The 27 full papers presented were carefully reviewed and selected from 328 submissions. The papers cover the following key areas of e-business and telecommunications: data communication networking; e-business; optical communication systems; security and cryptography; signal processing and multimedia

applications; wireless information networks and systems.

The Uncertain Web Rob Larsen, 2014-12-10 What's the best way to develop for a Web gone wild? That's easy. Simply scrap the rules you've relied on all these years and embrace uncertainty as a core tenet of design. In this practical book, veteran developer Rob Larsen outlines the principles out what he calls The Uncertain Web, and shows you techniques necessary to successfully make the transition. By combining web standards, progressive enhancement, an iterative approach to design and development, and a desire to question the status quo, your team can create sites and applications that will perform well in a wide range of present and future devices. This guide points the way. Topics include: Navigating thousands of browser/device/OS combinations Focusing on optimal, not absolute solutions Feature detection, Modernizr, and polyfills RWD, mobile first, and progressive enhancement UIs that work with multiple user input modes Image optimization, SVG, and server-side options The horribly complex world of web video The Web we want to see in the future

Computers, Privacy and Data Protection: an Element of Choice Serge Gutwirth, Yves Pouillet, Paul De Hert, Ronald Leenes, 2011-02-26 This timely interdisciplinary work on current developments in ICT and privacy/data protection, coincides as it does with the rethinking of the Data Protection Directive, the contentious debates on data sharing with the USA (SWIFT, PNR) and the judicial and political resistance against data retention. The authors of the contributions focus on particular and pertinent issues from the perspective of their different disciplines which range from the legal through sociology, surveillance studies and technology assessment, to computer sciences. Such issues include cutting-edge developments in the field of cloud computing, ambient intelligence and PETs; data

retention, PNR-agreements, property in personal data and the right to personal identity; electronic road tolling, HIV-related information, criminal records and teenager's online conduct, to name but a few.

Whatever You Think Think the Opposite Paul Arden, 2006 Logic and common sense have a habit of leading us to the same conclusions. If you are going to make your mark on the world, you have to start thinking differently. To think differently, you have to think illogically. This book looks at life the wrong way, in a bid to explain the benefits of making wrong decisions.

Advances in Smalltalk Wolfgang De Meuter, 2007-05-31 This book constitutes the thoroughly refereed post-proceedings of the 14th International Smalltalk Conference, ISC 2006, held in Prague, Czech Republic in September 2006. Being a live forum on cutting edge software technologies, the conference attracted researchers and professionals from both academia and industry that produced papers covering topics from foundational issues to advanced applications.

ECAI 2006 G. Brewka, S. Coradeschi, A. Perini, 2006-08-10 In the summer of 1956, John McCarthy organized the famous Dartmouth Conference which is now commonly viewed as the founding event for the field of Artificial Intelligence. During the last 50 years, AI has seen a tremendous development and is now a well-established scientific discipline all over the world. Also in Europe AI is in excellent shape, as witnessed by the large number of high quality papers in this publication. In comparison with ECAI 2004, there's a strong increase in the relative number of submissions from Distributed AI / Agents and Cognitive Modelling. Knowledge Representation & Reasoning is traditionally strong in Europe and remains the

biggest area of ECAI-06. One reason the figures for Case-Based Reasoning are rather low is that much of the high quality work in this area has found its way into prestigious applications and is thus represented under the heading of PAIS.

Passive and Active Measurement Matthew Roughan, Chang Rocky, 2013-03-15 This book constitutes the refereed proceedings of the 14th International Conference on Passive and Active Measurement, PAM 2013, held in Hong Kong, China, in March 2013. The 24 revised full papers presented were carefully reviewed and selected from 74 submissions. The papers have been organized in the following topical sections: measurement design, experience and analysis; Internet wireless and mobility; performance measurement; protocol and application behavior; characterization of network usage; and network security and privacy. In addition, 9 poster abstracts have been included.

