Eco-Architecture V C.A. Brebbia,R. Pulselli,2014-09-24 This book contains the proceedings of the fifth International Conference on Harmonisation between Architecture and Nature (Eco-Architecture 2014). Eco-Architecture implies a new approach to the design process intended to harmonise its products with nature. This involves ideas such as minimum use of energy at each stage of the building process, taking into account the amount required during the extraction and transportation of materials, their fabrication, assembly, building erection, maintenance and eventual future recycling. Another important issue is the adaptation of the architectural design to the natural environment, learning from nature and long time honoured samples of traditional constructions. The papers in this book deal with topics such as building technologies, design by passive systems,

design with nature, cultural sensitivity, life cycle assessment, resources and rehabilitation and many others. Also included are case studies from many different places around the world. Eco-Architecture by definition is a highly multi-disciplinary subject. Eco-Architecture V: Harmonisation between Architecture and Nature will therefore be of interest to, in addition to architects, many other professionals, including engineers, planners, physical scientists, sociologists and economists. Topics covered include: Design with nature; Energy efficiency; Building technologies; Ecological impacts of materials; Bioclimatic design; Water quality; Green facades; Ecological and cultural sensitivity; Education and training; Case studies; Design by passive systems; Adapted reuse; Life cycle assessment and durability; Transformative design; Sustainability indices in architecture.

Belarus International Monetary Fund, 1997-11-17 This paper reviews economic developments in the Republic of Belarus during the 1990s. In late 1994 and early 1995, the Belarusian authorities took major steps to further liberalize the economy and bring down inflation from the high levels of 1993-94. By the second half of 1995, however, macroeconomic policies began to be relaxed and structural reform came to a virtual standstill. The relaxation of monetary policy was accompanied by an exchange rate policy in 1996, which caused the Belarusian currency to continue to appreciate significantly against the U.S. dollar.

Nature in Literary and Cultural Studies Catrin Gersdorf, Sylvia Mayer, 2006 Nature in Literary and Cultural Studies is a collection of essays written by European and North American scholars who argue that nature and culture can no longer be thought of in oppositional, mutually exclusive terms. They are united in an effort to push the theoretical limits of ecocriticism towards a more rigorous investigation of nature's critical potential as a concept that challenges modern culture's philosophical assumptions, epistemological convictions, aesthetic principles, and ethical imperatives. This volume offers scholars and students of literature, culture, history, philosophy, and linguistics new insights into the ongoing transformation of ecocriticism into an innovative force in international and interdisciplinary literary and cultural studies.

Smartcities, Resilient Landscapes and Eco-Warriors CJ Lim,Ed Liu,2019-04-16 Following on from the success of the first edition, Smartcities + Eco-Warriors (2010), this book is the latest innovative response on urban resilience from one of the world's leading urban design and architectural thinkers. An ecological symbiosis between nature, society and the built form, the Smartcity cultivates new spatial practices and creates diverse forms of resilient landscapes including and beyond urban agriculture. The notion of the Smartcity is developed through a series of international case studies, some commissioned by government organisations, others speculative and polemic. This second edition has nine new case studies, and additional ecological sustainability studies covering sensitivity, design criteria, and assessments for ecological construction plans. The book concludes with two new essays on the romance of trees and the empowering nature of resilient landscapes. Smartcities, Resilient Landscapes + Eco-warriors represents a crucial voice in the discourse of climate change and the potential opportunities to improve the ecological function of existing habitats or create new landscapes which are considered beneficial to local ecology and resilience. It is indispensable reading for practitioners and students in the fields of landscape, urban design, architecture and environmental engineering. An inspiration to government agencies and NGOs dealing with sustainability, this work also resonates with anyone concerned about cities, landscapes, food and water security, and energy conservation.
