Countdown Deborah Wiles,2016-04-26 The story of a formative year in 12-year-old Franny Chapman's life, and the life of a nation facing the threat of nuclear war. Franny Chapman just wants some peace. But that's hard to get when her best friend is feuding with her, her sister has disappeared, and her uncle is fighting an old war in his head. Her saintly younger brother is no help, and the cute boy across the street only complicates things. Worst of all, everyone is walking around just waiting for a bomb to fall. It's 1962, and it seems that the whole country is living in fear. When President Kennedy goes on television to say that Russia is sending nuclear missiles to Cuba, it only gets worse. Franny doesn't know how to deal with what's going on in the world -- no more than she knows how to deal with what's going on with her family and friends. But somehow she's got to make it through. Featuring a captivating story interspersed with footage from 1962, award-winning author Deborah Wiles has created a documentary novel that will put you right alongside Franny as she navigates a dangerous time in both her history and our history.

15 Minutes L. Douglas Keeney,2011-02-01 Packed with startling revelations, this inside look at the secret side of the Cold War exposes just how close America came to total annihilation During the Cold War, a flight crew had 15 minutes to get their nuke-laden plane in the air from the moment Soviet bombers were detected--15 minutes between the earliest warning of an incoming nuclear strike and the first flash of an enemy warhead. This is the chilling true story of the incredibly risky steps our military took to protect us from that scenario, including: • Over two thousand loaded bombers that crossed American skies. They sometimes crashed and at least nine times resulted in nuclear weapons being accidentally dropped • A system that would use timers and rockets to launch missiles even after everyone was dead • Disastrous atmospheric nuclear testing including the horrific runaway bomb--that fooled scientists and put thousands of men in uniform in the center of a cloud of hot fallout • A plan to use dry lake beds to rebuild and launch a fighting force in the aftermath of nuclear war Based on formerly classified documents, military records, press accounts, interviews and over 10 years of research, 15 Minutes is one of the most important works on the atom bomb ever written.

Apollo by the Numbers Richard W. Orloff,2000 This work is a unique collection of valuable statistical information about Project Apollo. It includes a chapter (about 20 pages each) for Apollo 1 through Apollo 17. There are several data tables for each mission, plus a 50-page section with additional statistics and tables that merge data for each mission so you can easily make comparisons. Tables include launch and ascent data, fuel consumption, stage impact locations, very detailed mission timelines, and much more.

Apollo Richard W. Orloff,David M. Harland,2006-08-29 This book provides an overview of the origins of the Apollo program and descriptions of the ground facilities, launch vehicles and spacecraft that were developed in the quest to reach - and return from - the surface of the moon. It will serve as an invaluable single-volume sourcebook for space enthusiasts, space historians, journalists, and others. The text includes a comprehensive collection of tables listing facts and figures for each mission.

The Essential Guide to Flash CS4 Cheridan Kerr,Jonathan Keats,2009-10-13 If you're familiar with the basics of Flash, then The Essential Guide to Flash CS4 will take you further in all aspects of the application, animation, sound, 3D, inverse kinematics, the drawing tools, ActionScript, and much more. This book takes all the good bits of Flash CS4 and demonstrates them in methodical and intuitive exercises full of hints and tips for streamlining the creative process. Jump straight into Flash CS4 and start working on real life examples that you can customize to suit your needs. Demystifies Flash CS4—explaining new features deep diving through old favorites Streamlines the production of cutting-edge Flash CS4 animations and applications Provides a unique commercial perspective in compelling Flash productions This book is for intermediate Flash CS4 users as well as the more advanced user who wants to learn about using Flash CS4's awesome new capabilities, such as motion tweening and kinematics poses. Each chapter has a number of exercises that contribute to an overall project. The exercises are fun and compelling and allow you to place your own creative

stamp on them, while still following the steps to completion. The final chapter focuses on bringing the exercise output together in an overall campaign consisting of a website featuring advanced flash components and advertising banners. An underlying theme of the book is marketing a website online. It discusses industry standards for banner campaigns (banner weight, frames per second, etc), effective website marketing techniques, and delves into search engine optimization and search engine marketing.

