*Victoria Crosses on the Western Front, 31st July 1917-6th November 1917*

Paul Oldfield,2017-07-30 In the past, while visiting the First World War battlefields, the author often wondered where the various Victoria Cross actions took place. He resolved to find out. In 1988, in the midst of his army career, research for this book commenced and over the years numerous sources have been consulted. *Victoria Crosses on the Western Front Third Ypres 1917* is designed for the battlefield visitor as much as the armchair reader. A thorough account of each VC action is set within the wider strategic and tactical context. Detailed sketch maps show the area today, together with the battle-lines and movements of the combatants. It will allow visitors to stand upon the spot, or very close to, where each VC was won. Photographs of the battle sites richly illustrate the accounts. There is also a comprehensive biography for each recipient, covering every aspect of their lives warts and all parents and siblings, education, civilian employment, military career, wife and children, death and burial/commemoration. A host of other information, much of it published for the first time, reveals some fascinating characters, with numerous links to many famous people and events.

**We Fought the Road** Christine McClure,Dennis McClure,2017-10-15 We Fought the Road is the story of the building of the Alaska-Canada Highway during World War II. More than one third of the 10,607 builders were black; thought to be incapable of performing on a war front by many of their white commanding officers. Their task--which required punching through wilderness on a route blocked by the Rocky Mountains and deadly permafrost during the worst winter on record--has been likened to the building of the Panama Canal. Unlike most accounts that focus on the road's military planners, *We Fought the Road* is boots-on-the-ground and often personal, based in part on letters from the Three Cent Romance, the successful courtship via mail discovered in the authors' family papers

**Proceedings of the 8th International Conference on Sciences of Electronics, Technologies of Information and Telecommunications (SETIT'18), Vol.1** Med Salim Bouhlel,Stefano Rovetta,2019-07-10 This two-volume book presents an unusually diverse selection of research papers, covering all major topics in the fields of information and communication technologies and related sciences. It provides a wide-angle snapshot of current themes in information and power engineering, pursuing a cross-disciplinary approach to do so. The book gathers revised contributions that were presented at the 2018 International Conference: Sciences of Electronics, Technologies of

Information and Telecommunication (SETIT'18), held on 20-22 December 2018 in Hammamet, Tunisia. This eighth installment of the event attracted a wealth of submissions, and the papers presented here were selected by a committee of experts and underwent additional, painstaking revision. Topics covered include: · Information Processing · Human-Machine Interaction · Computer Science · Telecommunications and Networks · Signal Processing · Electronics · Image and Video This broad-scoped approach is becoming increasingly popular in scientific publishing. Its aim is to encourage scholars and professionals to overcome disciplinary barriers, as demanded by current trends in the industry and in the consumer market, which are rapidly leading toward a convergence of data-driven applications, computation, telecommunication, and energy awareness. Given its coverage, the book will benefit graduate students, researchers and practitioners who need to keep up with the latest technological advances.
