Conservation of Architectural Heritage Antonella
Versaci,Hocine Bougdah,Natsuko Akagawa,Nicola
Cavalagli,2022-03-01 This book focuses on the
management and conservation of architectural
heritage with the aim of increasing awareness
about the value of such conservation and of saving
what is left of history, which in turn rewards
societies by supporting the tourism industry,
generating economic return, and preserving
communities' identities. Since it has become an
essential need to manage and conserve the
architectural heritage in order to protect the
identity and heritage of a city, there appeared a
gap between the theory and its application.
Therefore, a considerable amount of attention has
been directed by experts in this field toward
emphasizing the contribution of heritage
conservation in order to inspire the development
of imaginative, useful high-quality design.

The Upstarts Brad Stone, 2017-01-31 ONE OF AMAZON'S BEST BOOKS OF 2017 A look deep inside the new Silicon Valley, from the New York Times bestselling author of The Everything Store Ten years ago, the idea of getting into a stranger's car, or a walking into a stranger's home, would have seemed bizarre and dangerous, but today it's as common as ordering a book online. Uber and Airbnb have ushered in a new era: redefining neighborhoods, challenging the way governments

regulate business, and changing the way we travel. In the spirit of iconic Silicon Valley renegades like Steve Jobs and Bill Gates, another generation of entrepreneurs is using technology to upend convention and disrupt entire industries. These are the upstarts, idiosyncratic founders with limitless drive and an abundance of self-confidence. Led by such visionaries as Travis Kalanick of Uber and Brian Chesky of Airbnb, they are rewriting the rules of business and often sidestepping serious ethical and legal obstacles in the process. The Upstarts is the definitive story of two new titans of business and a dawning age of tenacity, conflict and wealth. In Brad Stone's riveting account of the most radical companies of the new Silicon Valley, we discover how it all happened and what it took to change the world.

World Employment and Social Outlook

INTERNATIONAL LABOUR OFFICE.,2021-06-02 This year's World Employment and Social Outlook: Trends examines global and regional trends in employment, unemployment, labour force participation and productivity, as well as dimensions of job quality such as employment status, informal employment and working poverty. It also provides extensive analysis of the crisis's varied impact on enterprises and workers. The report forecasts that employment recovery, though strong, will be insufficient to close the gaps. Workers whose labour market position was disadvantageous prior to the crisis - women, young people, migrants, informal workers and workers in lower-skilled occupations - suffered disproportionately. The

report proposes a human-centred recovery strategy to avoid scarring of global labour markets for the years to come.

The Urban Rail Development Handbook Daniel Pulido, Georges Darido, Ramon Munoz-Raskin, Joanna Moody, 2018-09-11 Cities across the globe are looking to develop affordable, environmentally friendly, and socially responsible transportation solutions that can meet the accessibility needs of expanding metropolitan populations and support future economic and urban development. When appropriately planned and properly implemented as part of a larger public transportation network, urban rail systems can provide rapid mobility and vital access to city centers from surrounding districts. High-performing urban rail services, when carefully approached as development projects, can help enhance quality of life by giving citizens access to employment opportunities, essential services, urban amenities, and neighboring communities. The purpose of this Handbook is to synthesize and disseminate knowledge to inform the planning, implementation, and operations of urban rail projects with a view towards: -- Emphasizing the need for early studies and project planning; -- Making projects more sustainable (economically, socially, and environmentally); -- Improving socioeconomic returns and access to opportunities for users; -- Maximizing the value of private participation, where appropriate; and -- Building capacity within project implementing and managing institutions This Handbook provides experiential advice to tackle the technical, institutional, and financial

challenges faced by decision makers considering urban rail projects. It brings together the expertise of World Bank staff and the input of numerous specialists to synthesize international 'good practices' and recommendations that are independent of commercial, financial political, or other interests. The material presented is intended as an honest-broker guide to maximize the impact and manage the challenges of urban rail systems in cities in both developed and developing countries. Rather than identify a single approach, this Handbook acknowledges the complexities and context necessary when approaching an urban rail development by helping to prepare decision makers to ask the right questions, consider the key issues, perform the necessary studies, apply adequate tools, and learn from international good practice all at the right time in the project development process.

