Ed Darack

How the Helicopter Changed Modern Warfare Walter Boyne,2011-03-04 The helicopter was introduced to warfare during World War II. Since then, it has had a profound effect at both the tactical and strategic levels. This in-depth book by a military aviation expert examines the growth of the helicopter's importance in warfare and argues convincingly that severe flaws in the military procurement process have led to U.S. troops using antiquated helicopter designs in combat despite billions spent on research and development.

United States Military Helicopters Michael Green,2017-10-30 The helicopter came on the scene too late to play other than a minor role in the Second World War but by the Korean conflict the Bell H-13 Sioux, OH-23 Raven, and Sikorsky H-19 Chickasaw were in service.It was in Vietnam that the US military helicopters really came into their own and the best known were the Bell UH-1 Iriquois (known as the Huey), the Boeing CH-47 Chinook, and the massive CH-37 Mojave. The USAF combat search and rescue Jolly Green Giant was indispensable.Attack helicopters have evolved from the early Huey Cobra or Snake and the Boeing AH-64 Apache in the late 80s to when the Sikorsky UH-60 series became the military general purpose chopper.All these formidable aircraft and many more are covered in detail in this superbly illustrated and comprehensive book.

Helicopters at War Bill Gunston,1977

Chopper Robert F. Dorr,2005 An oral history of American military helicopter operations presents chronicles that range from the first use of a helicopter in a 1944 rescue mission behind enemy lines to the role of the aircraft during the modern-day war on terrorism.

Military Helicopters Mark J. Harasymiw,2013-01-01 During the Vietnam War, helicopters proved their worth to the US military. With brave crews aboard, they hovered low in the skies to rescue pilots and soldiers who were frighteningly close to enemy forces. How fascinating to think that the first helicopters couldn't even stay upright! In this book, readers will discover what it was like for the inventors of the helicopter, while also learning how this huge machine became the military necessity it is today. Exciting content, along with full-color photographs of daring rescues and high-tech equipment, will inspire readers to look to the skies. Detailed sidebars and fact boxes will keep readers engaged from cover to cover.

Vietnam War Helicopter Art Volume 2 John Brennan,2014-02-01 • Hundreds of unique color photos showing how soldiers decorated their helicopters during the Vietnam War • Includes stories and anecdotes from pilots, crews, and artists, focusing on how helicopters got their names and how the artwork was created • Will appeal to Vietnam veterans, modelers, military and U.S. history buffs, and fans of modern American folk art and pop culture

The Final Mission of Extortion 17 Ed Darack,2017-09-19 On August 6, 2011, a U.S. Army CH-47D Chinook helicopter approached a landing zone in Afghanistan 40 miles southwest of Kabul. The helicopter, call sign Extortion 17, was on a mission to reinforce American and coalition special operations troops. It would never return. Insurgents fired at the Chinook, severed one of its rear rotor blades, and brought it crashing to the ground. All 38 onboard perished instantly in the single greatest moment of sacrifice for Americans in the war in Afghanistan. Those killed were some of the U.S.'s most highly trained and battle-honed commandos, including 15 men from the Gold Squadron of the Naval Special Warfare Development Group, known popularly as SEAL Team 6, which had raided a Pakistan compound and killed Osama bin Laden just three months earlier. The downing of Extortion 17 spurred a number of conspiracy theories, such as the idea that the shootdown was revenge for bin Laden's death. In *The Final Mission of Extortion 17*, Ed Darack debunks this theory and others and uncovers the truth behind this mysterious tragedy. His account of the brave pilots, crew, and passengers of Extortion 17 and the events of that fateful day is interwoven into a rich, complex narrative that also discusses modern joint combat operations, the history of the Afghan war to that date, U.S. helicopter use in Afghanistan, and the new and evolving military technologies and tactics being developed to mitigate such tragedies now and in the future. Thunderbird Lounge Robert J. Brandt,2001 The story of one early helicopter company as it helped develop the helicopter into a viable weapon on the modern battlefield. Depicts daily life for early helicopter soldiers as they fought the Viet Cong.

Rattler One-Seven Chuck Gross,2006-06-13 Rattler One-Seven puts you in the helicopter seat, to see the war in Vietnam through the eyes of an inexperienced pilot as he transforms himself into a seasoned combat veteran. At the age of twenty, Chuck Gross spent his 1970-71 tour with the 71st Assault Helicopter Company flying UH-1 Huey helicopters. He inserted special operations teams into Laos and participated in Lam Son 719, a misbegotten attempt to assault and cut the Ho Chi Minh Trail, during which his helicopter was shot down and he was stranded in the field.

US Helicopter Pilot in Vietnam Gordon L. Rottman,2011-09-20 The helicopter changed war forever. This book examines the range of duties helicopter pilots carried out in Vietnam, from air-lift, med-evac and fire-support to landing in high volume crossfires in 'Hot LZs'. Protected by little more than an armoured seat, operating in terrible conditions and flying long hours these brave men led hard, dangerous lives, and casualties were high. Following these pilots from initial deployment through to the deadly thrill of combat in a war zone, Vietnam veteran Gordon L Rottman's book is a crucial examination of the pilots who fought so valiantly for their country. Often unmoved by the politics of the war, conflicts at home and other social issues, the Vietnam helicopter pilots just wanted to fly. As the saying went 'who needs drugs, I'm already high'.

