Point of Contact Melanie Hansen,2018-03-01 Only love can heal an impossibly broken heart There'd forever been a thread running through Trevor Estes's life—his son, Riley, strong and constant like a heartbeat. But when Riley is killed in combat, everything in Trevor's life unravels into a mess he doesn't know how to mourn. Then Jesse Byrne, Riley's friend and platoon mate, arrives on Trevor's doorstep with a box of Riley's things. Jesse's all-too-familiar grief provides an unlikely source of comfort for Trevor: knowing he's not alone is exactly what he needs. Trevor never imagined he'd find someone who fills his heart with hope again. As the pair celebrate Riley's memory, their unique bond deepens into something irreplaceable—and something neither man can live without. But diving into a relationship can't be so simple. Being together means Trevor risking the last link he has to his son...leaving Jesse to wonder if he'll ever be enough, or if Trevor will always be haunted by the past. A former U.S. senator and defense contractor needs someone to look over the books of Dalfan Technologies, a Singapore company--quickly. He turns to Jack Ryan, Jr., and Paul Brown, two employees of one of the best financial analysis firms in the country, which also happens to be the cover for The Campus, a top secret American intelligence agency. Brown has no idea that Jack works for The Campus. Jack has no idea that the awkward accountant has been tasked with uploading a cyberwarfare program into the highly secure Dalfan Technologies mainframe on behalf of the CIA. On the verge of mission success, Brown discovers a game within the game, and the people who now want to kill him are as deadly as the cyclone bearing down on the island nation. Together Ryan and Brown race to escape both the dangerous storm and a team of trained assassins in order to prevent a global catastrophe, even at the cost of their own lives.

Managing Regional Energy Vulnerabilities in East Asia Daojiong Zha,2013-08-29
This book examines East Asia's inter-state collaborative energy projects to address energy vulnerability. It focuses on projects that have demonstrated effectiveness in addressing vulnerabilities faced by the ten states of the Association of Southeast Asian Nations and China, Japan, and South Korea in Northeast Asia. Including case studies on uncertainties in external sources of oil and gas supply, maritime piracy, continuation of energy poverty, and geographical barriers to cross-border electricity interconnection, expert contributors highlight how collaborative energy projects have been more successful than the traditional

state rivalry in energy-related issues. The book develops the framework of energy vulnerability, avoiding usual securitization approaches, instead examining non-traditional security conceptualizations in studying energy policies to examine how issue-specific cooperation efforts between states arise and develop. Using East Asia as a starting point, contributors introduce a framework that advances the study of international energy cooperation. Managing Regional Energy Vulnerabilities in East Asia will be of interest to students and scholars of Asian studies, sociology, development studies, and international political economy particularly the political economy of East Asia, energy and development studies, regional and global governance of energy and the environmental economics.
