hierarchies that ignore the way people naturally connect. By embracing a living-systems approach to organizing, impact networks bring people together to build relationships across boundaries; leverage the existing work, skills, and motivations of the group; and make progress amid unpredictable and ever-changing conditions. As a powerful and flexible organizing system that can span regions, organizations, and silos of all kinds, impact networks underlie some of the most impressive and large-scale efforts to create change across the globe. David Ehrlichman draws on his experience as a network builder; interviews with dozens of network leaders; and insights from the fields of network science, community building, and systems thinking to provide a clear process for creating and developing impact networks. Given the increasing complexity of our society and the issues we face, our ability to form, grow, and work through networks has never been more essential.

**40 Days of Dating** Timothy Goodman, Jessica Walsh, 2015-01-20 “What would happen if Harry met Sally in the age of Tinder and Snapchat? . . . A field guide to Millennial dating in New York City” (New York Daily News). When New York-based graphic designers and long-time friends Timothy Goodman and Jessica Walsh found themselves single at the same time, they decided to try an experiment. The old adage says that it takes forty days to change a habit—could the same be said for love? So they agreed to date each other for forty days, record their experiences in questionnaires, photographs, videos, texts, and artworks, and post the material on a website they would create for this purpose. What began as a small experiment between two friends became an Internet sensation, drawing five million unique (and obsessed) visitors from around the globe to their site and their story. 40 Days of Dating: An Experiment is a beautifully designed, expanded look at the experiment and the results, including a great deal of material that never made it onto the site, such as who they were as friends and individuals before the forty days and who they have become since.

**Everything for Everyone** Nathan Schneider, 2018-09-11 The origins of the next radical economy is rooted in a tradition that has empowered people for centuries and is now making a comeback. A new feudalism is on the rise. While monopolistic corporations feed their spoils to the rich, more and more of us are expected to live gig to gig. But, as Nathan Schneider shows, an alternative to the robber-baron economy is hiding in plain sight; we just need to know where to look. Cooperatives are jointly owned, democratically controlled enterprises that advance the economic, social, and cultural interests of their members. They often emerge during moments of crisis not unlike our own, putting people in charge of the workplaces, credit unions, grocery stores, healthcare, and utilities they depend on. Everything for Everyone chronicles this revolution--from taxi cooperatives keeping Uber at bay, to an outspoken mayor transforming his city in the Deep South, to a fugitive building a fairer version of Bitcoin, to the rural electric co-op members who are propelling an aging system into the future. As these pioneers show, co-ops are helping us rediscover our capacity for creative, powerful, and fair democracy.

**What Tech Calls Thinking** Adrian Daub, 2020-10-13 A New York Times Book Review Editors' Choice In Daub's hands the founding concepts of Silicon Valley don't make money; they fall apart. --The New York Times Book Review From FSGO x Logic: a Stanford professor's spirited dismantling of Silicon Valley's intellectual origins Adrian Daub's What Tech Calls Thinking is a lively dismantling of the ideas that form the intellectual bedrock of Silicon Valley. Equally important to Silicon Valley's world-altering innovation are the language and ideas it uses to explain and justify itself. And often, those fancy new ideas are simply old motifs playing dress-up in a hoodie. From the myth of dropping out to the war cry of “disruption,” Daub locates the Valley's supposedly original, radical thinking in the ideas of Heidegger and Ayn Rand, the New Age Esalen Foundation in Big Sur, and American traditions from the tent revival to predestination. Written with verve and imagination, What Tech Calls Thinking is an intellectual refutation of Silicon Valley's ethos, pulling back the curtain on the self-aggrandizing myths the Valley tells about itself. FSG Originals x Logic dissects the way technology functions in everyday lives. The titans of Silicon Valley, for all their utopian imaginings, never really had our best interests at heart: recent threats to democracy, truth, privacy, and safety, as a result of tech's reckless pursuit of progress, have shown as much. We present an alternate story, one that delights in capturing technology in all its contradictions and innovation, across borders and socioeconomic divisions, from history through the future, beyond platitudes and PR hype, and past doom and gloom. Our collaboration features four brief but provocative forays into the tech industry's many worlds, and aspires to incite fresh conversations about technology focused on nuanced and accessible explorations of the emerging tools that reorganize and redefine life today.
