**Masters Theses in the Pure and Applied Sciences** Wade H. Shafer, 2012-12-06 Masters Theses in the Pure and Applied Sciences was first conceived, published, and disseminated by the Center for Information and Numerical Data Analysis and Synthesis (CINDAS) \* at Purdue University in 1957, starting its coverage of theses with the academic year 1955. Beginning with Volume 13, the printing and dissemination phases of the activity were transferred to University Microfilms/Xerox of Ann Arbor, Michigan, with the thought that such an arrangement would be more beneficial to the academic and general scientific and technical community. After five years of this joint undertaking we had concluded that it was in the interest of all concerned if the printing and distribution of the volumes were handled by an internal and broader dissemination. tional publishing house to assure improved service Hence, starting with Volume 18, Masters Theses in the Pure and Applied Sciences has been disseminated on a worldwide basis by Plenum Publishing Corporation of New York, and in the same year the coverage was broadened to include Canadian universities. All back issues can also be ordered from Plenum. We have reported in Volume 30 (thesis year 1985) a total of 12,400 theses titles from 26 Canadian and 186 United States universities. We are sure that this broader base for these titles reported will greatly enhance the value of this important annual reference work.

**Internet of Things** Bharat Bhushan, Sudhir Kumar Sharma, Bhuvan Unhelkar, Muhammad Fazal Ijaz, Lamia Karim, 2022 This book examines IoT as applied to real-life organizations and systems. It considers IoT as a disruptive technology that requires examination and consideration in multiple domains like CPS,

ubiquitous distributed computing, sensor technologies, wireless sensor networks, data security and privacy, big data, machine learning, blockchain, and so on--

Introduction to FACTS Controllers Kalyan K. Sen, Mey Ling Sen, 2009-10-13 Demystifies FACTS

controllers, offering solutions to power control and power flow problems Flexible alternating current transmission systems (FACTS) controllers represent one of the most important technological advances in recent years, both enhancing controllability and increasing power transfer capacity of electric power transmission networks. This timely publication serves as an applications manual, offering readers clear instructions on how to model, design, build, evaluate, and install FACTS controllers. Authors Kalyan Sen and Mey Ling Sen share their two decades of experience in FACTS controller research and implementation, including their own pioneering FACTS design breakthroughs. Readers gain a solid foundation in all aspects of FACTS controllers, including: Basic underlying theories Step-by-step evolution of FACTS controller development Guidelines for selecting the right FACTS controller Sample computer simulations in EMTP programming language Key differences in modeling such FACTS controllers as the voltage regulating transformer, phase angle regulator, and unified power flow controller Modeling techniques and control implementations for the three basic VSC-based FACTS controllers—STATCOM, SSSC, and UPFC In addition, the book describes a new type of FACTS controller, the Sen Transformer, which is based on technology developed by the authors. An appendix presents all the sample models that are discussed in the book, and the accompanying FTP site offers many more downloadable sample models as well as the full-color photographs that appear throughout the book. This book is essential reading for practitioners and students of power engineering around the world, offering viable solutions to the increasing problems of grid congestion and power flow limitations in electric power transmission systems.

**Honeymoon in Tehran** Azadeh Moaveni, 2010-04-27 Azadeh Moaveni, longtime Middle East

correspondent for Time magazine, returns to Iran to cover the rise of President Mahmoud Ahmadinejad. Living and working in Tehran, she finds a nation that openly yearns for freedom and contact with the West but whose economic grievances and nationalist spirit find an outlet in Ahmadinejad's strident pronouncements. And then the unexpected happens: Azadeh falls in love with a young Iranian man and decides to get married and start a family in Tehran. Suddenly, she finds herself navigating an altogether different side of Iranian life. As women are arrested for "immodest dress" and the authorities unleash a campaign of intimidation against journalists, Azadeh is forced to make the hard decision that her family's future lies outside Iran. Powerful and poignant, Honeymoon in Tehran is the harrowing story of a young woman's tenuous life in a country she thought she could change.

Thermal System Optimization Vivek K. Patel,Vimal J. Savsani,Mohamed A. Tawhid,2019-02-14 This  
book presents a wide-ranging review of the latest research and development directions in thermal systems  
optimization using population-based metaheuristic methods. It helps readers to identify the best methods for  
their own systems, providing details of mathematical models and algorithms suitable for implementation.  
To reduce mathematical complexity, the authors focus on optimization of individual components rather  
than taking on systems as a whole. They employ numerous case studies: heat exchangers; cooling towers;  
power generators; refrigeration systems; and others. The importance of these subsystems to real-world  
situations from internal combustion to air-conditioning is made clear. The thermal systems under discussion  
are analysed using various metaheuristic techniques, with comparative results for different systems. The  
inclusion of detailed MATLAB® codes in the text will assist readers—researchers, practitioners or  
students—to assess these techniques for different real-world systems. Thermal System Optimization is a  
useful tool for thermal design researchers and engineers in academia and industry, wishing to perform

thermal system identification with properly optimized parameters. It will be of interest for researchers, practitioners and graduate students with backgrounds in mechanical, chemical and power engineering.