Software Reuse: Methods, Techniques, and Tools Jan Bosch, Charles Krueger, 2004-06-14 This book constitutes the refereed proceedings of the 8th International Conference on Software Reuse, ICSR-8, held in Madrid, Spain in July 2004. The 28 revised full papers presented were carefully reviewed and selected from numerous submissions. The papers are organized in topical sections on software variability: requirements; testing reusable software; feature modeling; aspect-oriented software development; component and service development; code level reuse; libraries, classification, and retrieval; model-based approaches; transformation and generation; and requirements.

Give Your Marketing a Digital Edge - A 10-Book Bundle Special Edition Gabriela Taylor, 2013-10-06 She has done the hard work of evaluating and learning how to use all the different online sites and tools that can help your business soar, and she has combined

that knowledge into Give Your Marketing a Digital Edge, an inexpensive 10 titles in two books that you'll refer to again and again. Here's what the Give Your Marketing a Digital Edge includes: Budget Marketing - How to Start & Market an Online Business with Little or Zero Marketing Budget: why pay for online tools when there are fantastic free ones available that will help your business for absolutely nothing? Targeting Your Market - Marketing Across Generations, Cultures & Gender: marketing by demographics can be as simple as not advertising baby diapers on a site aimed at Baby Boomers. But the truth is there's a lot more to know if you want to maximize business success and avoid blunders. Plan, Create, Optimize, Distribute - Your Strategic Roadmap to Content Marketing Success: by mastering content marketing, you can connect with customers on a personal level, build a relationship, call your audience to action, and provide a platform for customer feedback. Google Best Practices - How to Build and Market Your Business with Google: YouTube, Google+, Google+ Local, Google News, Google SEO, AdWords, AdSense, etc. - this book tells you how you can make money using everything Google has to offer. Socialize to Monetize - How To Run Effective Social Media Campaigns across the Top 25 Social Networking Sites: by mastering content marketing, you can connect with customers on a personal level, build a relationship, call your audience to action, and provide a platform for customer feedback. Pinterest Marketing - The Ultimate Guide: if your customers are on Pinterest, you need to be there too! Leverage the power of visual marketing with one of the best tools ever invented to increase sales for your business. Tumblr for Business - The Ultimate Guide: learn how to use Tumblr to showcase your brand to a worldwide audience, create social buzz, and take your business to the next level. Advertising in a Digital Age -

Best Practices for AdWords and Social Media Advertising: learn how to use online advertising to reach more people, interact with your community, collect feedback and monitor results in real-time, adjust your advertising quickly, and target and retarget your messages for relevancy all on a tiny budget. Mobilize to Monetize - The Fast Track to Effective Mobile Marketing: when you use mobile technology to promote a brand and its products and services anytime, from anywhere, you can target your messages based on information you already have and engage your customers directly. Globalize to Monetize - Taking Your Online Business to New Markets: marketing globally requires cultural understanding and overcoming barriers of language and culture are crucial to successfully market globally.

Advances in Networked-Based Information Systems Leonard Barolli, Hsing-Chung Chen, Tomoya Enokido, 2021-08-07 This book provides the latest research findings, innovative research results, methods and development techniques from both theoretical and practical perspectives related to the emerging areas of information networking and their applications. The networks and information systems of today are evolving rapidly. There are new trends and applications in information networking such as wireless sensor networks, ad hoc networks, peer-to-peer systems, vehicular networks, opportunistic networks, grid and cloud computing, pervasive and ubiquitous computing, multimedia systems, security, multi-agent systems, high-speed networks, and web-based systems. These kinds of networks need to manage the increasing number of users, provide support for different services, guarantee the QoS, and optimize the network resources. For these

networks, there are many research issues and challenges that should be considered and find solutions.

