Construction Business Management Nick B. Ganaway,2007-06-01 Only 43 per cent of U.S. construction

firms remain in business after four years. Why? Inadequate management, according to the U.S. Small Business Administration. This is surprising because most construction firms are formed by ambitious construction project managers, executives and tradesmen who have excelled at what they have been doing. But as experienced as these entrepreneurs may be, they are not likely prepared to take on the full range of responsibilities forced on them in managing the business of construction in its entirety. While this business failure rate and its causes are based on U.S. experience, available data from a number of other industrialized countries shows they are similar. This book describes in detail what the business side of the construction equation requires of the construction firm owner. The contractor who quickly learns these requirements can identify and avoid or manage around the pitfalls that cause the high failure rate in our industry and put his or her construction firm on a level playing field with the best-run companies in the business. The detailed duties of the owner, whether in the U.S., U.K., Australia or Canada, are a common theme throughout the book. The author, Nick Ganaway, speaks peer-to-peer, and the book is sprinkled with supporting examples from his own experience. He is immersed in the industry and this book is based on the things I've learned, used, and refined as a light-commercial general contractor in the course of starting and operating my own construction firm for 25 years. The contractor doing \$5 million or \$50 million or more in annual sales or the equivalent amount in other countries, or the entrepreneur who is just starting up, can use the tried and proven material in this book to build a business that is profitable, enjoyable, and enduring. Additionally, the book devotes a chapter to specializing in chain-store construction.

501 Contractor Tips Greg Vanden Berge, 2011-04-27 This book is full of my personal successes and failures as a contractor and construction worker. It hasn't always been easy and for the most part, I made it harder than it needed to be, but you don't need to. Why should you repeat the same mistakes I made years ago? I would've paid five hundred dollars or more for the information inside this book when I started. Heck, I probably would've paid \$1000 for the information inside this book, ten or fifteen years into my career. When I first started, I had problems dealing with my clients and other construction workers. After that, I had problems getting paid on time or getting paid period. Then I had to deal with the ultimate problem, either too much or not enough work. The challenges were often overwhelming and I can't tell you how many times... I wanted to quit. I had to make a change and those changes led me to learn more about construction, business and psychology. The more I learned, the easier my job became and this motivated me to start learning about other things, which eventually made my job even easier. If you don't believe, you need to Read to Succeed, you're going to remain stuck where you are...Forever! I was your average student in school who started a construction business at 25 years old, with less than \$1000 in the bank. Can You Believe That! It wasn't easy and I would have given practically anything to have the opportunity you have in front of you today. To benefit from the years of my experience ... and for under fifty bucks... Come on this one is a no brainer. Education is the key to success my friend, so let's get started on your journey towards a better life as a successful contractor money making machine and personal development junkie! Wishing You The Best, Greg Vanden Berge
