**Parables for the Virtual** Brian Massumi, 2002-04-09 Although the body has been the focus of much contemporary cultural theory, the models that are typically applied neglect the most salient characteristics of embodied existence—movement, affect, and sensation—in favor of concepts derived from linguistic theory. In *Parables for the Virtual* Brian Massumi views the body and media such as television, film, and the Internet, as cultural formations that operate on multiple registers of sensation beyond the reach of the reading techniques founded on the standard rhetorical and semiotic models. Renewing and assessing William James's radical empiricism and Henri Bergson's philosophy of perception through the filter of the post-war French philosophy of Deleuze, Guattari, and Foucault, Massumi links a cultural logic of variation to questions of movement, affect, and sensation. If such concepts are as fundamental as signs and significations, he argues, then a new set of theoretical issues appear, and with them potential new paths for the wedding of scientific and cultural theory. Replacing the traditional opposition of literal and figural with new distinctions between stasis and motion and between actual and virtual, *Parables for the Virtual* tackles related theoretical issues by applying them to cultural mediums as diverse as architecture, body art, the digital art of Stelarc, and Ronald Reagan's acting career. The result is an intriguing combination of cultural theory, science, and philosophy that asserts itself in a crystalline and multi-faceted argument.

Buffettology Workbook Mary Buffett,2012-12-11 In the past eighteen months, investors have seen rapid, often intimidating changes in the stock market- tech stocks have soared and crashed and assets that shifted away from traditional blue chip companies have quickly shifted back again. In spite of this volatility however, there has been one constant: Warren Buffet's value investing strategies make money. In BUFFETOLOGY, Mary Buffet and David Clark unveiled the analysis techniques that made Warren Buffet the billionaire and investment icon he is today. Now in this companion workbook, the authors explain Buffet's system of business perspective investing, focusing on specific mathematical ratios and calculations. Cronica Walliae Humphrey Llwyd,2016 'Cronica Walliae' is the earliest and largest extant work of antiquary and map-maker, Humphrey Llwyd. *Rethinking Home Economics* Sarah Stage,Virginia B. Vincenti,2018-07-05 Until recently, historians tended to dismiss home economics as little more than a conspiracy to keep women in the kitchen. This landmark volume initiates collaboration among home economists, family and consumer science professionals, and women's historians. What knits the essays together is a willingness to revisit the subject of home economics with neither indictment nor apology. The volume includes significant new work that places home economics in the twentieth century within the context of the development of women's professions. *Rethinking Home Economics* documents the evolution of a profession from the home economics movement launched by Ellen Richards in the early twentieth century to the modern field renamed Family and Consumer Sciences in 1994. The essays in this volume show the range of activities pursued under the rubric of home economics, from dietetics and parenting, teaching and cooperative extension work, to test kitchen and product development. Exploration of the ways in which gender, race, and class influenced women's options in colleges and universities, hospitals, business, and industry, as well as government has provided a greater understanding of the obstacles women encountered and the strategies they used to gain legitimacy as the field developed.

**India** Durga Das,2004 This book is a fascinating and wholly absorbing contribution to the history of the twentieth century. This fast-moving, lively and independent account of the politics and international affairs is enriched by intimate, perceptive and far from uncritical sketches of great leaders such as Gandhi, Jinnah, Nehru, Desai and Patel. Perhaps no other book reminds the reader so firmly that politics, even at its most exalted and dramatic, is about people. Certainly no one who is interested in India, in the history of British imperialism or in the realities of present day Asia can neglect this goldmine of a book.

conventional wisdom holds that women in the United States today are more sexually liberated than ever before, a number of startling statistics call into question this perceived victory: over half of all women report having faked orgasms; 45 percent of women find rape fantasies erotic; a growing number of women perform same-sex eroticism for the viewing benefit of men; and recent clinical studies label 40 percent of women as sexually dysfunctional. Caught between postsexual revolution celebrations of progress and alarmingly regressive new modes of disempowerment, the forty women interviewed in *Performing Sex* offer a candid and provocative portrait of liberated sex in America. Through this nuanced and complex study, Breanne Fahs demonstrates that despite the constant cooptation of the terms of sexual freedom, women's sexual subjectivities—and the ways they continually grapple with shifting definitions of liberation—represent provocative spaces for critical inquiry and personal discovery, ultimately generating novel ways of imagining and reimagining power, pleasure, and resistance.

*Great Philosophical Arguments* Lewis Vaughn, 2011-11-03 The purpose of this text is to introduce students to great philosophy and great philosophers through an intense focus on argument. Like other topically organized introductory philosophy readers, this book is organized around the existence of God, knowledge and skepticism, mind and body, free will and determinism, ethics, and contemporary ethical debates, including abortion, euthanasia, and global hunger and poverty. 78 selections are grouped into six topical chapters—and the selections within those chapters are organized by argument. Vaughn's approach focuses students' attention on argumentation, where much of the philosophical work gets done.
