Steven was born in 1969 in the village of Lemelerveld. The isolated location sparked his early interest in nature and his curiosity about the world. He traveled from Netherlands to West Africa on a motorcycle. He has a penchant for the North after taking Tropical Forestry Study. He is considering immigrating to Sweden eventually. He never wanted to be a writer but he had to write this story.

The Columbo Phile: A Casebook Mark Dawidziak,2019-11 When Columbo hit the airwaves in 1971, it quickly became the hottest TV detective series of the decade. Series creators Richard Levinson and William Link received an Emmy Award for their work; Peter Falk received three. The Columbo Phile offers fascinating behind-the-scenes information about the creation of the character, the writing of the devious mystery plots, and the altercations between perfectionist Peter Falk and the bottom-line concerns of Universal Studios. Originally published in 1989 and long out-of-print, this 30th Anniversary Edition of the essential Columbo book features a new preface by author Mark Dawidziak, an overview of post-1989 Columbo developments, including the twenty-four new ABC mysteries, and a personal remembrance of Peter Falk. It remains today the definitive guide to the rumpled Lieutenant Columbo and his career.

Tumble Hitch Pernille Rørth,2018-11-02 Jessie Aitkin, the long-time Editor-in-Chief of a leading life sciences journal, receives a fantastic job offer. A young animal rights activist requests an interview with her husband, Peter Dahl, a research scientist at a prestigious institute. An unexpected revelation sets in motion a series of events that shifts the course of their careers and their relationship. In this novel, another page turner by the author of *Raw Data: A Novel on Life in Science* (Springer 2016), enthusiasm for basic research and for how science is – and could be – communicated combine in a thoughtful reflection on the impact of ambition on personal relationships. In a non-technical appendix, the author discusses the use of narrative in scientific papers and considers alternative modes of science publishing, one of which is featured in the novel. Storytelling in science has the potential to enhance communication, but may also have unintended consequences. This novel and the appendix explore these timely and important issues for the scientific community.

The Gentleman's Companion Charles Henry Baker, ONE COMFORTABLE fact gleaned from travel in far countries was that regardless of race, creed or inner metabolisms, mankind has always created varying forms of stimulant liquid—each after his own kind. Prohibitions and nations and kings depart, but origin of such pleasant fluid finds constant source. Fermentation and the art of distilling liquors over heat became good form about the time our hairy forefathers began sketching mastodon and sabretooth tiger on their cave foyers. Elixir of fruit juice, crushed root and golden honey date back to the dawn of time and far beyond the written word, to when the old gods were young and stalked abroad upon business with goddesses, when Pan piped the dark forest aisles and Centaurs pawed belly deep in fern. The Phoenicians, the Pharaohs, the first agrarian Chinese, all ancient races on earth buried jars of wine or spirits with their dead alongside the money and food and weapons and wives, so the departed might find reasonable comfort and happiness in the hereafter. Go to Africa and the poorest Kaffir cheers life with—and for all of us he can have it—warm millet beer. We just returned from Mexico and can affirm that our Yucatecan most certainly ripped the bud out of his Agave Americana and drank the fermented pulque—a fluid which tastes faintly like mildewed donkeys—centuries before Montezuma's parents journeyed southward to the Valley of Cortez. We found additional evidence after three voyages to Zamboanga in Philippine Mindanao—where the monkeys have no tails—that the more agile Moro shinnied up his cocopalm and slashed the flower bud with his bolo; caught the saccharine drip—and an astounding menagerie of assorted squirt-ants—in a fermentation joint of bamboo, long before the Spanish Inquisition or Admiral Dewey steamed into Manila Bay. In Samoa the loveliest tribal virgin chews the kava root for the ceremonial bowl when your yacht sails into her lagoon, and the resultant fluid furnishes a sure ticket to amiable paralysis of the lower limbs. China and Japan have for centuries had their rice wine and saki. The Russian made his vodka from cereals, the blond Saxon his honey mead, the Hawaiian his okolehao from roots or fruits. We've been often to the Holy Land and have flown across to Transjordan and the rose-red city of Petra, and can bear witness that those grapes Moses the Lawgiver found in the Promised Land weren't all of a type suitable for raisins. To any reasonable mind this past and present testimony of mankind through the ages would indicate that some sort of fluid routine will continue for many centuries to come. With adventurers like Marco Polo, Columbus, Tavernier and Magellan, there was a vast national introduction and interchange of beverages. For better or worse both conquistador and native sampled, discarded or adapted an incredible addition of liquid blends and formulae. Through rigour or amiability of climate, through physical, racial and psychological characteristics of the individuals themselves, from the cocoon of this pristine field work there emerged an equally incredible list of drinks—mixed or otherwise—which for one reason or another have stood the test of time and taste and gradually have become set in form. They have become traditional, accepted in ethical social intercourse. And it is with the more civilized family of these that we are concerned in this volume; not the pulques and warm mealie beer or fermented Thibetan yak milk.