Airmobile Jim Mesko,1984

Military Helicopters Karen E. Bledsoe,Glen Bledsoe,Taylor Baldwin Kiland,2015-07-15 The military uses helicopters for many reasons. Each chopper is designed for its specific purpose: transporting goods and troops, sending rockets and missiles at the enemy, or some combination thereof. Learn about the different kinds of military helicopters from the men and women who use them every day.

Assault from the Sky Dick Camp,2013-08-26 This work describes U.S. Marine Corps helicopter operations, including their actions and evolution, throughout the Vietnam War. The book is divided into parts spanning the three stages of the Corps' combat deployment: "Buildup (1962-1966)," "Heavy Combat (1967-1969)," and "The Bitter End (1975)." Each part includes chapters devoted to "telling the story" of Marine helicopters from the individual to the strategic level. Vietnam has often been called our "first helicopter war," and indeed the U.S. Marine Corps, as well as Army, had to feel its way forward during the initial combats. But by 1967 the combat was raging across South Vietnam, with confrontational battles against the NVA, on a scale comparable to the great campaigns of WWII. In 1968, when the Communists launched their mammoth counteroffensive, the Marines were forced to fight on all sides, with the helicopter giving them the additional dimension that proved decisive in repelling the enemy. The author, a Vietnam veteran, uses his experiences as a company commander to bring the story to life by weaving personal accounts, after-action reports and official documents into a remarkably readable narrative of service and sacrifice by Marine pilots and crewmen. The entire story of the war is here depicted through the prism of Marine helicopter operations, from the first deployments to support the Army of the Republic of Vietnam (ARVN) against the Viet Cong through the rapid United States buildup to stop the North Vietnamese Army, until the final withdrawal from our Embassy. Colonel Dick Camp, a Purple Heart recipient, served 26 years in the U.S. Marine Corps before retiring in 1988. Upon retirement he served as the Deputy Director, U.S. Marine Corps History Division and as the Marine Corps Heritage Foundation, Vice President for Museum Operations at the National Museum of the Marine Corps, Quantico, Virginia. Currently residing in Fredericksburg, Virginia, he is the author of ten books and over 100 magazine articles on various military related subjects.

The Chopper Boys Al J. Venter,1994 Covers the history of helicopter use throughout Africa, from the war in Rhodesia (1962-80) to the last days of Somalia.

Vietnam Philip D. Chinnery,1991 First published in the UK in 1991 by Airlife Publishing Limited/Includes bibliographical references and index.

Chickenhawk Robert Mason,2005-03-29 A true, bestselling story from the battlefield that faithfully portrays the horror, the madness, and the trauma of the Vietnam War More than half a million copies of *Chickenhawk* have been sold since it was first published in 1983. Now with a new afterword by the author and photographs taken by him during the conflict, this straight-from-the-shoulder account tells the electrifying truth about the helicopter war in Vietnam. This is Robert Mason’s astounding personal story of men at war. A veteran of more than one thousand combat missions, Mason gives staggering descriptions that cut to the heart of the combat experience: the fear and belligerence, the quiet insights and raging madness, the lasting friendships and sudden death—the extreme emotions of a chickenhawk in constant danger. Very simply the best book so far about Vietnam. -St. Louis Post-Dispatch

Whirlybirds Lieut.-Col. Ronald J. Brown,2018-04-03 On 25 June 1950, Communist North Korea unexpectedly invaded its southern neighbor, the American-backed Republic of Korea (ROK). The poorly equipped ROK Army was no match for the well prepared North Korean People’s Army (NKPA) whose armored spearheads quickly thrust across the 38th Parallel. The stunned world helplessly looked on as the outnumbered and outgunned South Koreans were quickly routed. With the fall of the capital city of Seoul imminent, President Harry S. Truman ordered General of the Army Douglas MacArthur, C-in-C, Far East, in Tokyo, to immediately pull all American nationals in South Korea out of harm’s way. On 27 July, an American combat air patrol protecting Kimpo Airfield near the South Korean capital actively engaged menacing North Korean planes and promptly downed three of the five Soviet-built Yak fighters. Soon thereafter American military forces operating under the auspices of the United Nations Command (UNC) were committed to thwart a Communist takeover of South Korea. Thus, only four years and nine months after V-J Day marked the end of WWII, the United States was once again involved in a shooting war in Asia.... The United Nations issued a worldwide call to arms to halt Communist aggression in Korea, and America’s armed forces began to mobilize. Marines were quick to respond. Within three weeks a hastily formed provisional Marine brigade departed California and headed for the embattled Far East. Among the aviation units on board the U.S. Navy task force steaming west was a helicopter detachment, the first rotary-wing aviation unit specifically formed for combat operations in the history of the Marine Corps. Although few realized it at the time, this small band of dedicated men and their primitive flying machines were about to radically change the face of military aviation. Arguably, the actions of these helicopter pilots in Korea made U.S. Marines the progenitors of vertical envelopment operations, as we know them today.
