Education Reform and Education Policy in East Asia Ka-ho Mok,2006-06-28 This book assesses the impact of globalization on the education systems of key East Asian countries, including China, Hong Kong, Japan, and the tiger economies of South Korea, Taiwan and Singapore, examining how the increasingly interdependent economic system has driven policy change and education reform. It discusses how policy makers have responded to changes required in educational outcomes in order to equip their societies for new global conditions and explores the impact of new approaches and ideologies related to globalization, such as marketization, privatization, governance changes, managerialism, economic rationalism and neo-liberalism, making comparisons across the region. Based upon in-depth research, fieldwork, literature analysis, policy document analysis and personal reflections of academics serving in the education sector, this volume recounts heated debates about the pros and cons of education restructuring in East Asia. The discussions on national responses and coping strategies in this volume offer highly relevant insights on how globalization has resulted in restructuring and draws lessons from comparative public policy analysis and comparative education studies.

A Fascinating Country in the World of Computing Larry Wos,Gail W

Pieper,1999-11-30 This book shows you — through examples and puzzles and intriguing questions — how to make your computer reason logically. To help you, the book includes a CD-ROM with OTTER, the world's most powerful general-purpose reasoning program. The automation of reasoning has advanced markedly in the past few decades, and this book discusses some of the remarkable successes that automated reasoning programs have had in tackling challenging problems in mathematics, logic, program verification, and circuit design. Because the intended audience includes students and teachers, the book provides many exercises (with hints and also answers), as well as tutorial chapters that gently introduce readers to the field of logic and to automated reasoning in general. For more advanced researchers, the book presents challenging questions, many of which are still unsolved. Contents:The Menu, The Map, and the MagicLearning Logic by ExampleAutomated Reasoning in FullLogic Circuit DesignLogic Circuit ValidationResearch in MathematicsResearch in Formal LogicThe Formal Treatment of Automated ReasoningWos's Biased Guide for the Effective Use of OTTERAn Author's Appraisal of His PapersOpen Questions, Hard Problems, Intriguing ChallengesEpilogue and After-Dinner Liqueur Readership: College students, teachers, researchers and historians of computer science.
