Ken Gilbertson

Outdoor Guide to Using Your GPS Steve Featherstone, 2004-07 No matter what you're doing in the outdoors, you may need help navigating from place to place-and remembering how to get back. A compass and a map are excellent tools, and knowing how to use them will make it even easier to learn how to use your Global Positioning System unit. The author has been involved with teaching people how to use GPS for many years. In this book he shares the answers to all the questions a novice might ask: What is GPS? How does it work? How accurate is it? Does it work anywhere? Is it for traveling on land as well as on the water? and more. Topics include: straight-line navigation, getting around obstacles, uploading maps and databases, entering waypoints, recording a breadcrumb trail, how to choose a GPS model and caring for your GPS. The step-by-step instructions are accompanied by illustrations and photographs. Actual GPS screens are shown as the user sees them on his or her unit while navigating. In addition to a glossary of GPS terms and definitions, this book has a list of popular manufacturers, a list of software sources and an Index.

As the Crow Flies Kitty Higgins, 2004 A math class races from school to City Hall. One team travels as the crow flies, using a compass. The other team uses a map. Which team will win?

Joy of Backpacking Brian Beffort, 2015-07-20 A comprehensive guide covering every aspect of how to backpack--from planning a first trip to advanced wilderness travel. For those new to the activity, longtime backpacker and author Brian Beffort covers the fundamentals, with sections on trip planning, gear, backcountry nutrition and cooking, navigation, and other essential wilderness skills. You will also learn what to expect on the trail and in camp, and how to stay safe with first aid, weather preparedness, and more. For experienced packers, this book is filled with practical tips and inspired ideas on how to update and refine your approach to backpacking based on trends in

lightweight gear, high-tech gadgets, changing wilderness rules, and increasing opportunities for wilderness travel around the world.

Tracking David R. Palmer, 2023-12-08 Meet Candidia Smith-Foster, Homo post hominem, the next step in Mankind's evolution. She's an eleven-year-old genius with a Black Belt, and last summer she saved all that remained of her struggling new branch of humanity. Since then she's been training under an ex-Mossad assassin. She's just learned who's been holding her Daddy and now she knows where they are...

Assistive Technology Design for Intelligence Augmentation Stefan Carmien, 2016-04-04 Assistive Technology Design for Intelligence Augmentation presents a series of frameworks, perspectives, and design guidelines drawn from disciplines spanning urban design, artificial intelligence, sociology, and new forms of collaborative work, as well as the author's experience in designing systems for people with cognitive disabilities. Many of the topics explored came from the author's graduate studies at the Center for LifeLong Learning and Design, part of the Department of Computer Science and the Institute of Cognitive Science at the University of Colorado, Boulder. The members of the Center for LifeLong Learning and Design came from a wide range of design perspectives including computer science, molecular biology, journalism, architecture, assistive technology (AT), urban design, sociology, and psychology. The main emphasis of this book is to provide leverage for understanding the problems that the AT designer faces rather than facilitating the design process itself. Looking at the designer's task with these lenses often changes the nature of the problem to be solved. The main body of this book consists of a series of short chapters describing a particular approach, its applicability and relevance to design for intelligence augmentation in complex computationally supported systems, and examples in research and the marketplace. The final part of the book consists of listing source documents for each of the topics

and a reading list for further exploration. This book provides an introduction to perspectives and frameworks that are not commonly taught in presentations of AT design which may also provide valuable design insights to general human-computer interaction and computer-supported cooperative work researchers and practitioners.

Outdoor Education Ken Gilbertson, 2006 Outdoor Education: Methods and Strategies applies educational theories to outdoor teaching methods and helps educators learn how to choose the instructional strategies that will best work for their audiences, whether they're in a school, nature center, adventure center, camp, environmental learning center, government agency, or university. Outdoor Education: Methods and Strategies provides practical lesson plans and examples that go beyond the normal scope of a text. It will benefit both new and veteran educators by teaching them how to enhance their audience's awareness, appreciation, and knowledge of the outdoors. Ultimately, it will advance educators' abilities to increase people's enjoyment and understanding of the environment.--BOOK JACKET.

As the Crow Flies Janet Street-Porter, 1999 Following in the footsteps of her successful BBC2

1998 series, *Coast to Coast*, As the Crow Flies describes Janet Street-Porter's attempt to walk the 350 miles from Edinburgh Observatory to Greenwich Observatory in a dead straight line. She discovers a new way of walking—the OS map isn't quite so handy when you can't stray off a line you've drawn on a map. What's more useful is a heavy clearing stick, the power of persuasion, and the patience of a saint. Janet adopts the old ramblers' cause of the right to roam, discovering some of the most beautiful countryside in Britain—as well as bargaining and begging her way into secure properties, dodging Boeing 737s on take-off, and invading army bases and Saturday morning golf tournaments, all in the name of completing this mammoth walk strictly as the crow flies.

Universal Design 2014: Three Days of Creativity and Diversity H.A. Caltenco, P.-O. Hedvall, A. Larsson, 2014-05-30 *Universal Design, Design for All and Inclusive Design* are all aimed at

dismantling physical and social barriers to inclusion in all areas of life. Engagement in universal design is on the increase worldwide as practitioners and researchers explore creative and desirable solutions to shape the future of universal design products and practices. This book is a collection of the papers presented at UD2014, the International Conference on Universal Design, held in Lund, Sweden, in June 2014. The conference offered a creative and diverse meeting place for all participants to exchange knowledge, experiences and ideas, and to build global connections and creative networks for future work on universal design. The themes of UD2014 span many aspects of societal life, and the papers included here cover areas as diverse as architecture, public transport, educational and play environments, housing, universal workspaces, and the Internet of things, as well as designs and adaptations for assistive technology. The book clearly demonstrates the breadth of universal design and its ongoing adoption in societies all over the world, and will be of interest to anyone whose work involves building a more inclusive environment for all.
