Hungry City Carolyn Steel, 2013-01-31 'Cities cover just 2% of the world's surface, but consume 75% of the world's resources'. The relationship between food and cities is fundamental to our everyday lives. Food shapes cities and through them it moulds us - along with the countryside that feeds us. Yet few of us are conscious of the process and we rarely stop to wonder how food reaches our plates. *Hungry City* examines the way in which modern food production has damaged the balance of human existence, and reveals that we have yet to resolve a centuries-old dilemma - one which holds the key to a host of current problems, from obesity and the inexorable rise of the supermarkets, to the destruction of the natural world. Original, inspiring and written with infectious enthusiasm and belief, *Hungry City* illuminates an issue that is fundamental to us all.
