2028 End Gabriel Erb,2019-07-12 God created a game - it's called The Game of Life. Planet Earth is the playing field, the 10 love commandments are the rules, and we humans are the players who can win or lose. The game is played by two teams, like the game of football. One team's head coach is Jesus and the other team's head coach is Satan. All of us on earth are playing for one of these two teams! Gabriel Ansley Erb wrote the book 2028 END in order to fully elucidate God's game clock scenario for The Game of Life as contained in the game's handbook, the Holy Bible. The handbook says, God declared the end from the beginning (Isaiah 46:10) by using 7 days in the creation event. Each 24 hour creation day foretold of a future 1,000 year period for a total 7,000 year plan God had for The Game of Life to be played on planet earth. And amazingly, to confirm this is all true, God hid a secret prophesy in each creation day foretelling the greatest event He had planned to occur in that day's future millennium!Consequently, Creation day 1 foretold Adam & Eve's fall, which was fulfilled during earth's 1st millennium. Creation day 2 foretold Noah's global flood, which was fulfilled during earth's 2nd millennium. Creation day 3 foretold Moses' Red Sea parting, which was fulfilled during earth's 3rd millennium. Creation day 4 foretold of John the Baptist & Jesus Christ, and so they lived and died during earth's 4th millennium. And the prophecies continue with each Creation day!Gabriel proves all of the above, carefully revealing the

3

prophetic Scriptures as well as the fulfillment
Scriptures. Then he reveals a dozen Scriptures
proving Christ died earth's 4,000 year and will
return earth's 6,000 year. Finally, he proves
Christ died Feast of Passover AD 28 and will
return Feast of Trumpets 2028. For those who read
this book, it is an open and shut case: The Game
of Life will end 2,000 years from the year of
Christ's death on the cross - AD 2028.

  The 2030 Spike Colin Mason,2013-06-17 The clock
is relentlessly ticking! Our world teeters on a
knife-edge between a peaceful and prosperous
future for all, and a dark winter of death and
destruction that threatens to smother the light of
civilization. Within 30 years, in the 2030 decade,
six powerful 'drivers' will converge with
unprecedented force in a statistical spike that
could tear humanity apart and plunge the world
into a new Dark Age. Depleted fuel supplies,
massive population growth, poverty, global climate
change, famine, growing water shortages and
international lawlessness are on a crash course
with potentially catastrophic consequences. In the
face of both doomsaying and denial over the state
of our world, Colin Mason cuts through the
rhetoric and reams of conflicting data to muster
the evidence to illustrate a broad picture of the
world as it is, and our possible futures.
Ultimately his message is clear; we must act
decisively, collectively and immediately to alter
the trajectory of humanity away from catastrophe.
Offering over 100 priorities for immediate action,
The 2030 Spike serves as a guidebook for humanity
through the treacherous minefields and wastelands

ahead to a bright, peaceful and prosperous future in which all humans have the opportunity to thrive and build a better civilization. This book is powerful and essential reading for all people concerned with the future of humanity and planet earth.

Fundamentals of ActionScript 3.0 Doug Winnie,2011-07-11 Adobe Flash Professional is the most popular software available for creating animations for the Web. Most people start using Flash to create vector-based animations that output small file sizes perfect for the Web. Later they want to branch out into creating rich interactive experiences for websites and mobile devices, and for that they need to learn ActionScript. Doug Winnie draws on the experience he's gained from his years as an educator to teach not only what ActionScript can do, but also to show how the code works. This gives the reader a deeper understanding of how ActionScript functions, and gives them the power to come up with original solutions when creating their own projects. Doug's book dives right into the concepts of manipulating Flash objects and the fundamentals of functions and mathematical operators. After presenting events and using scripts to control the Flash timeline, classes and conditionals are covered in depth. The final part of the book covers creating desktop applications with Adobe AIR, developing mobile applications, and working with external code libraries. Real-world projects are sprinkled generously throughout the book and Appendices include information on debugging, deciphering documentation, and using Adobe Flash Builder as an ActionScript development environment.
