Eyewitnesses to the Great War Ed Klekowski,Libby Klekowski,2014-01-10 Beginning with the novelist Edith Wharton, who toured the front in her Mercedes in 1915, this book describes the wartime experiences of American idealists (and a few rogues) on the Western Front and concludes with the doughboys' experiences under General Pershing. Americans were "over there" from the war's beginning in August 1914, and because America was neutral until April 1917, they saw the war from both the French and German lines. Since most of the Americans who served, regardless of which side they were on, were in Champagne and Lorraine, this sector is the focus. Excerpts from memoirs are supplemented by descriptions of personalities, places, battles and even equipment and weapons, thus placing these generally forgotten American adventurers into the context of their times. A special set of maps based upon German Army battle maps was drawn and rare photographs supplement the text.

Irish Medical Education and Student Culture, C.1850-1950 Laura Kelly,2017 This book is the first comprehensive history of medical student culture and medical education in Ireland from the middle of the nineteenth century until the 1950s. Utilising a variety of rich sources, including novels, newspapers, student magazines, doctors' memoirs, and oral history accounts, it examines Irish medical student life and culture, incorporating students' educational and extra-curricular activities at all of the Irish medical schools. The book investigates students' experiences in the lecture theatre, hospital, dissecting room and outside their studies, such as in 'digs', sporting teams and in student societies, illustrating

how representations of medical students changed in Ireland over the period and examines the importance of class, religious affiliation and the appropriate traits that students were expected to possess. It highlights religious divisions as well as the dominance of the middle classes in Irish medical schools while also exploring institutional differences, the students' decisions to pursue medical education, emigration and the experiences of women medical students within a predominantly masculine sphere. Through an examination of the history of medical education in Ireland, this book builds on our understanding of the Irish medical profession while also contributing to the wider scholarship of student life and culture. It will appeal to those interested in the history of medicine, the history of education and social history in modern Ireland.
