Supertall: How the World's Tallest Buildings Are Reshaping Our Cities and Our Lives Stefan Al,2022-04-12 The global boom in skyscrapers—why it's happening now, how they're made, and what they do to cities and people. We are living in a new urban age, and its most tangible expression is the “supertall”: megastructures that are dramatically bigger, higher, and more ambitious than any in history. Cities around the world are racing to build the first mile-high building, stretching the limits of engineering and design as never before. In this fascinating work of urban history and design, TED resident Stefan Al—himself an experienced architect—explores the factors that have led to this worldwide boom. He reveals the marvelous and underappreciated feats of engineering that make today's supertalls a reality, from double-decker elevators that silently move up to 50 miles per hour to the sophisticated blend of polymers and steel fibers that enables concrete to withstand 8,000 tons of pressure per square meter. Taking readers behind the scenes of the building and design of remarkable megastructures, both from the past (the Empire State Building, St. Paul's Cathedral, the Eiffel Tower) and the present (Dubai's Burj Khalifa, London's Shard, Shanghai Tower), Al demonstrates the impact of these innovations. Yet while the supertall is undoubtedly a testament to great technological victories, it can come at an environmental and social cost. Focusing on four global cities—London, New York, Hong Kong, and Singapore—Al examines the risks of wealth inequality, carbon emissions, and contagion that stem from supertalls. And he uncovers the latest innovations in sustainable building, from skyscrapers made of wood to tree-covered buildings, that promise to yield a better urban future. Featuring more than thirty architectural drawings, Supertall is both a fascinating exploration of our greatest accomplishments and a powerful argument for a more equitable way forward.

The Max Freeman Mysteries Volume Two Jonathon King,2018-10-09 The South Florida PI is back in the Edgar Award-winning series from a national bestselling author and “the master of the high-stakes thriller” (Michael Connelly). National bestselling author Jonathon King continues his Edgar Award-winning series that follows a tormented ex-cop from Philadelphia to South Florida on a quest to earn redemption from his dark past. “Whether taking us to the dark corners of the Everglades or the hard streets of Philadelphia, King's writing is gritty, vivid, and suspenseful” (Harlan Coben). A Killing Night: After three young female bartenders are murdered in Miami, and another goes missing in Philadelphia, private investigator Max Freeman is hired—by his ex-girlfriend Sherry—to look into the deaths. He accepts the job grudgingly, especially since Sherry is convinced the killer is a retired police officer who once saved Freeman's life back in Philly. “Compelling from start to finish.” —The Miami Herald Acts of Nature: Max and Sherry's vacation in the Everglades ends abruptly when Hurricane Simone slams into the Sunshine State, leaving them stranded in the swamp and forced to contend with opportunistic crooks looking to benefit from the disaster and hired muscle from a powerful oil company hoping to protect a lethal secret—regardless of who stands in the way. “An action-packed glide through the Glades.” —South Florida Sun-Sentinel Midnight Guardians: Freeman takes on a case involving a conspiracy to defraud Medicare—but he quickly discovers there's more to it than a simple scam. Soon the former Philadelphia cop is calling upon his old street instincts when an ex-drug kingpin known as the Brown Man turns up—and Freeman's girlfriend, Det. Sherry Richards, is put in harm's way. “Captivating.” —Publishers Weekly Don't Lose Her: When a pregnant judge is abducted while presiding over the extradition hearing of a notorious Columbian drug lord, Freeman follows her trail into the Everglades to save her and her unborn child before it's too late. “This book moves with relentless abandon.”