Civil Rights and Liberties in the 21st Century John C. Domino, 2018-04-19 This up-to-date analysis of the Supreme Court's landmark rulings on civil rights and liberties is a discussion of the facts, legal issues, and constitutional questions surrounding those rulings. Domino's book serves as either a core text in courses on civil liberties and civil rights, or as a supplementary text in courses on constitutional law and the judiciary. The book is written in the belief that the key to understanding constitutional law is not having the right answers but asking the right questions. It encourages students to be critical thinkers and provides a historical context so students can better understand competing social, legal, and political interests affecting the Supreme Court's decisions today. The text also includes numerous short excerpts from some of the more influential, eloquent, and controversial Supreme Court opinions to illustrate the handiwork of the powerful legal minds who have helped to shape our society. It reminds us that the Court is not an abstract legal mechanism, but rather a group of human beings with divergent opinions. New to the Fourth Edition Up-to-date discussion of recent rulings, from the standpoint of the Court as a Cultural Tribunal, including: freedom of expression, including hate speech and the historic Citizens United case on campaign finance freedom of religion, including prayer during public meetings and the controversial Hobby Lobby case on corporate religious belief social issues, including reproductive rights & abortion and the landmark Obergefell case on same-sex marriage New section on obscenity and the First Amendment, including discussion of Internet pornography Expanded discussion of the use of GPS and thermal scanning technology by law enforcement and issues surrounding mobile phone privacy The nomination and confirmation politics surrounding the death of Antonin Scalia, the failed nomination of

Merrick Garland, and the confirmation of Trump appointee Neil Gorsuch Analysis and comparison of the Roberts Court to the Rehnquist, Burger, and Warren Courts, revisiting the question of counterrevolution that set the theme for previous editions

Successful OSS Project Design and Implementation Hind Benbya,Dr Nassim Belbaly,2012-09-28 The open source phenomenon has attracted an increased interest among commercial firms and governments. It is becoming one of the most influential paradigm shifts not only in software development but in social and economic value creation as well. While software development is perhaps the most prominent example of open source, its principles have now been applied across a wide range of product classes, industries and even scientific disciplines. Decision makers at different levels and in a variety of fields need to improve their understanding of the factors that contribute to the Open Source Software (OSS) effectiveness: approaches, tools, social designs, reward structures and metrics. Successful OSS Project Design and Implementation provides a state-of-the-art analysis of OSS design principles, their emergence and success and how they are extending well beyond the domain of software.

Virtual, Augmented and Mixed Reality: Interaction, Navigation, Visualization, Embodiment, and Simulation Jessie Y.C. Chen, Gino Fragomeni, 2018-07-10 This two-volume set LNCS 10909 and 10910 constitutes the refereed proceedings of the 10th International Conference on Virtual, Augmented and Mixed Reality, VAMR 2018, held as part of HCI International 2018 in Las Vegas, NV, USA. The 65 papers presented in this volume were organized in topical sections named: interaction, navigation, and visualization in VAMR; embodiment, communication, and collaboration in VAMR; education, training, and simulation; VAMR in psychotherapy, exercising, and health; virtual reality for cultural heritage, entertainment, and games; industrial and military applications.

Apple Training Series Robert Kite Ph.D., Michele Hjorleifsson, Patrick Gallagher, 2010-03-08 The follow-on to Apple Training Series: Mac OS X Deployment v10.6 and Apple Training Series: Mac OS X Directory Services v10.6, this volume takes an in-depth look at the many options provided to administrators to secure access to intranet services. System administrators and other IT professionals will learn how to configure Mac OS X Server v10.6 to provide secure access to vital network services such as web, mail, and calendar from mobile devices such as the iPhone. The Providing Network Services section covers establishing critical network services such as DNS, DHCP, and NAT/Gateway services. Systems & Services focuses on connecting private and public networks securely using firewalls, certificates and VPNs. Finally, the Working with Mobile Devices section teaches students how to successfully configure Snow Leopard Server's Mobile Access

Server and securely deploy intranet services such as web, mail, and calendar services to mobile devices, such as the iPhone, without the need for VPN services.
