I Wouldn't Start from Here Andrew Mueller, 2009-03-01 What is a jaded rock journalist doing dodging landmines to talk to mercenaries and terrorists? And what kind of conversation can a man who prefers hunting for perfect three-minute pop songs and tubes of beer have with devotees of fasting and ferocity? Sarajevo. Jerusalem. Kabul. Belfast. Kosovo. Gaza. Basra. New York City. Every place where recent history advertises the stubbornness, intolerance, bloodlust, and cowardice that sully our collective record, there the intrepid Andrew Mueller goes, skidding around the globe from failed state to ravaged war zone to desolate no-man's-land to try to unpick why we humans seem so prone to plucking war from the jaws of peace. En route, he meets various influential panjandruns (Al Gore, Gerry Adams, Bono, Paddy Ashdown), any number of assorted warlords and revolutionaries, and a sprinkling of peacemakers and do-gooders. He also manages to get shot at, locked up, and taken on a tour by one of the world's most infamous terrorist organizations. It's like a Bond film with much, much less sex, and might appear for that and other reasons to be substantially a story of disappointment. Yet it's a surprisingly sunny book given the mire in which he finds himself.

Confessions of a Recovering Environmentalist and Other Essays Paul Kingsnorth, 2017-08-01 A provocative and urgent essay collection that asks how we can live with hope in “an age of ecocide” Paul Kingsnorth was once an activist—an ardent environmentalist. He fought against rampant development and the depredations of a corporate world that seemed hell-bent on ignoring a looming climate crisis in its relentless pursuit of profit. But as the environmental movement began to focus on “sustainability” rather than the defense of wild places for their own sake and as global conditions worsened, he grew disenchanted with the movement that he once embraced. He gave up what he saw as the false hope that residents of the First World would ever make the kind of sacrifices that might avert the severe consequences of climate change. Full of grief and fury as well as passionate, lyrical evocations of nature and the wild, *Confessions of a Recovering Environmentalist* gathers the wave-making essays that have charted the change in Kingsnorth's thinking. In them he articulates a new vision that he calls “dark ecology,” which stands firmly in opposition to the belief that technology can save us, and he argues for a renewed balance between the human and nonhuman worlds. This iconoclastic, fearless, and ultimately hopeful book, which includes the much-discussed “Uncivilization” manifesto, asks hard questions about how we've lived and how we should live.

To Build a Fire Jack London, 2008 Describes the experiences of a newcomer to the Yukon when he attempts to hike through the snow to reach a mining claim.

The Wild Robot Peter Brown, 2020-04-07 Roz the robot discovers that she is alone on a remote, wild island with no memory of where she is from or why she is there, and her only hope of survival is to try to learn about her new environment from the island's hostile inhabitants.

Indistractable Nir Eyal, 2019-09-10 Indistractable provides a framework that will deliver the focus you need to get results. —James Clear, author of *Atomic Habits* If you value your time, your focus, or your relationships, this book is essential reading. I'm putting these ideas into practice. —Jonathan Haidt, author of *The Righteous Mind* National Bestseller Winner of the Outstanding Works of Literature (OWL) Award Included in the Top 5 Best Personal Development Books of the Year by Audible Included in the Top 20 Best Business and Leadership Books of the Year by Amazon Featured in The Amazon Book Review Newsletter, January 2020 Goodreads Best Science & Technology of 2019 Finalist You sit down at your desk to work on an important project, but a notification on your phone interrupts your morning. Later, as you're about to get back to work, a colleague taps you on the shoulder to chat. At home, screens get in the way of quality time with your family. Another day goes by, and once again, your most important personal

and professional goals are put on hold. What would be possible if you followed through on your best intentions? What could you accomplish if you could stay focused? What if you had the power to become undistractable? International bestselling author, former Stanford lecturer, and behavioral design expert, Nir Eyal, wrote Silicon Valley's handbook for making technology habit-forming. Five years after publishing *Hooked*, Eyal reveals distraction's Achilles' heel in his groundbreaking new book. In *Indistractable*, Eyal reveals the hidden psychology driving us to distraction. He describes why solving the problem is not as simple as swearing off our devices: Abstinence is impractical and often makes us want more. Eyal lays bare the secret of finally doing what you say you will do with a four-step, research-backed model. *Indistractable* reveals the key to getting the best out of technology, without letting it get the best of us. Inside, Eyal overturns conventional wisdom and reveals:

- Why distraction at work is a symptom of a dysfunctional company culture—and how to fix it
- What really drives human behavior and why time management is pain management
- Why your relationships (and your sex life) depend on you becoming undistractable
- How to raise undistractable children in an increasingly distracting world

Empowering and optimistic, *Indistractable* provides practical, novel techniques to control your time and attention—helping you live the life you really want.

Slavery by Another Name Douglas A. Blackmon,2012-10-04 A Pulitzer Prize-winning history of the mistreatment of black Americans. In this 'precise and eloquent work' - as described in its Pulitzer Prize citation - Douglas A. Blackmon brings to light one of the most shameful chapters in American history - an 'Age of Neoslavery' that thrived in the aftermath of the Civil War through the dawn of World War II. Using a vast record of original documents and personal narratives, Blackmon unearths the lost stories of slaves and their descendants who journeyed into freedom after the Emancipation Proclamation and then back into the shadow of involuntary servitude thereafter. By turns moving, sobering and shocking, this unprecedented account reveals these stories, the companies that profited the most from neoslavery, and the insidious legacy of racism that reverberates today.

Dark Ecology Timothy Morton,2016-04-12 Timothy Morton argues that ecological awareness in the present Anthropocene era takes the form of a strange loop or Möbius strip, twisted to have only one side. Deckard travels this oedipal path in *Blade Runner* (1982) when he learns that he might be the enemy he has been ordered to pursue. Ecological awareness takes this shape because ecological phenomena have a loop form that is also fundamental to the structure of how things are. The logistics of agricultural society resulted in global warming and hardwired dangerous ideas about life-forms into the human mind. Dark ecology puts us in an uncanny position of radical self-knowledge, illuminating our place in the biosphere and our belonging to a species in a sense that is far less obvious than we like to think. Morton explores the logical foundations of the ecological crisis, which is suffused with the melancholy and negativity of coexistence yet evolving, as we explore its loop form, into something playful, anarchic, and comedic. His work is a skilled fusion of humanities and scientific scholarship, incorporating the theories and findings of philosophy, anthropology, literature, ecology, biology, and physics. Morton hopes to reestablish our ties to nonhuman beings and to help us rediscover the playfulness and joy that can brighten the dark, strange loop we traverse.

Slumach's Gold Rick Antonson,Brian Antonson,2011-03-01 Slumach’s Gold chronicles what is possibly Canada’s greatest lost-mine story. It searches out the truth behind a Salish man’s hanging for murder in 1891 and tracks the intriguing legend about him that grew after his death. It was a legend that turned into a drama of international fascination when Slumach—the hanged criminal—was mysteriously linked to gold nuggets “the size of walnuts.” The stories claimed that Slumach had placed a curse on a hidden motherlode to protect it from interlopers and trespassers just before he plunged to his death “at the wrong end of a five-strand rope.” Although many have attempted to find Slumach’s gold over the past 100 years, following tantalizing clues that are part of the legend itself, none have succeeded—or have they? Rick Antonson, Mary Trainer and Brian Antonson have diligently sifted through history and myth, separating fact from fiction, but leaving the legend intact—along with the promise of gold yet to be found by some future gold seeker.
