Pretty much everything you do in your life affects your credit rating, even things that you would never imagine If you have no credit but you manage to get a credit card, do you think it is better to pay the balance all off at once every month, or pay it off in installments? Many people would say pay it off every month. After all, that way you have no debt, pay no interest, and establish yourself as a reliable person, right? But think about it: If you pay it off in full every month you are effectively not borrowing any money; therefore, you do not have any score on your credit rating. If you pay the debt off in installments you are building up your good credit rating-provided you make the minimum payment on time.
