Approximations for the Thermodynamic and Transport Properties of High-temperature Air C. Frederick Hansen,1959 The thermodynamic and transport properties of high-temperature air are found in closed form starting from approximate partition functions for the major components in air and neglecting all minor components. The compressibility, enthalpy, entropy, the specific heats, the speed of sound, the coefficients of viscosity and of thermal conductivity, and the Prandtl numbers for air are tabulated from 500° to 15,000° K over a range of pressure from 0.0001 to 100 atmospheres. The energy of air and the mol fractions of the major components of air can be found from the tabulated values for compressibility and enthalpy. It is predicted that the Prandtl number for fully ionized air, which is in complete equilibrium, will become small compared to unity, the order of 0.01, and this implies that boundary layers in such flow will be very transparent to heat flux.

Maybe you need a few extra dollars to make ends meet. Maybe you want to pay off debt. Maybe you want to save for a rainy day, or for your children's education. Maybe you just want to treat yourself to a nice vacation or a new car without feeling guilty about it. Maybe you're looking for a way out of the corporate world, an escape plan. That's the ultimate financial freedom, right? That's how I got started down this entrepreneurial path, and it's been the best choice I ever made. You're willing to work for it, because your future is worth working for. The challenge is time is limited, and you may not know where to start. And the cool thing is, there are no special technical skills or prerequisites to get started with any of

the ideas presented. Most don't require any big scary upfront investment. Why Side Hustle? Build Skills Build Security Build Income Build Freedom My Story After college, I did what you're supposed to do: I got a job. The problem was almost immediately I found myself looking for a way out. It wasn't that I hated the work or my coworkers, but it just wasn't what I wanted to do with my life. The thought of spending my next 30 years there was terrifying. So evenings and weekends I turned my attention online. I'd been dabbling with building rudimentary websites, learning online advertising channels, and even running my own small marketing campaigns for other company's products to test the waters. And that's what The Side Hustle Path is about; finding a low-risk way make more money. If you're looking for a get-rich-quick-scheme or the secret to overnight success, you won't find it here. But what you will find are 10 down-to-earth entrepreneurs who were once sitting in your same position. They felt the same fears and uncertainties, but took action anyway. What are you waiting for?
