Longarm #432 Tabor Evans,2014-10-28 These moonshiners trade in firewater...and death! One good lawyer has already been murdered in pursuit of Missouri moonshiners who could care less if their rotgut leaves a person blind—or even dead. Now it's Deputy U.S. Marshal Custis Long's turn to search out their stills and make sure these moonshiners don't see the light of day. But as Longarm explores the back country, he learns there's far more at stake than selling bad hooch to the locals. Intoxicated by greed, one man is behind an ambitious whiskey-running operation to sell firewater—and firearms—to the Indians. It's up to Longarm to give this liquor-lugging lunatic a shot and a chaser of a little something called justice...

Design of Steel-Concrete Composite Bridges to Eurocodes
Ioannis Vayas,Aristidis Iliopoulos,2013-08-29 Combining a theoretical background with engineering practice, *Design of Steel-Concrete Composite Bridges to Eurocodes* covers the conceptual and detailed design of composite bridges in accordance with the Eurocodes. Bridge design is strongly based on prescriptive normative rules regarding loads and their combinations, safety factors, material properties, analysis methods, required verifications, and other issues that are included in the codes.

Composite bridges may be designed in accordance with the Eurocodes, which have recently been adopted across the European Union. This book centers on the new design rules incorporated in the EN-versions of the Eurocodes. The book addresses the design for a majority of composite bridge superstructures and guides readers through the selection of appropriate structural bridge systems. It introduces the loads on bridges and their combinations, proposes software supported analysis models, and outlines the required verifications for sections and members at ultimate and serviceability limit states, including fatigue and plate buckling, as well as seismic design of the deck and the bearings. It presents the main types of common composite bridges, discusses structural forms and systems, and describes preliminary design aids and erection methods. It provides information on railway bridges, but through the design examples makes road bridges the focal point. This text includes several design examples within the chapters, explores the structural details, summarizes the relevant design codes, discusses durability issues, presents the properties for structural materials, concentrates on modeling for global analysis, and lays down the rules for the shear connection. It presents fatigue analysis and design, fatigue load models, detail categories, and fatigue verifications for structural steel, reinforcement, concrete, and shear connectors. It also covers structural bearings and dampers, with an emphasis on reinforced elastomeric bearings. The book is appropriate for structural engineering students, bridge designers or practicing engineers converting from other codes to Eurocodes.

Abnormal Psychology William J. Ray,2016-11-30 In Abnormal Psychology: Perspectives on Human Behavior and Experience Second Edition, William J. Ray brings together current perspectives concerning the manner in which the human mind, behavior, and experience can be understood. In addition to the traditional psychological literature, this book draws from work in the cognitive and affective neurosciences, epidemiology, ethology, and genetics. Ray's focus is on a unification and integration of the biopsychosocial understandings of human behavior within a broader consideration of human culture and language as it applies to abnormal psychology.

Dematerialized Joseph DiSomma ,Marina DiSomma,2021-11-02 On a bitterly cold night in January of 1979, the heiress to the Sheraton Hotel fortune vanished without a trace. This is the true story of Marcia Moore—daring author, yoga teacher, astrologer, and occultist. She experimented with the psychotropic anesthetic ketamine, in the same vein as Timothy Leary's consciousness-expanding research with LSD. Her interest in psychedelics has only added to the wild theories about Moore's mysterious death in the four decades since. Psychics, astrologers, and armchair sleuths have all had their say. Now it's time to set the record straight. In 1980, famous true crime author Ann Rule referred to Marcia's disappearance as "probably the strangest case I have ever written about. One day, there may be answers." After years of painstaking research, this book reveals those answers about a case as multifaceted and intriguing as the woman who perished so tragically. This is the story of a bold woman, raised well-to-do and just a stone's throw from Walden Pond, who took the road less traveled—and paid for it with her life.
