**Mastering No-Code** Paul E Love,2021-05-05 No-Code application development platforms have seen a major rise in popularity in the last decade, primarily because these platforms offer a great way for businesses and other organizations to develop apps that meet their needs

without having to involve professional software developers. Due to the lack of programming knowledge needed, it's not surprising that Gartner (a leading research and advisory firm) projects that by 2025, 65% of all app development will be done on No-Code platforms. If you've ever had an idea you wanted to turn into an app but didn't have the money to pay a developer and didn't have time or inclination to learn how to code in order to create that app, no-code is your answer. If you know what you want to build, no-code platforms allow you to assemble a working program that follows best programming practices just by dragging and dropping components onto a screen. Of course it helps to have done some research into no-code apps including current trends, techniques, and tips on how to put together the best version of your application. That's where our blog comes in. Mastering No-Code ([www.mastering-nocode.com](http://www.mastering-nocode.com)) provides news, articles, examples, explanations, and tips on how to become a professional no-code developer. If you're simply interested in learning how to build your own apps or if you want to create an app for sale, or to fill a business need, or just for fun, this book may help you get started. Even if you're already using a no-code platform you may find something interesting, so go ahead and take a look inside...Note: This material consists primarily of blog posts from Mastering No-Code (January through March 2021).

**Creating Mobile Apps Without Coding** Neil Perlin,2014-03-19 “Mobile” is changing how business is done. Mobile apps can let your company work in new ways to boost customer loyalty and satisfaction and build new revenue streams. And having your own apps can brand the company as forward-thinking and edgy, or just plain “cool.” But how do you get those apps?You can check in Apple's App Store and Android's Play Store, but those apps are generic. They'll do some of what you need... You can get a custom app created for your specific needs, but creating apps takes programming skill and is expensive and time—consuming, possibly expensive enough to be unaffordable and time-consuming enough to be unable to quickly respond to changing business needs. Until now...New app development tools are creating a world of DIY (Do-It-Yourself) apps. If you have an analytical bent and know how to use standard business tools like Microsoft® PowerPoint and Excel, you may be able to create your own apps, yourself, in days or weeks rather than months, and inexpensively. This book explains

how. The book first introduces DIY apps in general – their rationales, design principles, and more. It then focuses on a specific tool called ViziApps. You'll learn about ViziApps' features and get step-by-step instructions for creating a simple but real app that's complete except for being in the stores. You'll do this with no coding. When you finish, you'll have a feel for DIY app creation and a working app. Quickly, and with no coding.