Titan #1: Taking Wing Michael A. Martin, Andy Mangels, 2005-04-01 William Riker, former first officer of the USS Enterprise in Star Trek: The Next Generation, takes command of the new USS Titan in this white-knuckled adventure perfect for longtime and new Star Trek fans. After almost a decade of strife against foes such as the Borg, the Cardassians, the Klingons, and the Dominion, the United Federation of Planets is at the dawn of a new era. Starfleet is renewing its mission of peaceful exploration, diplomacy, and the expansion of knowledge. Among the starships spearheading that endeavor is the USS Titan, commanded by Captain William T. Riker and manned by the most biologically varied and culturally diverse crew in Starfleet history. But their mission does not begin according

to plan. In the wake of Star Trek: Nemesis, Praetor Shinzon, slayer of the Romulan Senate, is dead. The power vacuum created by his demise has put the Romulan Star Empire, longtime adversary of the Federation, at the brink of civil war. Competing factions now vie for control of their fragmenting civilization, and if the empire should fall, that entire area of the galaxy may destabilize. To restore order to the region, Titan's long-anticipated mission of exploration is delayed as Starfleet assigns Riker to set up power-sharing talks among the Romulan factions. But even as the first tentative steps are taken toward building a new Romulus, the remnants of the Tal Shiar, the dreaded Romulan intelligence service, are regrouping behind the scenes for a power play of their own. With no other help available, Riker and the Titan crew become the last hope to prevent the quadrant from falling into chaos.

Memoirs of a Tory Radical Nigel Lawson, 2011-10-31 A fully revised and updated edition of Nigel Lawson's extraordinary autobiography. A key minister for a full decade and Chancellor of the Exchequer, from 1983 to 1989, Nigel Lawson was one of the most powerful and effective of Margaret Thatcher's colleagues, and among the chief architects of Thatcherism. This abridged edition of Lord Lawson's memoirs - first published as *The View from No.11* in 1992 and acclaimed as one of the best political memoirs of the period - goes straight to the heart of economic policy-making at a time of crisis and creative change. It explains the workings of government with candour, clarity and depth, against the backdrop of the remarkable story of the rise and fall of his political collaboration with Margaret Thatcher, productive and successful for many years, but ending with his dramatic resignation in October 1989. The book includes a new final chapter reflecting on events from the perspective of 2010, also discussing the crisis in the banking sector and global warming.

365 Days/365 Plays Suzan-Lori Parks, 2022-03-18 On November 13, 2002, the incomparable Suzan-Lori Parks got an idea to write a play every day for a year. She began that very day, finishing one year later. The result is an extraordinary testament to artistic commitment. This collection of 365 impeccably crafted pieces, each with its own distinctive characters and dramatic power, is a complete work by an artist responding to her world, each and every day. Parks is one of the American theater's most wily and innovative writers, and her stark but poetic language and fiercely idiosyncratic images transform her work into something haunting and marvelous. (Time Magazine) Note: Theatre makers are welcome to present an assortment of selected plays from 365 Days/365 Plays. A presentation of 31 or more plays is considered Full-Length, while a presentation of 30 or fewer plays is considered One Act. All presentations must include the three plays known collectively as The 3 Constants.

An Accidental Autobiography Gregory Corso,2003 He left (or was left by) a number of girlfriends and he fathered five children along the way. He was apt to raise a bit of a ruckus at poetry readings and other public events.
