The Ringtone Dialectic Sumanth Gopinath, 2013-07-19 The rise and fall of the ringtone industry and its effect on mobile entertainment, music, television, film, and politics. A decade ago, the customizable ringtone was ubiquitous. Almost any crowd of cell phone owners could produce a carillon of tinkly, beeping, synthy, musicalized ringer signals. Ringtones quickly became a multi-billion-dollar global industry and almost as quickly faded away. In *The Ringtone Dialectic*, Sumanth Gopinath charts the rise and fall of the ringtone economy and assesses its effect on cultural production. Gopinath describes the technical and economic structure of the ringtone industry, considering the transformation of ringtones from monophonic, single-line synthesizer files to polyphonic MIDI files to digital sound files and the concomitant change in the nature of capital and rent accumulation within the industry. He discusses sociocultural practices that seemed to wane as a result of these shifts, including ringtone labor, certain forms of musical notation and representation, and the creation of musical and artistic works quoting ringtones. Gopinath examines "declines," "reversals," and "revivals" of cultural forms associated with the ringtone and its changes, including the Crazy Frog fad, the use of ringtones in political movements (as in the Philippine "Gloriagate" scandal), the ringtone's narrative function in film and television (including its striking use in the films of the Chinese director Jia Zhangke), and the ringtone's relation to pop music (including possible race and class aspects of ringtone consumption). Finally, Gopinath considers the attempt to rebrand ringtones as "mobile music" and the emergence of cloud computing.

Euroclash Neil Fligstein, 2008-04-10 The European Union's market integration project has dramatically altered economic activity around Europe. This book presents extensive evidence on how trade has increased, jobs have been created, and European business has been reorganized. The changes in the economy have been accompanied by dramatic changes in how people from different societies interact. This book argues provocatively that these changes have produced a truly transnational-European-society. The book explores the nature of that society and its relationship to the creation of a European identity, popular culture, and politics. Much of the current political conflict around Europe can be attributed to who is and who is not involved in European society. Business owners, managers, professionals, white-collar workers, the educated, and the young have all benefited from European economic integration, specifically by interacting more and more with their counterparts in other societies. They tend to think of themselves as Europeans. Older, poorer, less educated, and blue-collar citizens have benefited less. They view the EU as intrusive on national sovereignty, or they fear its pro-business orientation will overwhelm the national welfare states. They have maintained national identities. There is a third group of mainly-middle class citizens who see the EU in mostly positive terms and sometimes-but not always-think of themselves as Europeans. It is this swing group that is most critical for the future of the European project. If they favor more European cooperation, politicians will oblige. But, if they prefer that policies remain wedded to the nation, European cooperation will stall.

More Weird (but true) Short Stories Darla Fisher, 2022-08-01 This is the second in a series of short story books by the author, an easy-to-read book and hard to put down. The stories are engaging and sometimes hard to believe, yet true! It is an interesting travel through the strange and occult. This author shares with us in this work some very personal happenings in her life, which are unusual. Many of us have experienced similar things but are reluctant to talk about them. How many of us have received knowledge of future events? Or we have a feeling of just knowing when there is no obvious reason to believe what we feel. Many of the strange happenings reflected in this book were finally confirmed. However, there are some reflected herein that have yet to be confirmed, such as the death of the author. She received knowledge about the circumstances surrounding her death. We can only wait and see if that will happen.

The Economics of Symbolic Exchange Alexander Dolgin, 2008-09-17 Alexander Dolgin's *Economics of Symbolic Exchange* is in reality not one but three books, and although these semantic layers are interlinked, the reader will need to choose between the different vectors and modalities. One clearly evident dimension is research. Certain authors introduce quite new intellectual approaches into scientific debate. This requires a special frame of mind and a searching curiosity about social reality. Carl Gustav Jung identified a phenomenon which he called systematic blindness: when a science reaches a stage of maturity and equilibrium, it categorically refuses, from a sense of self-preservation, to note certain facts and phenomena which it finds inconvenient. In Alexander Dolgin's book whole complexes of such "non-canonical" material are to be found. Here are just a few examples: the exchange networks, through which digital works of art are spread through the Internet; bargain sales of fashionable clothing; the paradox of equal pricing of cultural goods of varying quality; and a discussion of whether patronage or business has the more productive influence on creativity. Obviously, not all the issues Dolgin raises are totally new, but brought together and examined within an elegant logical framework of informational economics, they pose a challenge to scientific thinking. Such challenges are by no means immediately or, in some cases, ever acclaimed

The Music Sound Nicolae Sfetcu,2014-05-07 A guide for music: compositions, events, forms, genres, groups, history, industry, instruments, language, live music, musicians, songs, musicology, techniques, terminology , theory, music video. Music is a human activity which involves structured and audible sounds, which is used for artistic or aesthetic, entertainment, or ceremonial purposes. The traditional or classical European aspects of music often listed are those elements given primacy in European-influenced classical music: melody, harmony, rhythm, tone color/timbre, and form. A more comprehensive list is given by stating the aspects of sound: pitch, timbre, loudness, and duration. Common terms used to discuss particular pieces include melody, which is a succession of notes heard as some sort of unit; chord, which is a simultaneity of notes heard as some sort of unit; chord progression, which is a succession of chords (simultaneity succession); harmony, which is the relationship between two or more pitches; counterpoint, which is the simultaneity and organization of different melodies; and rhythm, which is the organization of the durational aspects of music.

Feenin Alexander Ghedi Weheliye,2023-09-29 In Feenin, Alexander Ghedi Weheliye traces R&B music’s continuing centrality in Black life since the late 1970s. Focusing on various musical production and reproduction technologies such as auto-tune and the materiality of the BlackFem singing voice, Weheliye counteracts the widespread popular and scholarly narratives of the genre’s decline and death. He shows how R&B remains a thriving venue for the expression of Black thought and life and a primary archive of the contemporary moment. Among other topics, Weheliye discusses the postdisco evolution of house music in Chicago and techno in Detroit, Prince and David Bowie in relation to appropriations of Blackness and Euro-whiteness in the 1980s, how the BlackFem voice functions as a repository of Black knowledge, the methods contemporary R&B musicians use to bring attention to Black Lives Matter, and the ways vocal distortion technologies such as the vocoder demonstrate Black music’s relevance to discussions of humanism and posthumanism. Ultimately, Feenin represents Weheliye’s capacious thinking about R&B as the site through which to consider questions of Blackness, technology, history, humanity, community, diaspora, and nationhood.
