Addicted to Black & Gold Chris Gallutia,2000-06-08 This book bleeds passion and commitment. The author has taken the time to recount his feelings on his club as the year unfolded. The book contains pithy remarks, trenchant observations, and fresh, insightful view of the burgeoning American soccer scene through the eyes of one fan. He covers his club in an honest open manner, remaining forever objective albeit dedicated to his team. At the same time, he assesses the sport, the league, and opposing clubs in the same forthright manner.

That Others Might Live Dennis L. Noble,1994 From 1878 to 1915 the U.S. Life-Saving Service was a small federal maritime organization that carried out amazing rescues of those in distress close to shore. Working from small stations scattered along the coastlines of the United States and using only oar-powered boats, none longer than 36 feet, crewmembers came to be known as storm warriors as they pulled off rescues that almost defied belief. Considered one of the most valorous organizations ever run by the U.S. government, the service carried out thousands of rescues, and many of its men lost their lives in the effort to save others. Yet since its incorporation into the U.S. Coast Guard in 1915, the feats of this life-saving service have been largely confused with those of its successor or forgotten altogether. Now for the first time in a full-length book, the author presents an operational history of the U.S. Life-Saving Service and places the agency within a national context, shedding light on a little-known aspect of maritime history. The book includes numerous photographs and other illustrations of the people, equipment, and exploits of this service and covers many out-of-the-way stations about which little has been published. Dennis Noble also examines the formation of the service, its organization, and its rescue equipment and explores the lives and routines of early watermen. In a clear and precise style, he describes how rescue efforts were conducted and includes gripping stories of the fate of such schooners as the George Taulane and J. H. Hartzell. These legendary sea rescues that presaged the modern-day Coast Guard were previously addressed only on a local or regional basis.

United States Life-Saving Service in Michigan William D. Peterson,2000 Michigan, the Great Lakes State, is full of rich maritime traditions and with these traditions comes the danger and risk of shipwreck. Author William D. Peterson has compiled in this new book a photographic history of the United States Life-Saving Service in the Great Lakes region, and immortalizes in it the men who paved the way for the U.S. Coast Guard in 1915. In 1854, the U.S. Government provided funds for lighthouses, boats, and life-saving equipment along the Atlantic seaboard to alleviate shipping disasters. These early efforts greatly reduced the number of lives and property lost to shipwrecks. In the heart of the Midwest, however, the Great Lakes alone claimed 4,500 vessels, 1,300 people, and more than 27 million dollars in monetary damages between 1855 and 1876. These staggering losses prompted Congress to pass legislation putting the United States Life-Saving Service (USLSS) into operation in Michigan and other Great Lakes States. Pictured here in almost 200 images and detailed captions are Michigan's 38 USLSS stations and their crews along the Great Lakes, including Ottawa Point, Grand Haven, Holland, and South Manitou Island.

Sand Pounders Robert F. Bennett,1998 In January 1915, two Treasury Department agencies merged to form the United States Coast Guard. One of these agencies, the United States Life-Saving Service (USLSS) had been created in August 1848 for the purpose of rescuing people who were ship-wrecked on the coast of New Jersey. That federal organization, manned primarily by volunteers, was reorganized in 1870 to included paid surfmen who patrolled our coastline during stormy seasons. Eventually the scope of the USLSS included the nation's Atlantic, Great Lakes, Gulf of Mexico, Pacific, and Alaskan coasts. For 44 years, the surfmen of the USLSS dutifully pounded their feet along mostly sandy pathways in all kinds of weather, occasionally discovering a vessel in distress and, then, acting to initiate the rescue operations that would demand their fullest participation. And, sometimes, even their sacrifice. These surfmen have been called sandpounders. It was a title that they could wear proudly. This is the story of that organization as gleaned from the official Annual Reports of the USLSS and the correspondence files of the National Archives.

Women and the Lakes Frederick Stonehouse,2001 From deep sea diver to ship's captain, lighthouse keeper and rescuer, women fill virtually every job of the Great Lakes maritime trade--both past and present. This book relates many untold stories of these remarkable women and their impact on the Great Lakes and sailors lives -- back cover.
