National Constitutions and EU Integration Stefan Griller,Lina Papadopoulou,Roman Puff,2022-08-25 Do individual constitutions, and the legal cultures underlying them, pose an obstacle to future EU integration? This ambitious collection brings together reports from all the European Member States, systematically setting out their individual constitutional guarantees. In doing so, it tracks possible roadblocks to the future evolution of European integration. Written by recognised authorities in each Member State, it offers an authoritative and rigorous overview of the European Union's constitutional landscape. Its single-structure approach allows for comparison while maintaining consistency. It will become the standard reference work for academics, students and practitioners in the field of European Union law and integration.

European Drug Index Niels F. Muller,Rudolf P. Dessing,2022-03-07 Many health care providers are frequently dealing with problems related to the identification and interpretation of medicines and prescriptions of foreign origin. Health authorities, customs and travel agencies also encounter such problems, which are related to the increasing mobility of the European population. Thus the need for a European Drug Index is obvious. The EDI provides extended information for practitioners confronted with the enormous number of drug names available on the European pharmaceutical market. This market is increasing due to the rapidly changing palette of countries and economic restrictions in Europe. The listings have been derived from drug data sources from the increased number of participating countries in this second edition. Each item starts with a trade name, in alphabetical order, followed by (depending on the original source) dosage forms, strength, volume (if applicable), and generic name(s) of the active principle(s) in a random sequence. The item is concluded by the Anatomical Therapeutic Chemical (ATC) classification (when made available by the original source) and a code for the country of origin.

Good Administration and the Council of Europe Ulrich Stelkens,Agné Andrijauskaitė,2020-09-11 Good Administration and the Council of Europe: Law, Principles, and Effectiveness examines the existence and effectiveness of written and unwritten standards of good administration developed within the framework of the Council of Europe (CoE) and in the case law of the European Court of Human Rights. These standards - called 'pan- European general principles of good administration' - cover the entire range of general organizational, procedural, and substantive legal institutions meant to ensure a democratically legitimized, open, and transparent administration respecting the rule of law. They are about the 'limiting function' of administrative law: its function to protect individuals from arbitrary power, to legitimize administrative action, and to combat corruption. This book analyses the sources and functions of the pan-European general principles of good administration and seeks to uncover how deeply they are rooted in the domestic legal systems of the CoE Member States. It comprises 28 country reports dedicated to an in-depth exploration of the impact of these standards on the national legal systems of the Member States written by respective experts on these systems. It argues that the pan-European general principles of good administration lead to a certain harmonization of the legal orders of the Member States with regard to the limiting function of administrative law despite the many fundamental differences between their administrative and legal systems. It comes to the further conclusion that the pan-European general principles of good administration can be considered as a concretization of the founding values of the CoE and describes the 'administrative law obligations' a Member State entered into when joining the CoE.

ECSCW 2009: Proceedings of the 11th European Conference on Computer Supported Cooperative Work, 7-11 September 2009, Vienna, Austria Ina Wagner,Hilda Tellioglu,Ellen Balka,Carla Simone,Luigina Ciolfi,2009-08-19 This volume presents the proceedings of ECSCW'09, the 11th European Conference on Computer Supported Cooperative Work. Each conference offers an occasion to critically review our research field, which has been multidisciplinary and committed to high scientific standards, both theoretical and methodological, from its beginning. These proceedings represent discussions and contributions to ongoing challenges. One challenge comes from emerging new technologies connected to 'social computing', gaming, as well as applications supporting citizen participation in their communities. As boundaries between home and work erode with the increased movement of work into home environments, and new applications further blur the once separate conceptions of work and leisure, our intellectual community faces challenges in the ways we think about and study work. Other challenges result from transformations of the world of work itself and the role of IT in these. They have been taken up in in-depth studies of design practice, software development, and manufacturing, as well as in the growing body of research on health care contexts and applications. Finally, there is the question of what is the European perspective in our community and whether it is worthwhile to anchor our research more firmly in such a perspective. Of high relevance to our field is the strong grounding of technology development in an understanding of human activity. The nineteen full papers, four short papers and one discussion paper selected for this conference deal with and reflect on some of these challenges, thus representing the lively debate currently ongoing in our field of research.

