The chapter History of Early Investigations on Contacts forming Part IV in the preceding edition of 1958 has not been repeated in this book.
