Britain and the Confrontation with Indonesia, 1960-66 David Easter,2012-03-30 The confrontation with Indonesia cut to the heart of Britain's desire to retain global power status in the 1960s and was central to decolonisation and British defence policy across South-East Asia. Factors such as the need to maintain a military base in Singapore drove strategy and this confrontation became a major commitment - close at times to escalating into full-scale regional war. However, 'the Confrontation' was not recorded as a conflict of this scale, and Britain was cast into a passive and defensive role. Here, David Easter reveals a radically different view, persuasively making the case that Britain waged a secret and aggressive war against President Sukarno's Indonesia. It was the covert nature of operations and the deliberate decision of British policy-makers to keep the full extent of this conflict away from public scrutiny that has allowed it to be overshadowed in the annals of history.

Confrontation, Strategy and War Termination Christopher Tuck,2016-05-23 At the heart of this book is the problem of war termination. Britain won an almost unbroken string of tactical military victories during an undeclared war against the Republic of Indonesia in the 1960s, yet it proved difficult to translate this into strategic success. Using conflict termination theories, this book argues that British strategy during Confrontation was both exemplary and flawed, both of which need not be mutually exclusive. The British experience in Indonesia represents an illuminating case study of the difficulties associated with strategy and the successful termination of conflicts. The value of this book lies in two areas: as a contribution to the literature on British counter-insurgency operations and as a contribution to the debates on the problems of war termination in the context of strategic thought.

Whose Music? John Shepherd,2017-07-12 *Whose Music?* combines historical, musicological, and sociological materials and styles of analysis in ways that connect to the field of sociology. The analyses of social class systems presented here speak in translatable ways to analyses of musical forms. Not only that, both are connected to an understanding of the organizations through which works are distributed to their audiences. Perhaps most importantly for the contemporary reader, this book depicts the part of the process by which dominant class groups justify their domination--cultural and otherwise.

The Roman Legions Henry Michael Denne Parker,1928 The period selected for study starts with the Marian army reforms and ends with the accession of Septimius Severus. My main purpose has been to examine the internal organization of the legions, the areas from which they drew their recruits, and the conditions under which their soldiers served and were discharged. An attempt has also been made to trace the movements of the legions in the first two centuries of the Principate, the circumstances in which new units were raised, and the normal orders of battle and march, while in the introduction the stages by which the army developed in the pre-Marian Republic have been sketched in outline--Pref.

International Financial Statistics, January 2019 International Monetary Fund. Statistics Dept.,2019-01-04

This January 2019 monthly issue of International Financial Statistics (IFS) contains country tables for most IMF members, as well as for Anguilla, Aruba, the Central African Economic and Monetary Community, Curaçao, the currency union of Curaçao and Sint Maarten, the Eastern Caribbean Currency Union, the euro area, Montserrat, the former Netherlands Antilles, Sint Maarten, the West African Economic Monetary Union, West Bank and Gaza, and some non-sovereign territorial entities for which statistics are provided internationally on a separate basis. Exchange rates in IFS are classified into three broad categories, reflecting the role of the authorities in determining the rates and/or the multiplicity of the exchange rates in a country. The three categories are the market rate, describing an exchange rate determined largely by market forces; the official rate, describing an exchange rate determined by the authorities—sometimes in a flexible manner; and the principal, secondary, or tertiary rate, for countries maintaining multiple exchange arrangements.
