workbook/guide is designed to teach how to create a PowerPoint slide show. First, we will review the interface and how to navigate around PowerPoint. The next step will be to create an outline by typing in topics to be covered. Then, we will discuss how to build the overall layout using templates and a master slide layout. Adjusting the positioning of each page is also very important, as well as the overall formatting as necessary. The final stages include printing and presenting the slide Show. What's in the workbook? Click on the left side of the screen: Look Inside! Enter one of the following keywords: Templates, Master, Formatting, Slide Show, etc. Take A Class: <http://www.elearnlogic.com/download/schedule.pdf> Design Strategy This workbook is designed in conjunction with an Online-Instructor-Led course (for more information see: www.elearnlogic.com). Unlike other computer guides, students will not need to review lengthy procedures in order to understand a topic. All that is necessary are the brief statements and command paths located within the guide that demonstrate how a concept is used. There are many Step-By-Step Practice Exercises and more comprehensive Student Projects offered to help students better understand concepts. Furthermore, they will find that this workbook/guide can often be used as a reference to help them understand concepts quickly and thoroughly. An index is also provided on the last page to reference important topics as necessary. However, if more detail is needed for study, the Internet can be used, as well, to search a concept. Also, if student's skills are weak due to lack of implementation, they can refresh their knowledge quickly by visually scanning concepts of choice, and then testing them out using the application.
