Scientific Investigation of Copies, Fakes and Forgeries Paul Craddock,2009-02-04 The faking and forgery of works of art and antiquities is probably now more extensive than ever before. The frauds are aided by new technologies, from ink jet printers to epoxy resins, and driven by the astronomic prices realised on the global market. This book aims to provide a comprehensive survey of the subject over a wide range of materials, emphasising how the fakes and forgeries are produced and how they may be detected by technical and scientific examination. The subject is exemplified by numerous case studies, some turning out not to be as conclusive as is sometimes believed. The book is aimed at those likely to have a serious interest in these investigations, be they curator, collector, conservator or scientist. Paul Craddock has recently retired from the Department of Conservation, Documentation and Science at the British Museum, where he was a materials scientist.

Using Creative Arts-Based Research Methods in School Settings Suzanne Everley, 2021-05-04

This book considers the practical challenges likely to be faced when conducting research in the reality of busy educational contexts. It presents an understanding of the perceived efficacy and accessibility of creative research approaches from the perspective of participants as well as the researcher. The book addresses key concerns in research that seeks to understand children's experiences in terms of creativity in thinking, methods and analysis, the school setting as a socially constructed environment, and power relations in experience and data production. Written in an accessible style that provides a representation of the evolution of arts-based research methods, it includes illustrative case studies, practical suggestions and guidance on further reading. This book will assist higher education researchers seeking to represent subjective experience and empower participants in the creative research process. This book will be vital reading for researchers completing projects within primary and secondary school settings, as well as those involved in teaching and studying at postgraduate level within MA Education programmes. It will also be of interest to students of research methods at undergraduate level.

Stuck in Neutral Terry Trueman, 2012-07-24 Shawn McDaniel's life is not what it may seem to anyone looking at him. He is glued to his wheelchair, unable to voluntarily move a muscle—he can't even move his eyes. For all Shawn's father knows, his son may be suffering. Shawn may want a release. And as long as he is unable to communicate his true feelings to his father, Shawn's life is in danger. To the world, Shawn's senses seem dead. Within these pages, however, we meet a side of him that no one else has seen—a spirit that is rich beyond imagining, breathing life. Supports the Common Core State Standards

Love Scenes Bridget Morrissey, 2021-06-22 A BuzzFeed Best Book of June A heart-stirring, tear-inducing read you won't want to put down."—Emily Henry, New York Times bestselling author of *Beach Read* Acting like she's in love with her handsome nightmare of a co-star—in a movie directed and produced by her complicated Hollywood royalty family—is Sloane's job. But what happens when the lines between script and reality get blurred? Out-of-work actress Sloane Ford is in desperate need of something to do after losing her steady TV gig. When her famous family ropes her into working as a producer on their World War II-era romance, they neglect to mention that the film will be headlined by Joseph Donovan, her least favorite former co-star of all time. The roguish actor made her life a living hell the last time they worked together, using his movie star good looks and Irish charm to cover for his erratic professional behavior. On their new film set, he promises he's different now, but Sloane is far from convinced. As filming gets underway, it becomes clear that anything that can go wrong will go wrong. When the lead actress is abruptly fired, Sloane agrees to step in and take over the role, and she starts to remember why she fell in love with acting in the first place. On camera, she and Joseph share an electric chemistry. Off camera, they've been honing their characters and, much to Sloane's surprise, growing closer. But playing the role of a woman in love with Joseph Donovan is a dangerous business, and the more time they spend together, the less Sloane can tell what's real between them, and what's just for show.

Creative Stained Glass Christine Kellmann Stevenson, 2007 From in-a-weekend pieces to intricate designs that take more time, these 27 stained-glass projects shine with light, color, and texture, thanks to the great new glasses on the market today. More than 70 color photos present the techniques, all worked with easy-to-acquire, modern, and efficient tools. Try two methods of cutting, with or without making a pattern. Use overlays, plating, and patinas to color the finish, creatively combine different techniques, and see how to work with brass and copper came. Beginners can start on small glass panels and build the skills to make a flat fan lamp, a mirror suitable for the wall or in a window, and more.

The Circus Fire Stewart O'Nan, 2008-12-10 The acclaimed author of *Emily, Alone* and *Henry, Himself* brings all his narrative gifts to bear on this gripping account of tragedy and heroism—the great Hartford circus fire of 1944. It was a midsummer afternoon, halfway through a Ringling Brothers

Barnum and Bailey Circus performance, when the big top caught fire. The tent had been waterproofed with a mixture of paraffin and gasoline; in seconds it was burning out of control. More than 8,000 people were trapped inside, and the ensuing disaster would eventually take 167 lives. Steward O'Nan brings all his narrative gifts to bear on this gripping account of the great Hartford circus fire of 1944. Drawing on interviews with hundreds of survivors, O'Nan skillfully re-creates the horrific events and illuminates the psychological oddities of human behavior under stress: the mad scramble for the exits; the perilous effort to maneuver animals out of danger; the hero who tossed dozens of children to safety before being trampled to death. Brilliantly constructed and exceptionally moving, *The Circus Fire* is history at its most compelling.