The Long Farewell Don Charlwood, 1993 Reprint of a well-received historical account, first published in 1981, of the sea voyages from Britain to Australia during the 19th century. Based on more than 100 shipboard diaries written by both ships' crew and passengers. Includes footnotes, a bibliography and an index. The author has written several maritime histories, as well as two volumes of autobiography, 'March as to War' and 'Journeys into Night', and the classic, 'No Moon Tonight'.

Beyond Significance Testing: Reforming Data Analysis Methods in Behavioral Research Rex B. Kline, 2004-01-01 Annotation The book is intended for applied researchers and students who may not have quantitative backgrounds. Readers will learn how to measure effect size on continuous or dichotomous outcomes in comparative studies with independent or dependent samples. They will also learn how to calculate and correctly interpret confidence intervals for effect sizes. Numerous research examples from a wide range of areas illustrate how to apply these principles and how to estimate substantive significance instead of just statistical significance. Additional alternatives to statistical tests are described, including meta-analysis, resampling techniques like bootstrapping, and Bayesian estimation.--BOOK JACKET. Hydraulics in Civil and Environmental Engineering Andrew Chadwick,John Morfett,Martin Borthwick,2021-06-07 This classic text, now in its sixth edition, combines a thorough coverage of the basic principles of civil engineering hydraulics with a wide-ranging treatment of practical, real-world applications. It now includes a powerful online resource with worked solutions for chapter problems and solution spreadsheets for more complex problems that may be used as templates for similar issues. Hydraulics in Civil and Environmental Engineering is structured into two parts to deal with principles and more advanced topics. The first part focuses on fundamentals, such as hydrostatics, hydrodynamics, pipe and open channel flow, wave theory, physical modelling, hydrology and sediment transport. The second part illustrates engineering applications of these principles to pipeline system design, hydraulic structures, river and coastal engineering, including up-to-date environmental implications, as well as a chapter on computational modelling, illustrating the application of computational simulation techniques to modern design, in a variety of contexts. New material and additional problems for solution have been added to the chapters on hydrostatics, pipe flow and dimensional analysis. The hydrology chapter has been revised to reflect updated UK flood estimation methods, data and software. The recommendations regarding the assessment of uncertainty, climate change predictions, impacts and adaptation measures have been updated, as has the guidance on the application of computational simulation techniques to river flood modelling.

Andrew Chadwick is an honorary professor of coastal engineering and the former associate director of the Marine Institute at the University of Plymouth, UK. John Morfett was the head of hydraulics research and taught at the University of Brighton, UK. Martin Borthwick is a consultant hydrologist, formerly a flood hydrology advisor at the UK's Environment Agency, and previously an associate professor at the University of Plymouth, UK.

**Intelligent Signal Processing** Simon Haykin, Bart Kosko, 2001-01-15 IEEE Press is proud to present the first selected reprint volume devoted to the new field of intelligent signal processing (ISP). ISP differs fundamentally from the classical approach to statistical signal processing in that the input-output behavior of a complex system is modeled by using intelligent or model-free techniques, rather than relying on the shortcomings of a mathematical model. Information is extracted from incoming signal and noise data, making few assumptions about the statistical structure of signals and their environment. Intelligent Signal Processing explores how ISP tools address the problems of practical neural systems, new signal data, and blind fuzzy approximators. The editors have compiled 20 articles written by prominent researchers

covering 15 diverse, practical applications of this nascent topic, exposing the reader to the signal processing power of learning and adaptive systems. This essential reference is intended for researchers, professional engineers, and scientists working in statistical signal processing and its applications in various fields such as humanistic intelligence, stochastic resonance, financial markets, optimization, pattern recognition, signal detection, speech processing, and sensor fusion. Intelligent Signal Processing is also invaluable for graduate students and academics with a background in computer science, computer engineering, or electrical engineering. About the Editors Simon Haykin is the founding director of the Communications Research Laboratory at McMaster University, Hamilton, Ontario, Canada, where he serves as university professor. His research interests include nonlinear dynamics, neural networks and adaptive filters and their applications in radar and communications systems. Dr. Haykin is the editor for a series of books on Adaptive and Learning Systems for Signal Processing, Communications and Control (Publisher) and is both an IEEE Fellow and Fellow of the Royal Society of Canada. Bart Kosko is a past director of the University of Southern California's (USC) Signal and Image Processing Institute. He has authored several books, including Neural Networks and Fuzzy Systems, Neural Networks for Signal Processing (Publisher, copyright date) and Fuzzy Thinking (Publisher, copyright date), as well as the novel Nanotime (Publisher, copyright date). Dr. Kosko is an elected governor of the International Neural Network Society and has chaired many neural and fuzzy system conferences. Currently, he is associate professor of electrical engineering at USC.

lost, lives were changed. Some perished in an instant, some survived, and some were buried alive. Salt of My Tears is a tale of two young strangers who become trapped in the tragic rock slide that buried the town of Frank in the early morning hours of April 29, 1903. During their six day entrapment, both begin to leave their pasts behind, and learn to love again. When their miraculous rescue occurs the past catches up to them, threatening to destroy them both.
