Design and Plan in the Country House Andor Harvey Gomme,Austin Harvey Gomme,Alison Maguire,Maguire Alison,2008-01-01 The way a man thinks about his day-to-day living and the needs of his household reveals a great deal about his ambitions, his idea of himself, and his role in the community. And his house or castle offers many clues to his habits as well as those of the members of his household. This intriguing book explores the evolution of country house plans throughout Britain and Ireland, from medieval times to the eighteenth century. With photographs and detailed architectural plans of each house under discussion, the book presents a whole range of new insights into how these homes were designed and what their varied designs tell us about the lives of their residents. Starting with fortified medieval tower houses, the book traces patterns that developed and sometimes repeated in country house design over the centuries. It discusses who slept in the bedchambers, where food was prepared, how rooms were arranged for official and private activities, what towers signified, and more. Groundbreaking in its depth, the volume offers a rare tour of country houses for scholar and general reader alike.

Get Your House Right Marianne Cusato, Ben Pentreath, Richard Sammons, Leon Krier, 2011-08-09 "[A] much needed book both for homeowners who want a beautiful and well proportioned house and for the professionals who help them to realize that dream." —Sarah Susanka, FAIA, architect and author of *The Not So Big* series and *Home by Design* Even as oversized McMansions continue to elbow their way into tiny lots nationwide, a much different trend has taken shape. This return to traditional architectural principles venerates qualities that once were taken for granted in home design: structural common sense, aesthetics of form, appropriateness to a neighborhood, and even sustainability. Marianne Cusato, creator of the award-winning Katrina Cottages, has authored and illustrated this definitive guide to what makes houses look and feel right—to the eye and to the soul. She teaches us the language and grammar of classical architecture, revealing how balance, harmony, and detail all contribute to creating a home that will be loved rather than tolerated. And she takes us through the dos and don'ts of every element of home design, from dormers to doorways to columns. Integral to the book are its hundreds of elegant line drawings—clearly rendering the varieties of lintels and cornices, arches and eaves, and displaying "avoid" and "use" versions of the same elements side by side. "This 'Rosetta stone' of design will guarantee Cusato a place in the history of twenty-first century American architecture." —The Philadelphia Inquirer "[Cusato] provides a vision of how we live together and build on our planet, and points out the consequences of flawed building practices not only to our environment, but to our spirit and our soul." —Michael Lykoudis, Dean, University of Notre Dame School of Architecture

The Architecture of Country Houses Andrew J. Downing, 2013-01-17 Throughout the early Victorian period, American domestic architecture was dominated by the ideas and designs of Andrew Jackson Downing (1815–52). Downing, who was America's first important landscape architect, was instrumental in establishing a well-styled, efficient, yet low-priced house that offered many features that previously only mansions could provide. His designs were widely spread both by

his books and by periodical republication. Downing's most important work was his *Architecture of Country Houses* (1850), which passed through nine editions by 1866 and served as the stylebook for tens, perhaps hundreds of thousands of homes throughout the Eastern United States. It contains 34 designs for model homes (country house in this context simply meaning a separate house, as opposed to a town house), with elevations, floor plans, and discussion of design, construction, and function. The English country house of the period is the ground style, upon which other styles are overlaid; designs showing Gothic, French, Italian, and Elizabethan styles allow the user considerable choice. In many ways these designs form one of the first steps toward the modern house, with avowed emphasis on function and convenience, expression of personality, Catholicism of taste, and concord with environment. Decoration, of course, was not frowned upon. Most valuable today is the author's full, thorough discussion of many other aspects of the early Victorian house: aesthetic concerns of architecture, adjustment to locality, materials, construction, costs, floor plan, roofing, shingling, painting, chimneys, and fireplaces, interior woodwork, wallpapering, decoration, furnishing, ventilation, sanitation, central heating, and landscaping. Since most of the houses concerned have been destroyed or altered, and practically no living situations have been preserved, this book is indispensable to everyone interested in early American culture, interior decoration, restoration, or Victorian architecture. It is far and away the richest source for the period.
