Every parent would do anything to keep their children away from all harms and injuries. You might try to be like a protective shield for your child all the time, but sometimes it becomes impossible for you to guard your kids against the odds. Your little champions cannot afford to stay in one place. Children are naturally intrigued by every object they come across. It’s their intrinsic ability to explore everything. The curiosity that dwells inside them makes them kind of restless (we’ve all been kids so it’s understandable). No matter how many times you forbid your kids from doing dangerous activities or touching harmful things, they simply won’t stop doing it. You can’t keep an eye on your kids all day, can you? Once they’re out of your sight, they might up end up in some danger. What would you do if your baby (God forbid) or someone else’s baby starts choking after having ingested a coin? What would you do to save that baby? Do you think you’re prepared to cope with that emergency? If not, then you need not worry. This book is all you need to keep your baby safe in any emergency. This book is a complete guide for you that can help you manage any emergency situation that you and your baby might face. Calling for emergency help is certainly the first thing to do, but you can’t wait for help and stand there and do nothing. After reading this book, you’ll be equipped with different techniques and maneuvers that are simple, yet effective, and can prove to be the difference between your baby’s safety and danger. We don’t mean to startle you, but being prepared is always better than being sorry. So take a deep breath here and start with us on your journey to become an even better mother/father to your children.
