The Pilot's Guide To Low Time Flying Jobs: Bridging The Gap Between 250 And 1,500 Hours Michael Carlini,2022-07-01 Find a job. Get hired. Get paid. No CFI? No problem! Becoming a competitive candidate for low time flying jobs and successfully navigating the next 1,000 hours of your career requires knowledge and a set of soft and hard skills that commercial pilot training programs omit from their teach-to-the-test curriculum. The Pilot's Guide To Low Time Flying Jobs fills these holes and aids low time commercial pilots in all aspects of bridging the tedious gap between their commercial checkride and the 1,500 hour ATP milestone. This guide will teach you: • How to overcome the obstacles to employment you face as a low time pilot • What jobs are available, their minimum experience requirements, typical schedule, compensation, applicable regulations and flight techniques • Where to search for jobs, as well as a list of nearly 70, non-CFI, low time pilot employers across the US to whom you can apply • Networking techniques, with real examples of successful strategies that you can replicate • How to create the most effective pilot-specific resume and cover letter, with samples of each • The most critical information to study when preparing to begin a new job or fly a new aircraft, as well as the most effective methods of self-studying • Professional pilot techniques, tips, and knowledge, including flight planning considerations, performance and weather so that you can take your airmanship to the next level • How to deal with the seldom-discussed but most significant challenges faced by professional pilots, including external pressure imposed by employers and crew members, imposter syndrome, and mental health Corporate jet pilot and flight instructor Michael Carlini has condensed 10 years and 2,000 flight hours of experience into a few hundred pages that can be consumed in a matter of hours, giving you a detailed, actionable, and proven guide to getting hired as a low time commercial pilot.

Checkride Jerry Girard,2011-10-26 This book covers a span of over fifty years in aviation. From hand started light airplanes, flying off grass strips to wide bodied jets spanning the continents, from the CAA to the FAA and from regulation to de-regulation. Told from the viewpoint of a green kid hanging around the local airport to a veteran major airline Captain

Safety Last Brian Power-Waters,2001 *THIS IS THE REPUBLISHED VERSION. THE ORIGINAL VERSION WAS PUBLISHED IN 1972. THIS VERSION DOES NOT CONTAIN ADDITIONAL OR NEW INFORMATION. The author of this eye-opening expose is a scheduled jet airline captain, as well as a fighter pilot in the Air Force Reserve, with twenty years of professional flying experience. Writing from the standpoint of a view of a pilot, he covers every aspect of commercial aviation and brings the reader to the conclusion that it is a much more perilous means of transportation than generally suspected. You will learn how poorly equipped most of our airports are; how the airlines write their own safety regulations and then succeed in evading even those requirements. You will find out what goes on on the flight deck and the dangers inherent in even the most routine shuttle flights. The author examines crash investigations, he take you on spine-tingling reconstructions of disasters you probably read about, and he reveals the often shocking truth of what really went wrong as opposed to what you may have read in the papers. ***** Safety Last by Captain Brian Power-Waters courageously describes real life in the airline industry and sounds the alarm for urgently needed reforms. It documents the abysmal performance of the Federal Aviation Administration in enforcing air safety standards and the shocking insensitivity of many airline officials. This book should be read by any airline passenger, executive, regulator or legislator who is concerned about protecting human life and safety in air travel. Reuben Robertson III, Director of the Aviation Consumer Action Project and Aide to Ralph Nader ***** Captain Power-Waters unloads his list of complaints against commercial aviation without hedging and draws a frightening picture of chaos, carelessness and petty internecine warfare within the industry. The literate air traveler who gets his hands on this book may want to swear off forever. . . . Captain Power-Waters hits with authority. Publishers Weekly ***** Fortunately, most of the flying public is unaware that many in airline management place a greater emphasis on making profits than on adhering to safety regulations. I compliment you on providing us with a damn fine insight into many of the problems which have been either overlooked or purposely evaded. I strongly concur in your book's closing observation that the real key to airline safety must be through a better utilization of the expertise of the pilot and the controller, who know flying best. These men are indebted to you for your daring to buck the tide, and call it as you see it. From a letter to Captain Power-Waters from John F. Leyden, President, Professional Air Traffic Controllers Organization ***** Safety Last is a fascinating and sobering journey into the realities of commercial aviation. It vividly describes the hazards of non-professionalism in our industry. The reader will also see the critical importance of professional aircraft maintenance along with the need for a more imaginative and aggressive FAA establishment. . . . Captain Power-Waters has courageously assailed the FAA-approved Minimum Equipment List and exposed it for what it is . . . a killer of airline passengers. James Douglas Sparling, Director, Safety and Standards, Aircraft Mechanics Fraternal Association Safety Last was originally published in 1972, there are no new updates in this version.
