The Rejection of Consequentialism Samuel Scheffler, 1994-08-11 In contemporary philosophy, substantive moral theories are typically classified as either consequentialist or deontological. Standard consequentialist theories insist, roughly, that agents must always act so as to produce the best available outcomes overall. Standard deontological theories, by contrast, maintain that there are some circumstances where one is permitted but not required to produce the best overall results, and still other circumstances in which one is positively forbidden to do so. Classical

utilitarianism is the most familiar consequentialist view, but it is widely regarded as an inadequate account of morality. Although Professor Scheffler agrees with this assessment, he also believes that consequentialism seems initially plausible, and that there is a persistent air of paradox surrounding typical deontological views. In this book, therefore, he undertakes to reconsider the rejection of consequentialism. He argues that it is possible to provide a rationale for the view that agents need not always produce the best possible overall outcomes, and this motivates one departure from consequentialism; but he shows that it is surprisingly difficult to provide a satisfactory rationale for the view that there are times when agents must not produce the best possible overall outcomes. He goes on to argue for a hitherto neglected type of moral conception, according to which agents are always permitted, but not always required, to produce the best outcomes.

Common Sense for the 21st Century Roger Hallam, 2019-11-26 "Brilliant, wise, profound and persuasive. Common Sense for the 21st Century will come to be recognized as a classic of political theory."—George Monbiot, via Twitter An urgent, essential, and practical call to action from a cofounder of Extinction Rebellion What can we all do to avert catastrophe and avoid extinction? Roger Hallam has answers. In Common Sense for the 21st Century, Roger Hallam, cofounder of Extinction Rebellion, outlines how movements around the world need to come together now to start doing what works: engaging in mass civil disobedience to make real change happen. The book

gives people the tools to understand not only why mass disruption, mass arrests, and mass sacrifice are necessary but also details how to carry out acts of civil disobedience effectively, respectfully and nonviolently. It bypasses contemporary political theory, and instead is inspired by Thomas Paine, the pragmatic 18th-century revolutionary whose pamphlet *Common Sense* sparked the American Revolution. *Common Sense for the 21st Century* urges us to confront the truth about climate change and argues forcefully that only a revolution of society and the state, similar to the turn that Paine urged the Americans to take into the political unknown, can save us now.

Islands in Geography, Law, and Literature Chiara Battisti, Sidia Fiorato, Matteo Nicolini, Thomas Perrin, 2022-04-04 This collection explores the heterogeneous places we have traditionally been taught to term 'islands.' It stages a conversation on the very idea of 'island-ness', thus contributing to a new field of research at the crossroads of law, geography, literature, urban planning, politics, arts, and cultural studies. The contributions to this volume discuss the notion of island-ness as a device triggering the imagination, triggering narratives and representations in different creative fields; they explore the interactions between legal, socio-political, and fictional approaches to remoteness and the 'state of insularity,' policy responses to both remoteness and boundaries on different scales, and the insular legal framing of geographical remoteness. The product of a cross-disciplinary exchange on islands, this edited volume will be of great

interest to those working in the fields of Island Studies, as well as literary studies scholars, geographers, and legal scholars.