New Trends in Databases and Information Systems Tadeusz Morzy, Patrick Valduriez, Ladjel Bellatreche, 2015-08-27 This book constitutes the thoroughly refereed short papers and workshop papers of the 19th East European Conference on Advances in Databases and Information Systems, ADBIS 2015, held in Poitiers, France, in September 2015. The 31 revised full papers and 18 short papers presented were carefully selected and reviewed from 135 submissions. The papers are organized in topical sections on ADBIS Short Papers; Second International Workshop on Big Data Applications and Principles, BigDap 2015; First International Workshop on Data Centered Smart Applications, DCSA 2015; Fourth International Workshop on GPUs in Databases, GID 2015; First International Workshop on Managing Evolving Business Intelligence Systems, MEBIS 2015; Fourth International Workshop on Ontologies Meet Advanced Information Systems, OAIS 2015; First International Workshop on Semantic Web for Cultural Heritage, SW4CH 2015; First International Workshop on Information Systems for AlaRm Diffusion, WISARD 2015.

Prepare for Launch Erik Seedhouse, 2018-10-10 Today's astronauts require many different abilities. They must not only be expert in performing flight simulations but must also be proficient in such dissimilar subjects as photography, thermodynamics, electrical repairs, flight procedures, oceanography, public affairs, and geology. In *Prepare for Launch*, the author introduces the technologies and myriad activities that constitute or affect astronaut training, such as the part-task trainers, emergency procedures, the fixed-based and motion-based simulators, virtual environment training, and the demands of training in the Weightless Environment Training Facility. With plans to return to the Moon and future missions to Mars, the current selection criteria and training are very different from those used for short duration mission Space Shuttle crews. Dr. Erik Seedhouse in this book focuses on how astronaut candidates are taught to cope with different needs and environments (for example, hibernation, artificial gravity, and bioethics issues) and also includes brief discussions of the astronaut application and selection process.

MontiArc - Architectural Modeling and Simulation of Interactive Distributed Systems Arne Haber, 2016-09-02 Formal ADLs offer great potential to analyse the architecture of a system, predict the overall performance by using simulations, and allow to automatically generate parts of the implementation. Nevertheless, ADLs are rather not used in industrial practice since several problems hinder to exploit their potential to the full extend. This thesis elaborates the design of an ADL that copes with these impediments of ADLs in practice. Therefore, the design of a lightweight ADL is derived which also provides well defined extension points to be adapted to a certain domain or development process. Furthermore, it is investigated how architectural modeling can be enriched with agile development methods to support incremental modeling and the validation of system architectures. Therefore, a set detailed of requirements for architectural modeling and the simulation of system architectures is defined and MontiArc, a concrete ADL to model logical architectures of distributed, interactive systems, is derived. The language is based on the mathematical FOCUS [BS01] framework, which allows to simulate modeled systems in an event-based style. Code generators and a simulation framework provide means to continuously refine and test architectural models. To add new features or adapt the language to a new domain, a corresponding language extension method is presented to extend the syntax, language processing tools, and code generators of the ADL. A lightweight model library concept is presented which allows to develop and reuse component models and their implementation in a controlled and transparent way. The developed language, the simulator, and the language extension techniques have been examined in several case studies which either used or extended MontiArc.

JavaScript & DHTML Cookbook Danny Goodman,2003-04-21 On numerous online forums for JavaScript and DHTML, the majority of questions begin with How do I...? This new Cookbook provides the answers. After reading thousands of forum threads over the years, author and scripting pioneer Danny Goodman has compiled a list of problems that frequently vex scripters of various experience levels. He has now applied state-of-the-art ECMA and W3C DOM standards and used best practices to create this extensive collection of practical recipes that can bring your web pages to life. The JavaScript & DHTML Cookbook is all about adding value to the content of a web page. The book focuses on practical and sensible applications of scripting, rather than flying images and gratuitous color changes. For every problem Goodman addresses, there's a solution or recipe--a focused piece of code that web developers can insert directly into their applications. Yet, rather than just cut-and-paste code, you also get explanations of how and why the code works, so you can learn to adapt the problem-solving techniques to your designs. The recipes range from simple tasks, such as manipulating strings and validating dates in JavaScript, to entire libraries that demonstrate complex tasks, such as cross-browser positioning of HTML elements and sorting tables. This book contains over 150 recipes on the following topics: Working with interactive forms and style sheets Presenting user-friendly page navigation Creating dynamic content Producing visual effects for stationary content Positioning HTML elements Managing browser windows and multiple frames This book is the ideal companion to O'Reilly's JavaScript: The Definitive Guide and Dynamic HTML: The Definitive Reference. If you own either of these books, the JavaScript & DHTML Cookbook is a must.

JavaScript and DHTML Cookbook Danny Goodman,2007-08-08 Offers problems, solutions, and examples for readers using JavaScript and DHTML in Web pages, covering topics such as interactive forms, user-friendly navigation, dynamic and stationary content, and frames.
