The Plastic Effect Polly A. Bauer, Stephen Lesavich, PhD, JD, 2012-12-14 WINNER 2013 ~ INDEPENDENT PUBLISHER LIVING NOW BOOK AWARD ~ GOLD MEDAL for best book in Finance/Budgeting. The Living Now Book Awards celebrate the innovation and creativity of newly published books that enhance the quality of our lives and publicize the importance of these books to readers . Do you have a credit card? Roughly 70% of adults in the U.S. do. In fact, Americans average 3.5 credit cards per person – that's a lot of plastic! Even with all that buying power in their wallets, most consumers have no idea the ways that they use (or misuse) their credit cards can affect their health, their relationships, and their credit scores. Many factors go into mounting credit card debt: impulse shopping, health emergencies, the loss of a job, marriage, divorce, a death in the family. With this debt comes stress, arguments, loss of sleep, inability to pay other bills, worry, health problems, crumbling relationships. Does any of this sound familiar? Increasing credit card debt and a lack of knowledge about how credit cards really work have created a new social phenomenon called The Plastic Effect. And if you have a credit card, The Plastic Effect can affect YOU. In this new book, internationally recognized credit card expert, Polly A. Bauer, CPCS and attorney Stephen Lesavich, PhD, JD, have selected 25 of the most common urban legends influencing the use and misuse of credit cards. The authors, as business leaders and credit card experts, walk you through these urban legends about how credit cards are used and misused, explaining what is true and what is likely to cause you trouble. You will get access to resources and additional information about each myth, tips from industry experts, and guidance that will help you use your credit cards more intelligently and effectively. You'll also learn how to understand your credit reports, improve your credit score and manage your debt in a way that puts the power back in YOUR hands. In short, this book will help you

break free of The Plastic Effect.

Credit Card Information Martar Media,2020-01-25 All credit cards are created equal, right? Wrong! That's like saying a dented, 1970s van is the same as a fully loaded, luxury 2020 SUV. Consumer credit cards can vary dramatically in terms and conditions that either cost or save you money. Because financial institutions are extremely competitive in marketing credit cards, you'll find different terms and conditions among the suppliers. If you're a smart shopper, you'll pay attention to the fine print. Naturally you want the most credit for the least long-term cost. Look for a credit card with a low APR. That's the Annual Percentage Rate or the actual cost for credit. It's basically the price of renting the credit card company's money for a period of time. Time is of the essence here. Make the minimum monthly payment on time, every time and you'll keep the stated APR. If your payment is late (or missing), some cards bump up your APR by several percentage points. A late payment could boost your APR into the 18-22% range and it stays there - there's no reduction for making the next payment, because your late payment threw you into the high APR penalty box with no escape clause. Let's assume that you're a good credit risk and you'll make the monthly payments on time. Look for a card that gives a little something extra, like bonus points that can be traded for gifts, restaurant meals, movie tickets, music downloads or travel and hotel stays. As you spend on your

credit card, you actually earn something else that you want. That's making a good deal even better. There are some people who charge everything and pay in full each month, and are easily able to afford roundtrip first-class tickets anywhere in the world each year!The fastest way to get a credit card and start shopping is to apply for the card online. In mere minutes, you can complete the credit card application and get approval almost immediately if your credit checks out. With instant credit, some companies give you a small opening limit so you can shop online right away. You have to wait a few days (usually 7-10 business days) for the actual card to arrive by snail mail.If you currently have a high interest credit card, you may be able to find a better deal online where you can transfer the balance and pay 0% interest for 6 months, or some comparable transfer incentive that makes it worth your while to make the switch.Read more from Credit Card Information - Consumer Credit Card Student Credit Card Business Credit Card FAQ eBook.

Implementing Electronic Card Payment Systems Cristian Radu,2003 As magnetic stripe cards are being replaced by chip cards that offer consumers and business greater protection against fraud, a new standard for this technology is being introduced by Europay, MasterCard and Visa (EMV). This volume presents a comprehensive overview of the EMV chip solution and explains how this technology provides a chip migration path, where interoperability plays a central role in the business model. The work offers an understanding of the security problems associated with magnetic stripe cards, and presents the business case for chip migration. Moreover, it explains the implementation of multi-application selection mechanisms in EMV chip cards and terminals, and shows you how to design a multi-application EMV chip card layout.