EU Cohesion Policy Nicola F. Dotti,Ida Musiałkowska,Sonia De Gregorio Hurtado,Julia Walczyk,2024-01-18 This engaging and topical book comprehensively explores the complexities surrounding the EU Cohesion Policy, which has been addressing regional and urban development across Europe since the 1980s. Adopting a multidisciplinary approach, it not only considers the goals of this long-term investment policy, which is to reduce territorial disparities between Member States and their regions, but also considers the role it plays in the European integration process and the challenges the EU will face in its future.

European Resuscitation Council Guidelines for Resuscitation European Resuscitation Council,1998 This book represents the most up-to-date guidelines for resuscitation which have been brought forward in Europe. These guidelines were produced in accordance with ILCOR (International Liaison Committee on Resuscitation). This is the first time all these guidelines have been presented together in one publication. They also include the complimentary guidelines: management of the airway and ventilation during resuscitation, management of arrhythmias associated with cardiac arrest, the prehospital management of acute heart attacks and ethics in out-of-hospital cardiopulmonary resuscitation. These guidelines have in principle been agreed upon by Australia, Southern Africa, and part of South America. This book will provide the basis for teachers of resuscitation to the lay public, nurses and paramedical staff and physicians of all specialties.

The EU Better Regulation Agenda Sacha Garben,Inge Govaere,2018-05-17 Better Regulation in the EU is a perennial and topical question which has important implications for the future direction of EU law. While actions directed at improving the quality and accessibility of EU regulation are not novel, in recent years the Better Regulation Agenda has significantly affected the structural organisation and day-to-day operation of the EU legislative process. Yet, many questions about the future of the Agenda remain, not least in light of Brexit. Exploring the Better Regulation Agenda (and its relation to the overall EU legal and political order) necessitates an integrated, interdisciplinary approach. This edited volume presents insights from economics, political science and legal scholarship. Furthermore, to allow full understanding, it examines institutional practice, where the Agenda is made and shaped on a daily basis. Hence, the book features contributions from the perspective of the work of the main EU institutions: the European Commission, the Parliament, the Council and the Court of Justice. This results in a seminal overview of the subject, of interest to scholars and practitioners alike.

Self-Declaration in the Legal Recognition of Gender Chris Dietz,2022-10-21 Self-Declaration in the Legal Recognition of Gender examines the impact of legislation premised upon the principle of 'self-declaration' of legal gender status. Existing doctrinal and comparative analyses have tended to come out strongly in favour of, or against, self-declaration. This book offers a socio-legal alternative which focuses on how self-declaration is experienced, on an embodied level, by trans and gender diverse people. It presents research conducted in Denmark, which became the first European state to adopt self-declaration in June 2014. By analysing Danish law through a Foucauldian framework which brings together socio-, feminist, and trans legal scholarship on embodiment and jurisdiction, the book offers the first empirically based and theoretically informed analysis of self-declaration. It draws upon legal consciousness, affect theory, vulnerability, and governmentality literatures to argue that the jurisdictional boundaries which existed between law and medicine were maintained

throughout the reform process. This limited the impact of the legislation, enabling access to health care to be restricted in the same year in which amending legal gender status was liberalised. As the list of states that have adopted self-declaration increases, this intervention offers activists and policymakers insights which might shape how they respond to similar reform proposals in the future. A timely and important assessment, this book will appeal to researchers and practitioners working in trans, gender, feminist legal, and socio-legal studies.

The Unitary EU Patent System Justine Pila,Christopher Wadlow,2015-03-26 The purpose of this book is to explore the key substantive, methodological, and institutional issues raised by the proposed unitary EU patent system contained in EU Regulations 1257/2012 and 1260/2012 and the Unified Patent Court Agreement 2013. The originality of this work lies in its individual contributions and uniquely broad approach, taking six different (historical, constitutional, international, competition, institutional and forward-looking) perspectives on the proposed patent system. This means that the book offers a multi-authored and all round legal appraisal of the proposed unitary system from experts in patent law, EU constitutional law, private international law, and competition law, as well as leading figures from the worlds of legal practice, the bench, and the European Patent Office. The unitary patent system raises issues of foundational importance in the fields of patent and intellectual property law, EU law and legal harmonization, which it is the purpose of the book to engage with. This is a work which will enjoy wide and enduring interest among academics, policy makers and decision makers/practitioners working in patent law, intellectual property law, legal harmonization, and EU law.
