Klasse!.: Students' book Corinna Schicker,Sheila Brighten,2000 The Klasse! series offers clearly structured double-page spreads with frequent objectives to give students attainable goals and a good sense of progress. It also offers clear presentation of grammar in the context of the unit topics; a focus on study skills to help students develop essential learning strategies; differentiation through Extra! sections; and Projekt pages which provide opportunities for individual and team work on projects. Regular pronunciation practice and opportunities for ICT are also provided, and Klasse! incorporates the Neue Rechtschreibung so students learn the new spellings from scratch. The series is supported by a free photocopiable booklet to anticipate the

transition to the euro in 2002.

International Law of Underwater Cultural Heritage Kim Browne, Murray Raff, 2023-01-01 This book brings together three distinct areas of International Law - namely Environmental, Heritage and Ocean Law - to address the international legal protection of historically significant wrecks, with particular focus on the environmental hazards they may pose. The confluence of Heritage Law and the Law of the Sea with International Environmental Law represents an important development in international governance strategies for the twenty-first century, in particular those legal and administrative regimes that concern the world's oceans and underwater cultural heritage protection. Importantly, connections between international legal regimes, such as the 1982 Law of the Sea, and institutions like the International Maritime Organisation (IMO) and United Nations Education Scientific Cultural Organisation (UNESCO), can play a crucial part in governance strategies that involve the regulation of marine pollution and historic shipwrecks.
