**Cranach et son temps** Naïma Ghermani,Établissement public de la Réunion des musées nationaux et du Grand Palais des Champs-Élysées (France).,2011 Originaire de la petite ville de Kronach, au nord-ouest de l'actuelle Bavière, dont il tire son patronyme, le peintre, graveur et dessinateur Lucas Cranach l'Ancien (1472-1553) fait partie des artistes majeurs de la Renaissance allemande. Après avoir brillamment débuté sa carrière à Vienne vers 1500, l'artiste s'installe à la cour de Frédéric III de Saxe et réalise de nombreux portraits, tableaux religieux, peintures mythologiques et décors de fêtes. Au moment de la Réforme luthérienne, Cranach met tous ses talents au service des idées religieuses et politiques de Frédéric de Saxe, en créant des modèles de représentations pour l'enseignement de la nouvelle foi, développant un lien inédit entre Ecriture sainte et image. Ainsi, ses nus féminins aux savantes allusions s'affirment-ils comme des peintures politiques ou comme des scènes érotiques? Cet album montre comment, grâce à son art et à son érudition, Cranach invente une nouvelle manière de voir pour une nouvelle manière de croire .

of Connoisseurship explores the ‘who’, ‘where’ and ‘how’ of judging Old Master paintings in the nineteenth-century British art trade, via a comparison of family art dealers Thomas Agnew & Sons (“Agnew’s) and London’s National Gallery.

The Antonio II Badile Album of Drawings: The Origins of Collecting Drawings in Early Modern Northern Italy Evelyn Karet,2017-07-05 Evelyn Karet's in-depth study of the Antonio II Badile Album - the earliest known example of an art collection pasted onto the pages of a book - is both focused and broad in its appeal to those interested in the early modern era. The provenance of the album is traced from its assemblage to the seventeenth-century collection of Conte Lodovico Moscardo to its dismantling by the dealer Francis Matthiesen in the 1950s, establishing that the volume conserved in the Frits Lugt Collection is not an original but a replica produced by Matthiesen. Although

Antonio II must be celebrated as the collector of the drawings, new paleographic analysis has identified the actual compiler of the album after Antonio's death providing a terminus post quem in the late 1530s or early 1540s. Karet enlarges the focus from the album itself to the historic tradition of collecting drawings in northern Italy in the early modern era before Vasari, for which the album provides a new point of reference. Throughout the book, Karet discusses the Badile family, examines the individual drawings in the book, investigates the contacts between artists and humanists, their rich, diverse collections and the humanist mind-set that fostered the appreciation of drawings. She explores notable early drawing collections in northern Italy and the role of northern Italy as a center of collection in the sixteenth and seventeenth centuries. The book concludes with two appendices: a reconstruction of the original album, including a discussion of the reconstruction process, suggestions about what the album originally looked like, and a page-by-page guide to its contents; and a detailed analysis of Francis Matthiesen's career. This book opens up new areas of inquiry into an overlooked subject.