Hospital-Based Health Technology Assessment
Laura Sampietro-Colom, Janet Martin, 2017-01-23 A timely work describing how localized hospital-based health technology assessment (HB-HTA) complements general, 'arms-length' HTA agency efforts, and what has been the collective global impact of HB-HTA across the globe. While HB-HTA has gained significant momentum over the past few years, expertise in the field, and information on

the operation and organization of HB-HTA, has been scattered. This book serves to bring this information together to inform those who are currently working in the field of HTA at the hospital, regional, national or global level. In addition, this book is intended for decision-makers and policy-makers with a stake in determining the uptake and decommissioning of new and established technologies in the hospital setting. HTA has traditionally been performed at the National/Regional level by HTA Agencies, typically linked to governments. Yet hospitals are the main entry door for most health technologies (HTs). Hospital decision-makers must undertake multiple high stakes investment and disinvestment decisions annually for innovative HTs, usually without adequate information. Despite the existence of arms-length HTA Agencies, inadequate information is available to hospital decision-makers either because relevant HTA reports are not yet released at the time of entry of new technologies to the field, or because even when the report exists, the information contained is insufficient to clarify the contextualized informational needs of hospital decision makers. Therefore, there has recently been a rising trend toward hospital-based HTA units and programs. These units/programs complement the work of National/Regional HTA Agencies by providing the key and relevant evidence needed by hospital decision makers in their specific hospital context, and within required decision-making timelines. The emergence of HB-HTA is creating a comprehensive HTA ecosystem across health care

levels, which creates better bridges for knowledge translation through relevance and timeliness.

Walk Wit' Me... Helena Martin, 2011-12-16 My memoir is laced with nostalgia and at the same time it is my sincere intention to portray the true essence of the Guyanese culture without offence. Keep in mind that this is not based on the experience of every Guyanese. This was the way I saw and experienced things back then. The use of colloquialism is of utmost importance; it is the vernacular we understand. It may sound like another language so unless you were born and bred in Guyana you will need to refer to the glossary provided. Folklore and mothers preaching life lessons through proverbs played a large part in Guyanese life. This is not only an account of the first twenty-one years of my life in Guyana; it also contains anecdotes of visits back to my homeland. You will also find a sprinkling of information pertaining to my new life in Australia. Before immigrating to Australia I believed the sun only rose and set in Guyana; I never imagined another paradise existed on the planet. There is a saying that most Guyanese use to identify their roots after they have voluntarily immigrated or simply fled to another country. When we say, "My navel string is buried in Guyana," we simply mean: 'My roots are there'. It's a place where true and enduring friendships were formed forever. We will meet one another decades later and feel as if it was yesterday, reminiscing about our beloved land; lapsing into the language only a fellow Guyanese can understand. A famous Australian crooner said "I

still call Australia home,” and I can assure you that saying applies to Guyanese who have immigrated to every corner of the globe. Navigating the labyrinth of family secrets was my one mission in life; I just had to know.

Alternatives to Privatization David A. McDonald, Greg Ruiters, 2012-04-23 There is a vast literature for and against privatizing public services. Those who are against privatization are often confronted with the objection that they present no alternative. This book takes up that challenge by establishing theoretical models for what does (and does not) constitute an alternative to privatization, and what might make them ‘successful’, backed up by a comprehensive set of empirical data on public services initiatives in over 40 countries. This is the first such global survey of its kind, providing a rigorous and robust platform for evaluating different alternatives and allowing for comparisons across regions and sectors. The book helps to conceptualize and evaluate what has become an important and widespread movement for better public services in the global South. The contributors explore historical, existing and proposed non-commercialized alternatives for primary health, water/sanitation and electricity. The objectives of the research have been to develop conceptual and methodological frameworks for identifying and analyzing alternatives to privatization, and testing these models against actually existing alternatives on the ground in Asia, Africa and Latin America. Information of this type is urgently required for practitioners

and analysts, both of whom are seeking reliable knowledge on what kind of public models work, how transferable they are from one place to another and what their main strengths and weaknesses are.
