Chickenhawk Robert Mason,2005-03-29 A true, bestselling story from the battlefield that faithfully portrays the horror, the madness, and the trauma of the Vietnam War More than half a million copies of Chickenhawk have been sold since it was first published in 1983. Now with a new afterword by the author and photographs taken by him during the conflict, this straight-from-the-shoulder account tells the electrifying truth about the helicopter war in Vietnam. This is Robert Mason’s astounding personal story of men at war. A veteran of more than one thousand combat missions, Mason gives staggering descriptions that cut to the heart of the combat experience: the fear and belligerence, the quiet insights and raging madness, the lasting friendships and sudden death—the extreme emotions of a chickenhawk in constant danger. Very simply the best book so far about Vietnam. -St. Louis Post-Dispatch

Effect on Helicopter Performance of Modifications in Profile-Drag Characteristics of Rotor-Blade Airfoil Sections (Classic Reprint) F. B. Gustafson,2018-08-26 Excerpt from Effect on Helicopter Performance of Modifications in Profile-Drag Characteristics of Rotor-Blade Airfoil Sections Performance calculations are presented for a typical helicopter rotor in which three types of airfoil section were successively used. The types represented are the rough conventional, the smooth conventional, and the laminar - flow or low-drag sections as developed for heli copter use. The performance items covered are rotor thrust for fixed power in hovering, range and endurance at cruising speed, and power required at a relatively high forward speed. Contours showing the conditions of operation encountered by the blade section and weighting curves showing the relative importance of the various section angles of attack for specified flight conditions are included as an aid in the interpretation of the results. Tales of a Helicopter Pilot Richard C. Kirkland,2013-04-09 Richard Kirkland is legendary for his P-38 Lightning missions in the South Pacific theater during WWII. After the war, he realized the potential of Igor Sikorsky’s new flying machine, and he traded in his fighter-pilot wings for rotors. The nerve-racking chopper missions he has flown are the stuff of legend: scrambling to evacuate president Harry Truman after an unthinkable “code red one” alert comes over his red phone; bantering with the real “Hawkeye” at a MASH unit before flying into North Korea to rescue wounded soldiers. Equally riveting are his accounts of a medevac pilot in Vietnam who lands a ten ton CH-46 “Frog” in the jungle at night, with no lights, under fire, with only a soldier’s cigarette lighter for reference; and an aerial tour pilot who routinely pulls people out of the water above, below, and right before Niagara Falls.

Learn about the different kinds of military helicopters from the men and women who use them every day.

A virtual flying lesson and scientific adventure tale, The God Machine is more than the history of an invention; it is a journey into the minds of imaginative thinkers and a fascinating look at the ways they changed our world.
